This highly acclaimed criminology text presents an up-to-date review and analysis of criminological theories. It incorporates current examples of deterrence research regarding crimes such as domestic violence, drunk driving, and capital punishment, and features thought-provoking discussion of the relativity of crime. The authors explore the crime problem, its context, and the causes of crime. Extensive discussion of evolving laws is included, and while the prevalence of the scientific method in the field of criminology is highlighted, the impact of ideology on explanations of crime is the cornerstone of the book. This new edition includes extensive revision of Chapter 6, now titled "Biosocial Theories of Crime," retaining much of the thoughtful historical discussion of earlier editions, but incorporating a substantial expansion of current biological research integrated with both social and biological variables. In addition, Chapter 10, "Recent Developments in Criminological Theory," offers an expanded treatment of life-course criminology.

This first Canadian edition of *Crime and Criminology: An Introduction* combines Canadian empirical research, policy, and legal issues to create a thoroughly Canadian text. Ideal for university and college students enrolled in introductory criminological theory courses, the book offers a solid foundation to criminology which unites traditional theories of crime with contemporary approaches and perspectives. By relating theory to everyday Canadian examples and events, students gain a solid grounding in the major theoretical considerations of the nature and causes of criminal behaviour. New discussion on ecology and environmental theories are unique to this edition. Updated references reflect recent research in emerging fields of criminology.

In *Criminological Theories*, the noted criminologist Ronald Akers provides thorough description, discussion, and appraisal of the leading theories of crime/delinquent behavior and law/criminal justice - the origin and history of each theory and its contemporary developments and adherents. Akers offers a clear explanation of each theory (the central concepts and hypotheses of each theory as well as critical criteria for evaluating each theory in terms of its empirical validity). Researchers and librarians, as well as general readers, will find this book a very useful tool and will applaud its clear and understandable exposition of abstract concepts.

"This is one of the best texts I have seen in a while...It makes the world of criminology less daunting and more relevant." —Allyson S. Maida, St. John's University *Introduction to Criminology, Tenth Edition*, is a comprehensive introduction to the study of criminology, focusing on the vital core areas of the field—theory, method, and criminal behavior. The methods of operation, the effects on society and policy

decisions, and the connection between theory and criminal behavior are all explained in a clear, accessible manner. Victimology, Seventh Edition, introduces students to the criminal justice system in the United States and its impact on crime victims. Authors William Doerner and Steven Lab provide a fresh look at the theoretical basis of victimology and then present the key facets of crime and its effects. They examine financial and social costs both to the individual and to the larger community. This new edition uses the theoretical foundation of victimology to establish a clear conceptual framework and reduce repetition. Emerging trends in the field receive greater emphasis in this edition, including non-adversarial resolutions that offer remediation for crime victims. Crimes like intimate-partner violence and victimization in work or school environments continue to take a toll, and the authors examine efforts to prevent these crimes as well as responses after an incident occurs. Doerner and Lab challenge students to rethink the current response to crime victims, and to develop improved approaches to this costly social issue.

Online supplements are available for both professors and students. A new chapter on explaining victimization provides context and a backdrop for examining emerging trends. A new chapter on hate crimes delves into the complexities faced by victims as they negotiate the reporting process. The main objective of the second edition of the Routledge Handbook of Critical Criminology is twofold: (1) to provide original chapters that cover contemporary critical criminological theoretical offerings generated over the past five years and (2) to provide chapters on important new substantive topics that are currently being studied and theorized by progressive criminologists. Special attention is devoted to new theoretical directions in the field, such as southern criminology, queer criminology, and green criminology. The diverse chapters cover not only cutting-edge theories, but also the variety of research methods used by leading scholars in the field and the rich data generated by their rigorous empirical work. In addition, some of the chapters suggest innovative and realistic short- and long-term policy proposals that are typically ignored by mainstream criminology. These progressive strategies address some of the most pressing social problems facing contemporary society today, which generate much pain and suffering for socially and economically disenfranchised people. The new edition of the Handbook is a major work in redefining areas within the context of international multidisciplinary critical research, and in highlighting emerging areas, such as human trafficking, Internet pornography and image-based sexual abuse. It is specifically designed to be a comprehensive resource for undergraduate and postgraduate students, researchers and policymakers.

It is presented from two perspectives: a thematic perspective that addresses ethical principles common to all components of the discipline, and an area-specific perspective that addresses the state of ethics in criminal justice in the fields of policing, corrections, and probation and parole. The seventh edition features discussion of current critical issues in criminal justice: accusations of racism, police shootings, stop and frisk policy, marijuana laws, mass incarceration, life sentences, prison privatization, the swift and certain deterrence model of probation, excessive probation fees, and the Good Lives Model in corrections. The seventh edition also offers completely revised coverage of capital punishment and the rehabilitation debate, and a discussion of how juvenile justice often fails to live up to its ideals. Finally, the book features new case studies of recent ethical dilemmas in criminal justice to enhance students' understanding of real-life ethics decision-making. Suitable for advanced undergraduates or graduate students in criminal justice programs in the US and globally, this text offers a classical view of ethical decision-making and is well-grounded in specific case examples.

"The standard text in the field, Vold's *Theoretical Criminology* is universally known by scholars in the discipline. Taking a largely historical approach, it discusses both classic and contemporary theories, presenting historical context and empirical research for each one. The book concludes with a chapter on assessing theories and their policy implications"--

This volume contains recent and cutting-edge articles from leading criminological theorists. The book is organized into ten sections, each representing the latest in the multi-disciplinary orientations representing a cross-section of contemporary criminological theory. These sections include: 1: Classical and Rational Choice; 2: Biological and Biosocial; 3: Psychological; 4: Social Learning and Neutralization; 5: Social Control; 6: Social Ecology, Sub-cultural and Cultural; 7: Anomie and Strain; 8: Conflict and Radical; 9: Feminist and Gender; 10: Critical Criminologies: Anarchist, Postmodernist, Peacemaking. The articles were selected based on their contributions to advancing the field, including ways in which the authors of each chapter understand the current theoretical tendencies of their respective approaches and how they envision the future of their theories. Because of this, the articles focus on theory rather than empirical research. Of particular note is the tendency toward integration of different perspectives, as described by editors, Henry and Lukas, in their original introduction to this volume.
