Since the "Automatic Binding Bricks" that LEGO produced in 1949, and the LEGO "System of Play" that began with the release of Town Plan No. 1 (1955), LEGO bricks have gone on to become a global phenomenon, and the favorite building toy of children, as well as many an AFOL (Adult Fan of LEGO). LEGO has also become a medium into which a wide number of media franchises, including Star Wars, Harry Potter, Pirates of the Caribbean, Batman, Superman, Lord of the Rings, and others, have adapted their characters, vehicles, props, and settings. The LEGO Group itself has become a multimedia empire, including LEGO books, movies, television shows, video games, board games, comic books, theme parks, magazines, and even MMORPGs. *LEGO Studies: Examining the Building Blocks of a Transmedial Phenomenon* is the first collection to examine LEGO as both a medium into which other franchises can be adapted and a transmedial franchise of its own. Although each essay looks at a particular aspect of the LEGO phenomenon, topics such as adaptation, representation, paratexts, franchises, and interactivity intersect throughout these essays, proposing that the study of LEGO as a medium and

Shannon Watts was a stay-at-home mom folding laundry when news of the tragic shooting at Sandy Hook Elementary flashed across the television screen. In one moment, she went from outraged to engaged and decided to do something about it. What started as a simple Facebook group to connect with other frustrated parents grew into Moms Demand Action, a national movement with millions of supporters and a powerful grassroots network of local chapters in all 50 states. Shannon has been called "the NRA's worst nightmare"—and her army of moms have bravely gone up against the gun lobby, showing up in their signature red shirts, blocking the hallways of congress with their strollers, electing gun sense candidates and running for office themselves, proving that if the 80 million moms in this country come together, they can put an end to gun violence. *Fight Like a Mother* is the incredible account how one mother's cry for change became the driving force behind gun safety progress. Along with stories of perseverance, courage, and compassion, Watts shines a light on the unique power of women—starting with what they have, leading with

their maternal strengths, and doubling down instead of backing down. While not everyone can be on the front lines lobbying congress, every mom is already a multi-tasking organizer, and Shannon explains how to go from amateur activist to having a real impact in your community and beyond. *Fight Like a Mother* will inspire everyone—mothers and fathers, students and teachers, lawmakers, and anyone motivated to enact change—to get to work transforming hearts and minds, and passing laws that save lives.

The phenomenal growth of the media and entertainment industries has contributed to a fragmented approach to intellectual property rights. Written by a range of experts in the field, this Handbook deals with contemporary aspects of intellectual property law (IP), and examines how they relate to different facets of media and entertainment. This must-have resource comprehensively covers the many legal issues that particularly affect California public sector agencies and their officers and employees. Written and edited by an outstanding team of skilled experts who are members of The State Bar of California's Labor and Employment Law Section, the book is divided into four parts: • The Hiring Process; • Wage and Hour Laws; • Public Sector Employee Rights, Obligations and Protections; and • Public Agency Rights, Obligations and Liabilities. Within these main categories, many subjects are unique to the public

sector, such as retirement, due process, conflicts of interest, free speech, contracting out governmental services, open meeting laws, political activities, and public safety employees. Other subjects, such as wage and hour law, leaves of absence, hiring, privacy rights, and various litigation issues, cover areas that affect both the public and private sectors. Although issues that apply to the private sector are covered, the emphasis in this book is on the unique issues that affect the public sector.

LEGOified: Building Blocks as Media offers a multi-faceted exploration of LEGO fandom, addressing a blindspot in current accounts of LEGO and an emerging area of interest to media scholars: namely, the role of hobbyist enthusiasts and content producers in LEGO's emergence as a ubiquitous transmedia franchise. This book examines a range of LEGO hobbyism and their attendant forms of mediated self-expression and identity (their "technicities"): artists, aspiring Master Builders, collectors, and entrepreneurs who refashion LEGO bricks into new commodities (sets, tchotchkes, and

minifigures). The practices and perspectives that constitute this diverse scene lie at the intersection of multiple transformations in contemporary culture, including the shifting relationships between culture industries and the audiences that form their most ardent consumer base, but also the emerging forms of entrepreneurialism, professionalization, and globalization that characterize the burgeoning DIY movement. The major aim of this edited volume, and what makes it a compelling project for media scholars, is its rigorous, multi-dimensional articulation of how LEGO functions not just as toy, as cultural icon, or as transmedia franchise, but as a media platform. *LEGOified* is centered around their shared experiences, qualitative observations, and semi-structured interviews at a number of LEGO hobbyist conventions. Working outwards from these conventions, each chapter of the book engages additional modes of inquiry -- media archaeology, aesthetics, posthumanist philosophy, feminist media studies, and science and technology studies -- to explore the origins, permutations and implications of different aspects of the contemporary LEGO fandom scene.

