

Interpersonal Communication

The Third Edition of the Handbook of Interpersonal Communication includes eight new chapters and eleven revised from the second edition. Following an introductory chapter, the volume is organized into four parts covering perspectives on inquiry in interpersonal communication, fundamental units of interpersonal communication, processes and functions, and interpersonal contexts. Features include:

- Each chapter reviews and updates research in its respective area
- Part II examines methodological issues in the field
- Includes articles by top scholars in the field of Interpersonal Communication

This book discusses how people go about achieving their social goals through human symbolic interaction. The editors' collective presumption is that there are more or less typical ways that people attempt to obtain desired outcomes -- be they persuasive, informative, conflictive, or the like -- through communication. Representing a first summary of research done by scholars, primarily in the communication discipline, this volume seeks to identify and understand how it is that people achieve what they want through social interaction. Under the very broad label of strategies, this research has sought to:

- * identify critical social goals such as gaining compliance, generating affinity, resolving social conflict, and offering information;
- * specify, for each goal, the ways, or strategies, by which people can go about achieving these goals;
- * determine predictors of strategy selection -- that is, why does a person opt for one strategy over

others to obtain the desired end? The research also reflects the attention the field of communication has given to strategy issues in the past 15 years. The chapters describe research on the ways in which people achieve different goals, and summarize existing research and theory on the attainment of social goals. Readers will gain insight into many of the issues that exist regardless of the strategy being discussed. Thus, this volume may not include chapters on topics such as ways people elicit or offer disclosure, ways people demonstrate anger, or ways people create guilt, but the issues that appear consistently throughout the various chapters should apply equally to these. Finally, the essays in this volume provide not only a summary of what has been accomplished to date, but also an initial theoretic map for future research concerning strategic interpersonal communication.

Our interpretations of the world we live in, and the people and institutions that comprise it, are acquired through complex interactions among what we believe to be true, what the world is, and/or what others think it is.

Understanding those complex interactions is one of the most important goals of the social sciences. Of the many disciplines that have contributed to that understanding, two take center stage in this book -- psychology and communication. This volume's purpose is to reconnect the partially isolated environments of social psychology and communication. To do so, it utilizes four building blocks: * the cognitive foundations of interpersonal communication as it might be studied from a social psychological perspective * insiders' views of interpersonal communication from a cognitive psychological standpoint * insiders' approaches to interpersonal communication from an AI perspective * a critique of the cognitive enterprise that reflects the strong philosophical grounding of communication. Overall, the chapters typify some of the most interesting cognitive work done in the study of interpersonal communication. As such, the book should promote productive dialogue

across disciplinary boundaries and stimulate further work within the field of interpersonal communication.
