"This book covers the Math, Critical Reading, and Writing sections of the SAT and provides students with learning disabilities with a unique set of features to help them succeed"--Cover, p. 4.

"The text is suitable for a typical introductory algebra course, and was developed to be used flexibly. While the breadth of topics may go beyond what an instructor would cover, the modular approach and the richness of content ensures that the book meets the needs of a variety of programs."--Page 1.

This text blends traditional introductory physics topics with an emphasis on human applications and an expanded coverage of modern physics topics, such as the existence of atoms and the conversion of mass into energy. Topical coverage is combined with the author's lively, conversational writing style, innovative features, the direct and clear manner of presentation, and the emphasis on problem solving and practical applications. This study guide helps prepare for the ETS Praxis 2 Secondary Math exams, given both on paper and computer. The test code is 5161.
