This book covers the history of the 5 series midsize sedan and the related X5 SUV from September 1972 to the e60's major makeover for 2008 and the development of the e70 X5. Specific mechanical, electronic and cosmetic changes are described, including the time of and reasons for their introduction. Several aspects of BMW's corporate history and technically related models such as the 6-series are also described, as are aftermarket modifications by Alpina, Hartge, and other specialist BMW tuners and speed shops. His kite, entangled with another, crashed onto the ground. The flight took off smoothly from the runway of her heart, only to be hit by turbulence and thunderstorms smashing the plane into an abandoned sea full of gloominess. There he saw a lighthouse, a ray of hope. She became his lifeguard and taught him to swim through the storm. Like a guiding angel, she enlightened him towards the path of self-discovery leading to his journey to the island called 'Bollywood.' Raghav rode on a roller coaster encompassing love, passion, and conflicts. Hopping from one town to another in search of his purpose, he landed in the city of love and lights, Paris, where he saw the horizon, an illusion of his world merging with hers. But just like the two poles on Earth never meet, so was his destiny. On one side, he had Diya whom he could never get, and on the other side was Niharika whom he could never lose, and in the midst of all the chaos, he found his treasure. Come along with him to discover his hidden treasure. Who knows! You might find yours too.

But who knows which coupé was designed by Frua, which limousine by Engel, which station wagon by Opron? For a long time, car design was considered to be anonymous, the designers stood in the shadow of the perception of the design, even though their designs can be found on the roads in millions. This richly illustrated book captures the origin of a profession and maps the development of car design based on a comprehensive introduction and the career biographies of over 200 selected designers who contributed to the design of cars and many different associated products in the USA, Europe, and Japan between 1900 and 2000.
