Metals have been used in boats for thousands of years, as components of the vessel's construction, as load-bearing parts of the rigging and steering systems, and for a wide variety of domestic and service duties. Due to misunderstandings of the properties of the metals used, and in some cases to questionable design and manufacture, there have been spectacular and sometimes tragic failures of boats' metalworking. These

continue even today. This new book explains in layman's terms how a wide variety of metal alloys may best be selected, formed and manufactured to give optimum performance in the typical conditions of a sailing or powered vessel. Subjects as wide-ranging as anodes, batteries, hulls, skin fittings and rigging components are described in detail, enabling the boat owner to select the preferred material for his vessel. This practical and instructional book will be of great interest to sailors, boat owners and those involved in boat maintenance, and is fully illustrated with 90 colour photographs and 20 diagrams.

This book presents a dynamic history of the ways in which translators are trusted and distrusted. Working from this premise, the authors develop an approach to translation that speaks to historians of literature, language, culture, society, science, translation and interpreting. By examining theories of trust from sociological, philosophical, and historical studies, and with reference to interdisciplinarity, the authors outline a methodology for approaching translation history and intercultural mediation from three discrete, concurrent perspectives on trust and translation: the interpersonal, the institutional and the regime-enacted. This book will be of particular interest to students and scholars of translation studies, as well as historians working on mediation and cultural transfer.

Many single woman–married man relationships are characterized by such recognizable, even stereotypic, interactions and run such a predictable course as to constitute a genuine syndrome. Documenting the existence of this syndrome with case histories from inside and outside clinical practice, Dr. Tuch gives serious consideration to the complex dynamics involved and offers a framework to help patients struggling with their involvement in such affairs. A broader discussion of relations between men and women evolves and addresses such issues as men's dread of women; women's unique inclinations to employ masochistic adaptations in their relations with men; married couples' varied styles of dealing with their differences; the relationship of power and control to the processes of domination, submission, and the act of surrendering; and the development of the capacity to fall and remain in love.
