The high-water mark of the muscle car era is usually credited as 1970, and for good reason; Chevrolet was now stuffing high-powered 454 engines into Chevelles. Adding a larger displacement above the still-available 396 (402) offered buyers the option to order the most powerful production car of that era. The 1970-1972 Chevelles remain the most collectible of the model to this day. Author and historian Dale McIntosh pairs with restoration expert Rick Nelson to provide this bible of authenticity on the legendary 1970, 1971, and 1972 Chevelle models.

Everything about restoring your Chevelle back to bone-stock is covered meticulously, including step-by-step instructions for chassis and interior restoration. Understanding date variances on parts applicable to the build date of your Chevelle is vital to a factory-correct restoration, and including them in this book provides a depth of coverage on these cars that is unequaled. Restoring a 1970-1972 Chevelle back to concours correct takes a certain amount of expertise. Thankfully, Rick and Dale have done a lot of the heavy lifting on the research side. With this authenticity guide, you can be confident that you have all the correct components and options accurately and expertly represented for your stock restoration. These fine details put the Chevelle Restoration and Authenticity Guide 1970-1972 a cut above the rest.

This book covers the vast majority of Powerstroke Diesel engines on the road, and gives you the full story on their design. Since 1991, the popular and highly modifiable Ford 4.6-liter has become a modern-day V-8 phenomenon, powering everything from Ford Mustangs to hand-built hot rods and the 5.4-liter has powered trucks, SUVs, the Shelby GT500, and more. The wildly popular 4.6-liter has created an industry unto itself with a huge supply of aftermarket high-performance parts, machine services, and accessories. Its design delivers exceptional potential, flexibility, and reliability. The 4.6-liter can be built to produce 300 hp up to 2,000 hp, and in turn, it has become a favorite among rebuilders, racers, and high-performance enthusiasts. 4.6-/5.4-Liter Ford Engines: How to Rebuild expertly guides you through each step of rebuilding a 4.6-liter as well as a 5.4-liter engine, providing essential information and insightful detail. This volume delivers the complete nuts-and-bolts rebuild story, so the enthusiast can professionally rebuild an engine at home and achieve the desired performance goals. In addition, it contains a retrospective of the engine family, essential identification information, and component differences between engines made at Romeo and Windsor factories for identifying your engine and selecting the right parts. It also covers how to properly plan a 4.6-/5.4-liter build-up and choose the best equipment for your engine's particular application. As with all Workbench Series books, this book is packed with detailed photos and comprehensive captions, where you are guided step by step through the disassembly, machine work, assembly, start-up, break-in, and tuning procedures for all iterations of the 4.6-/5.4-liter engines, including 2-valve and 3-valve SOHC and the 4-valve DOHC versions. It also includes an easy-to-reference spec chart and suppliers guide so you find the right equipment for your particular build up.

"I watch you all the time and you're... like my guide to this because, frankly, you really have a good take on it. You know how important it is." - President Donald Trump on Dr. Marc Siegel People are afraid. COVID-19 has upended our lives as it poses new medical dangers, economic suffering and grave uncertainty about the world around us. The collateral damage is enormous, but politics invade perception. There are so many unknowns. Does a treatment work? Is a vaccine coming? How likely are you to catch COVID and how can you best protect yourself and your family? What are the real risks and what is hysteria? Where are our fear leaders? What are their agendas? From Fox News Medical Analyst and the author of False Alarm (Wiley, 2008) comes COVID and the Politics of Fear by Marc Siegel, M.D. This shocking expose of the facts as the media covers the national pandemic news and spread of the invisible virus, reinforces the notion that we must arm ourselves against fear tactics that limit our abilities to safely make decisions and protect our families in a world of uncertainty. Life for citizens of the developed world before the pandemic was safer, easier, and healthier than for any other people in history thanks to modern medicine, science, technology, and intelligence- but COVID-19 has stolen that security and our nations peace of mind. Now there is a pandemic virus, as well as a crippling epidemic of fear sweeping America. Why? The answer, according to nationally renowned health commentator Dr. Marc Siegel, is that we already lived in an artificially created culture of fear that was just waiting to be unleashed. In COVID and the Politics of Fear, Siegel identifies three major catalysts of the culture of fear-- government, the media, and our own psyche. With fascinating, blow-by-blow analyses of the most sensational false alarms of the past few years, compounded now by the worst contagion of our lifetimes, he shows how fearmongers manipulate our most primitive instincts--often without our even realizing it.

COVID shows us how to look behind the hype and hysteria, inoculate ourselves against these crippling fear tactics, and develop the emotional and intellectual skills needed to take back our lives even as we battle the pandemic itself.
