Accounting Information for Business Decisions is a business-focused introduction to Accounting for all students - not just those intending to be Accounting majors. Lead students through the real-world business cycle and how accounting information informs decision-making. Departing from the traditional approach taken by other introductory accounting textbooks, students apply both managerial and financial approaches within the topics examined in each chapter, to see the direct impact that Managerial Accounting decisions make on the Financial Accounting processes (and vice versa). The conversational writing engages students in the theoretical content and how it applies to contemporary real-world scenarios. Students follow a retail coffee business in the relatable Cafe Revive running case study integrated into every chapter, to learn about applying accounting issues in the real world. Accounting Information Systems 1e covers the four roles for accountants with respect to information technology: 1. Users of technology and information systems, 2. Managers of users of technology, 3. Designers of information systems, and 4. Evaluators of information systems. Accountants must understand the organisation and how organisational processes generate information important to management. Richardson's focus is on the accountant's role as business analyst in solving business problems by database modeling, database design, and business process modeling. Unlike other texts that provide a broad survey of AIS related topics, this text concentrates on developing practical, real-world business analysis skills.

This completely revised, fourth edition of *The Design Selection & Implementation of Accounting Information Systems* focuses on AIS concepts that make students more marketable in the current accounting environment. Today, more than 90 percent of accounting systems are commercially licensed. This has driven a market demand for accounting graduates who can install, operate, and audit commercial accounting information systems. In contrast to traditional accounting systems texts that emphasize systems development, this text gives students the theoretical foundation and skills to conduct a requirements analysis, search for a commercial solution, and successfully implement the software package selected. The authors combine a strong presentation of essential AIS concepts with numerous examples of leading commercial accounting systems software.

*Accounting Information Systems: Understanding Business Processes* is the fourth edition of the leading local textbook available to students who are required to study a subject on accounting information systems. A well established and

widely used textbook, the new edition continues to detail the important role of accounting and information systems in business. As students of accounting are required to possess a firm understanding of accounting information systems and how they impact upon various core business processes the text explores the business processes that are central to many organisations, and explains the many issues associated with accounting information systems.

Casebook in Accounting Information Systems bridges the gap between the theory and practice of accounting information systems analysis, design, and implementation. Projects provide students with essential hands-on experience in most of the major activities associated with analyzing, designing, and implementing an accounting information system.

Students must use analytical tools gained from other accounting classes to design the best system possible -- one that provides the most useful information to the right people, at the right time, and at a competitive price.

The essential concepts of accounting information systems in a concise, straightforward format. This book focuses on the role of an accountant as a user, evaluator and designer of the typical transaction processing systems and cycles used by an enterprise.

Business Driven Information Systems, 4e discusses various business initiatives first and how technology supports those initiatives second. The premise for this unique approach is that business initiatives should drive technology choices. Every discussion first addresses the business needs and then addresses the technology that supports those needs. This updated edition provides the foundation that will enable students to achieve excellence in business through its updated case studies, closing cases, technology plug-ins, expanded IT topics, and new project management content. Business Driven Information Systems is designed to give

The practicing accountant should have a thorough knowledge of the processes within an accounting system. Otherwise, it would not be possible to create a system of controls, write procedures, understand where errors are originating, or develop new systems. The Accounting Information Systems book provides the deep background needed to gain proficiency in this area. In addition, there is significant treatment of the many controls integrated into accounting systems. Finally, the book describes the key events in the process of developing and installing a new system. In short, this book is the essential source for the accountant who wants to understand the core functions of an accounting information system.

WHAT'S IN IT FOR ME? Information technology lives all around us-in how we communicate, how we do business, how we shop, and how we learn. Smart phones, iPods, PDAs, and wireless devices dominate our lives, and yet it's all too easy for students to take information technology for granted.

Rainer and Turban's Introduction to Information Systems, 2nd edition helps make Information Technology come alive in the classroom. This text takes students where IT lives-in today's

Accounting for Managers explains how accounting information is used by non-financial managers. The book emphasises the interpretation, rather than the construction, of accounting information and encourages a critical, rather than unthinking acceptance, of the underlying assumptions behind accounting. It links theory with practical examples and case studies drawn from real life business situations in service, retail and manufacturing industries.

CONSTRUCTION ACCOUNTING & FINANCIAL MANAGEMENT, 3/e helps construction professionals and construction management students master the principles of financial management, and adapt and apply them to the challenge of profitably managing construction companies. It integrates content that has traditionally been taught through separate accounting, finance, and engineering economics texts. Students learn how to account for a construction company's financial resources; how to manage its costs, profits, and cash flows; how to evaluate different sources of funding a company's cash needs; and how to quantitatively analyze financial decisions. Readers gain hands-on experience through 220 example problems and over 390 practice problems, many of them based on situations actually encountered by the author. This edition adds more than 100 new discussion questions, and presents financial equations and accounting transactions more visually to support more intuitive learning.
