This Handbook assembles original contributions from influential authors such as Herman Daly, Paul Ekins, Marina Fischer-Kowalski, Jeroen van den Bergh, William E. Rees and Tim Jackson who have helped to define our understanding of growth and sustainability. The Handbook also presents new contributions on topics such as degrowth, the debt-based financial system, cultural change, energy return on investment, shorter working hours and employment, and innovation and technology. Explorations of these issues can deepen our understanding of whether growth is sustainable and, in turn, whether a move away from growth can be sustained. With issues such as climate change looming large, our understanding of growth and sustainability is critical. This Handbook offers a broad range of perspectives that can help the reader to decide: Growth? Sustainability? Both? Or neither?

This book is intended to be an authoritative and valuable resource for professional practitioners and researchers alike, as well as finance engineering, and computer science students who are interested in crowdfunding and other emerging fintech topics.

This book focuses on the relationship between gastronomy and urban space. It highlights the intrinsic role of eating establishments and the gastronomy industry for cities by assessing their huge impacts on urban changes and discussing some of the challenges posed by new developments. Written by authors with a background in geography, it starts by discussing theoretical aspects of studies on gastronomy in urban space to place the subject in the broader context of urban geography. Covering both changes and challenges in gastronomy in urban space, it presents a wide range of problems, which are described and analysed using various case studies from Europe and other parts of the world.

Food is a contentious and emotive issue, subject to critiques from multiple

perspectives. Alternative food movements – including the different articulations of local, food miles, seasonality, food justice, food knowledge and food sovereignty – consistently invoke themes around autonomy, sufficiency, cooperation, mutual aid, freedom, and responsibility. In this stimulating and provocative book the authors link these issues to utopias and intentional communities. Using a food utopias framework presented in the introduction, they examine food stories in three interrelated and complementary ways: utopias as critique of existing systems; utopias as engagement with experimentation of the novel, the forgotten, and the hopeful in the future of the food system; and utopias as process that recognizes the time and difficulty inherent in changing the status quo. The chapters address theoretical aspects of food utopias and also present case studies from a range of contexts and regions, including Argentina, Italy, Switzerland and USA. These focus on key issues in contemporary food studies including equity, locality, the sacred, citizenship, community and food sovereignty. Food utopias offers ways forward to imagine a creative and convivial food system.

The Routledge Handbook of EU Copyright Law provides a definitive survey of copyright harmonization in the European Union, capturing the essential and relevant issues of this relatively recent phenomenon. Over the past few years,

two themes have emerged: on the one hand, copyright policy and legislative initiatives have intensified; on the other hand, the large number of references to the Court of Justice of the European Union has substantially shaped the EU copyright framework and, with it, the copyright framework of individual EU Member States. This handbook is a detailed reference source of original contributions which analyze and critically evaluate the state of EU copyright law with a view to detecting the key trends and patterns in the evolution of EU copyright, weighing the benefits and disadvantages of such evolution. It covers a broad range of topics through clusters focused on: the history and approaches to EU copyright harmonization; harmonization in the areas of exclusive rights, exceptions and limitations, and enforcement; copyright policy and legacy of harmonization. With contributions from a selection of highly regarded and leading scholars in this field, the Routledge Handbook on European Copyright Law is an essential resource for students and scholars who are interested in the field of copyright law.

This is "naval history at its best" (Bruce Henderson)--the story of the greatest kamikaze attack of World War II Looking toward the heavens, the destroyer crew saw what seemed to be the entire Japanese Air Force assembled directly above. Hell was about to be unleashed on them in the largest single-ship kamikaze

attack of World War II. On April 16, 1945, the crewmen of the USS Laffey were battle hardened and prepared. They had engaged in combat off the Normandy coast in June 1944. They had been involved in three prior assaults of enemy positions in the Pacific-at Leyte and Lingayen in the Philippines and at Iwo Jima. They had seen kamikazes purposely crash into other destroyers and cruisers in their unit and had seen firsthand the bloody results of those crazed tactics. But nothing could have prepared the crew for this moment-an eighty-minute ordeal in which the single small ship was targeted by no fewer than twenty-two Japanese suicide aircraft. By the time the unprecedented attack on the Laffey was finished, thirty-two sailors lay dead, more than seventy were wounded, and the ship was grievously damaged. Although she lay shrouded in smoke and fire for hours, the Laffey somehow survived, and the gutted American warship limped from Okinawa's shore for home, where the ship and crew would be feted as heroes. Using scores of personal interviews with survivors, the memoirs of crew members, and the sailors' wartime correspondence, historian and author John Wukovits breathes life into the story of this nearly forgotten historic event. The US Navy described the kamikaze attack on the Laffey "as one of the great sea epics of the war." In *Hell from the Heavens*, the author makes the ordeal of the Laffey and her crew a story for the ages.

