

## Intermediate Algebra Lial Hornsby McGinnis

Is there anything more beautiful than an “A” in Algebra? Not to the Lial team! Marge Lial, John Hornsby, and Terry McGinnis write their textbooks and accompanying resources with one goal in mind: giving students all the tools they need to achieve success. ¿ With this revision, the Lial team has further refined the presentation and exercises throughout the text. They offer several exciting new resources for students that will provide extra help when needed, regardless of the learning environment (classroom, lab, hybrid, online, etc)—new study skills activities in the text, an expanded video program available in MyMathLab and on the Video Resources on DVD, and more! ¿ This ISBN is for the textbook only. MyMathLab access kit, Video Resources on DVD, and other resources are available separately.

This prealgebra text helps prepare students for higher-level math courses by integrating basic algebraic concepts early and continuing to revisit those concepts throughout the text. Student comprehension is aided by the friendly composition and current, relevant applications. Student motivation is increased by immersion in genuine and realistic mathematical situations. This prealgebra text, as a part of the Lial/Hornsby/Miller developmental worktext series, focuses on students by helping them reduce their confusion of symbols for subtraction with negative numbers. The text also clearly demonstrates why the product of two negative numbers is a positive number and explains why letters instead of numbers are used in algebra. This text helps students solve applied problems and increases their proficiency in solving fraction and percent problems.