Early in the 21st Century, the Tyrell Corporation advanced Robot evolution into the Nexus phase – a being virtually identical to a human – known as a Replicant. Replicants were used Off-world as slave labor. Those who escaped to Earth were hunted by Blade Runner units ordered to kill any trespassing Replicant upon detection. In 2022, a Replicant attack on the Tyrell Corporation forced the company into bankruptcy and erased all records of existing Replicants. The surviving Nexus 8 models disappeared with the help of the Replicant underground. Many Replicants remained in servitude. In 2027, Aahn “Ash” Ashina rejoined the Blade Runner division to hunt down fugitive Replicants. Her superiors are unaware that her loyalties are divided. Her lover, Freysa, is a leader in the Replicant Underground. While investigating a report of a rogue Replicant, Ash discovered that a Nexus 6 Replicant, Yotun, whom she had failed to retire 12 years previously, had somehow outlived his expiration date and had become the leader of a Replicant guerrilla army. Yotun had Ash abducted before launching an all-out terrorist attack upon Los Angeles. His Replicant army destroyed the newly constructed seawall, killing the city’s political and corporate elite, and inciting all Replicants in the city to revolt against their masters, before taking over the LAPD Tower. One of The New York Times' 16 New Books to Watch for in March One of Publishers Weekly's Most Anticipated Books of the Year One of Newsweek's Most Highly Anticipated Books of The Year One of BuzzFeed's Most Anticipated Books the Year Based on the acclaimed series—a finalist for the Pulitzer Prize—an intimate account of the devastating effects of gun violence on our nation's children, and a call to action for a new way forward In 2017, seven-year-old Ava in South Carolina wrote a letter to Tyshaun, an eight-year-old boy from Washington, DC. She asked him to be her pen pal; Ava thought they could help each other. The kids had a tragic connection—both were traumatized by gun violence. Ava's best friend had been killed in a campus shooting at her elementary school, and Tyshaun's father had been shot to death outside of the boy's elementary school. Ava's and Tyshaun's stories are extraordinary, but not unique. In the past decade, 15,000 children have been killed from gunfire, though that number does not account for the kids who weren't shot and aren't considered victims but have nevertheless been irreparably harmed by gun violence. In *Children Under Fire*, John Woodrow Cox investigates the effectiveness of gun safety reforms as well as efforts to manage children's trauma in the wake of neighborhood shootings and campus massacres, from Columbine to Marjory Stoneman Douglas. Through deep reporting, Cox addresses how we can effect change now, and help children like Ava and Tyshaun. He explores their stories and more, including a couple in South Carolina whose eleven-year-old son shot himself, a Republican politician fighting for gun safety laws, and the charlatans infiltrating the school safety

business. In a moment when the country is desperate to better understand and address gun violence, Children Under Fire offers a way to do just that, weaving wrenching personal stories into a critical call for the United States to embrace practical reforms that would save thousands of young lives.

Firearms: An Illustrated History showcases over 300 firearms including pistols, revolvers, rifles, shotguns, machine-guns, and artillery, each with annotated close-up photographs and details of their origins, barrel, and caliber. It details the use of the firearms, not just in the military but for sport, hunting, and law enforcement. This comprehensive volume traces the history of firearms, highlighting "turning points" such as the rifle with its parallel spiraled grooves that could impart a spin to bullets making them fly straighter. It also showcases iconic firearms such as the Walther PPK self-loading pistol popularised in James Bond films. With information on the great gunsmiths including Beretta and Kalashnikov and a detailed guide to how guns work, Firearms: An Illustrated History is an essential purchase for everyone interested in guns and military history.