America is poised to lead the 21st Century, as it led the 20th. That will happen because the country is at a tipping point in the battle for its own renewal, a renewal that will allow America to be exceptional again. Our economy is on the move, fueled by revolutions in energy, immigration, innovation, big data and advanced manufacturing. America's energy independence has set off shockwaves. Just as important are the social transformations that are making the country ever more racially and culturally diverse, younger, a home to immigrants, and the metropolitan centers that foster a rising economic and cultural dynamism. While most other countries struggle profoundly with immigration and religious and racial differences, America's on a path to multicultural identity. Those revolutions

in the economy, society and culture and are also producing a new American majority that embraces new values and new politics. Republicans are waging a counter-revolution and that is why America looks gridlocked and why the country is turning to Democrats to take on the country's growing challenges. The economic and social transformations leave people struggling to earn enough and reach the middle class. Families are under stress. Government is corrupted by big money. The American public is demanding the country address the dark side of our progress - and reforms are starting to happen. That is why Democrats will get to lead an era of reform and renewal comparable to the progressive era that mitigated the excesses of the Industrial Revolution. In this incisive book, expert strategist Greenberg draws on years of research and polling to illuminate how America is far from being gridlocked and he articulates a powerful vision of how American politics and America can be renewed.

The Iranian nuclear crisis is a proxy arena for competing visions about the functioning of international relations. This book is the first to provide comprehensive and comparative analyses to conceptualise the interaction between 'hegemonic structures' and those actors resisting them using the Iranian nuclear case as an illustration. It analyses the foreign policies of China, Russia and Turkey towards the Iranian nuclear programme and thereby answers the question to what extent these policies are indicative of a security culture that

resists hegemony. Based on 70 elite interviews with experts and decision-makers closely involved with the Iranian nuclear file, it analyses resistance to hegemony across its ideational, material and institutional framework conditions. The cases examined show how 'compliance' on the part of China, Russia and Turkey with parts of US approaches to the Iranian nuclear conflict has been selective, and how US policy preferences in the Iran dossier have been resisted on other occasions. As such, the Iran nuclear case serves as an illustration to shed light on the contemporaneous interaction of the forces of consent and coercion in international politics. This book will be of key interest to scholars, students and practitioners in International Relations, Security Studies and Foreign Policy Analysis.

In *The Working Class: Poverty, education and alternative voices*, Ian Gilbert unites educators from across the UK and further afield to call on all those working in schools to adopt a more

enlightened and empathetic approach to supporting children in challenging circumstances. One of the most intractable problems in modern education is how to close the widening gap in attainment between the haves and the have-nots. Unfortunately, successive governments both in the UK and abroad have gone about solving it the wrong way. Independent Thinking founder Ian Gilbert's increasing frustration with educational policies that favour 'no excuses' and 'compliance', and that ignore the broader issues of poverty and inequality, is shared by many others across the sphere of education - and this widespread disaffection has led to the assembly of a diverse cast of teachers, school leaders, academics and poets who unite in this book to challenge the status quo. Their thought-provoking commentary, ideas and impassioned anecdotal insights are presented in the form of essays, think pieces and poems that draw together a wealth of research on the issue and probe and discredit the current view on what is best for children from poorer socio-economic backgrounds. Exploring themes such as inclusion, aspiration, pedagogy and opportunity, the contributions collectively lift the veil of feigned 'equality of opportunity for all' to reveal the bigger picture of poverty and to articulate the hidden truth that there is always another way. This book is not about giving you all the answers, however. The contributors are not telling teachers or schools leaders how to run their schools, their classroom or their relationships - the field is too massive, too complex, too open to debate and to discussion to propose 'off-the-shelf' solutions. Furthermore, the research referred to in this book is not presented in order to tell educators what to think, but rather to inform their own thinking and to challenge some of the dominant narratives about educating the 'feckless poor'. This book is about helping educators to ask the right questions, and its starting question is quite simple: how can we approach the education of young people from

