Examination, 3rd Edition makes exam preparation easy. Review the content you'll see on the exam with handy outlines, test-taking tips and strategies, and electronic flash cards. Written by noted pharmacy technician educator James J. Mizner, this complete review tests your knowledge and simulates the actual PTCB exam with 17 different, 100-question practice exams in the book and online. This edition is modeled after the updated Pharmacy Technician Certification Exam Blueprint. A total of 1,700 review questions are included in 17 practice exams in the book and online. 100-question format of each practice exam simulates the PTCB and ExCPT exams, with multiple-choice questions and the same balance of content, for a realistic test taking experience. 700 electronic flash cards help you learn and remember facts by covering the top 200 most prescribed pharmaceuticals, top 50 herbals, abbreviations, and sound-alike drugs. Review content reflects the new percentages covered on the PTCB exam. A convenient outline format helps you to quickly review important information you'll see on the exam. Tips and suggestions prepare you for test-taking success by providing an insider's perspective on what to expect and how to prepare for your exam when you have limited time. Seven practice exams in the book feature the same format and content emphasis as the national exam. Ten practice exams on the Evolve companion website in both timed and untimed modes help you identify any areas of weakness, and include instant feedback and remediation. UPDATED content includes current drug information and pharmacy practice procedures based on the new Pharmacy Technician Certification Exam Blueprint. NEW! Chapter objectives provide a clear breakdown of content and goals for review.

The development of new technology means that compromised patients previously confined to hospital may now be treated at home. Those patients receiving intravenous feeding, cytotoxic drugs and new insulin therapy, are fully trained by the health-care professionals (doctors, pharmacists and nurses) to encourage self-reliance and understanding which are vital to success. There are hazards in treating these patients in the home environment, e.g. microbiological risks which are currently being evaluated, failure of equipment, and social problems as patients adjust to a new life in the community. Nevertheless, the balance of benefits favour restoration of the patient to a self-reliant positive life at home. The delivery of this important new dimension in therapy was described at a symposium held in the University of York by innovators in the field. Discussion enabled the core of knowledge and experience developed by multi-disciplinary teams to be shared. The problems of supplying parenteral nutrition and medication for the compromised patient in the home and the family situation were aired and solutions presented. The special care for hospital out-patients receiving cytotoxic drug therapy and safe procedures for staff handling these agents was presented and together with responses to questions indicated the direction for UK hospital pharmacists to follow. More information is needed and it is hoped that this account of these proceedings will stimulate interest in these aspects of health care.
