All aspects are covered, from pathogenesis, clinical presentation, and diagnosis through to initial management, operative strategies, postoperative complications, outcomes and quality of life issues. The book is based on the experience gained at a leading U.S. institution (Harborview Medical Center, University of Washington) that treats up to 40 patients with ruptured AAA annually and is highly respected for its expertise in this medical emergency. The team at Harborview Medical Center has recently shown that the implementation of a structured protocol for the management of ruptured AAA, with emphasis on an "endovascular-first" strategy, dramatically reduces mortality and complications.