disadvantaged backgrounds in a way that actually makes a difference for all concerned? Written for policy makers and activists as well as school leaders and educators, *The Working Class* is both a timely survey of the impact of current policies and an invaluable source of practical advice on what can be done to better support disadvantaged children in the school system. Edited by Ian Gilbert with contributions from Nina Jackson, Tim Taylor, Dr Steven Watson, Rhythmical Mike, Dr Ceri Brown, Dr Brian Male, Julia Hancock, Paul Dix, Chris Kilkenny, Daryn Egan-Simon, Paul Bateson, Sarah Pavey, Dr Matthew McFall, Jamie Thrasivoulou, Hywel Roberts, Dr Kevin Ming, Leah Stewart, (Real) David Cameron, Sir Al Aynsley-Green, Shona Crichton, Floyd Woodrow, Jonathan Lear, Dr Debra Kidd, Will Ryan, Andrew Morrish, Phil Beadle, Jaz Ampaw-Farr, Darren Chetty, Sameena Choudry, Tait Coles, Professor Terry Wrigley, Brian Walton, Dave Whitaker, Gill Kelly, Roy Leighton, Jane Hewitt, Jarlath O'Brien, Crista Hazell, Louise Riley, Mark Creasy, Martin Illingworth, Ian Loynd, David Rogers, Professor Mick Waters and Professor Paul Clarke.

In *When Did We All Become Middle Class?*, Martin Nunlee discusses how a lack of class identity gives people a false sense of their relationship to power, which has made the US population accept the myth that they live in a meritocracy. This book examines social class within the framework of psychological tendencies, everyday interactions, institutions and pervasive cultural ideas to show how Americans have shifted from general concerns of social and economic equality to fragmented interests groups. Written in a conversational style, this book is a useful tool for undergraduate courses covering social class, such as inequality, stratification, poverty, and social problems.

Bob Crow was the most high-profile and militant union leader of his generation. This biography

focuses on his leadership of the RMT union, examining and exposing a number of popular myths created about him by political opponents. Using the schema of his personal characteristics (including his public persona), his politics and the power of his members, it explains how and why he was able to punch above his weight in industrial relations and on the political stage, helping the small RMT union become as influential as many of its much larger counterparts. As RMT leader, Crow oversaw a rise in membership and promoted a more assertive and successful bargaining approach. While he failed to unite all socialists into one new party, he established himself as the leading popular critic of neo-liberalism, 'New' Labour and the age of austerity.

-Madeline Levine, author of the New York Times bestsellers *The Price of Privilege* and *Teach Your Children Well* "For parents who want to foster hearty self-reliance instead of hollow self-esteem, *How to Raise an Adult* is the right book at the right time."
-Daniel H. Pink, author of the New York Times bestsellers *Drive* and *A Whole New Mind* A provocative manifesto that exposes the harms of helicopter parenting and sets forth an alternate philosophy for raising preteens and teens to self-sufficient young adulthood In *How to Raise an Adult*, Julie Lythcott-Haims draws on research, on conversations with admissions officers, educators, and employers, and on her own insights as a mother and as a student dean to highlight the ways in which overparenting harms children, their stressed-out parents, and society at large. While empathizing with the parental hopes and, especially, fears that lead to overhelping, Lythcott-Haims offers practical alternative strategies that underline the importance of allowing children

to make their own mistakes and develop the resilience, resourcefulness, and inner determination necessary for success. Relevant to parents of toddlers as well as of twentysomethings-and of special value to parents of teens-this book is a rallying cry for those who wish to ensure that the next generation can take charge of their own lives with competence and confidence.

Why Social Security is not only sustainable but should be substantially expanded
Social Security is bankrupting us. It's outdated. It's a Ponzi scheme. It's

stealing from young people. These are some of the biggest myths and lies about one of the most successful programs in our nation's history. Three-quarters of Americans depend heavily on Social Security in their elderly years and nearly half would be living in poverty without it. But as important and popular as it is, Social Security has become a political football. A well-financed campaign—supported by conservatives, special interest groups, and even leading Democrats—has lobbied for cuts and significant “entitlement reform,” falsely proclaiming that Social Security is going broke. Policy expert Steven Hill argues that Social Security should not only be defended, it should be substantially expanded. Here he proposes how we can double the monthly benefit and how to pay for it by closing many of the tax loopholes and deductions that disproportionately favor the wealthy few. From the Trade Paperback edition.
