Recoup lost time and revenue with denials management and appeals know-how. Claim denials can sink a profit margin. And given the cost of appeals, roughly \$118 per claim, not all denials can be reworked. A practice submitting 50 claims a day at an average reimbursement rate of \$200 per claim should bring in \$10,000 in daily revenue. But if 10% of those claims are denied, and the practice can only appeal one, they lose \$800 per day—upwards of \$200K annually. Your medical claims are the lifeblood of operations. Don't compromise your financial health. Learn how to preempt denials with the Denials Management & Appeals Reference Guide. This vital resource will equip you to get ahead of payers by simplifying the leading causes of denials and showing you how to address insufficient documentation, failing to establish medical necessity, coding and billing errors, coverage stipulations, and untimely filing. Rely on AAPC to walk you through the appeal process. We'll help you establish protocols to avoid an appeals backlog and teach you how to identify and prioritize denials likely to win an appeal. What's more, you'll learn when a claim can be "reopened" to fix a problem. Collect the revenue your practice deserves with effective denials and appeals solutions: Know how to analyze your denials Defeat documentation and compliance issues for successful claims success Utilize payer policy for coverage clues Lock in revenue with face-to-face reimbursement guidance Refine efforts to avoid E/M claim denials Ace ICD-10 coding for optimum reimbursement Put an end to modifier confusion Stave off denials with CCI edits advice Navigate the appeals process like a pro And much more!

While the vast majority of providers never intend to commit fraud or file false claims, complex procedures, changing regulations, and evolving technology make it nearly impossible to avoid billing errors. For example, if you play by HIPAA's rules, a physician is a provider; however, Medicare requires that the same physician must be referred to as a supplier. Even more troubling is the need to alter claims to meet specific requirements that may conflict with national standards. Far from being a benign issue, differing guidelines can lead to false claims with financial and even criminal implications. Compliance for Coding, Billing & Reimbursement, Second Edition: A Systematic Approach to Developing a Comprehensive Program provides an organized way to deal with the complex coding, billing, and reimbursement (CBR) processes that seem to force providers to choose between being paid and being compliant. Fully revised to account for recent changes and evolving terminology, this unique and accessible resource covers statutorily based programs and contract-based relationships, as well as ways to efficiently handle those situations that do not involve formal relationships. Based on 25 years of direct client consultation and drawing on teaching techniques developed in highly successful

workshops, Duane Abbey offers a logical approach to CBR compliance. Designed to facilitate efficient reimbursements that don't run afoul of laws and regulations, this resource – Addresses the seven key elements promulgated by the OIG for any compliance program Discusses numerous types of compliance issues for all type of healthcare providers Offers access to online resources that provide continually updated information Cuts through the morass of terminology and acronyms with a comprehensive glossary Includes a CD-ROM packed with regulations and information In addition to offering salient information illustrated by case studies, Dr. Abbey provides healthcare providers and administrators, as well as consultants and attorneys, with the mindset and attitude required to meet this very real challenge with savvy, humor, and perseverance.
