Penulis : Iin Patimah, S.Kep., M.Kep. Ukuran : 14,5 cm x 21 cm Tebal : 111 Halaman ISBN : 978-623-79439-2-1 blurb : Buku yang berjudul “Konsep Relaksasi Zikir Dan Implikasinya Terhadap Penderita Gagal Ginjal Kronis: Kajian Teoritik Dan Praktik” sebagai pengembangan dari penelitian penulis sebelumnya. Gagal Ginjal Kronis (GGK) merupakan gangguan fungsi ginjal yang bersifat progressive dan irreversible yang mengakibatkan tubuh gagal untuk mempertahankan metabolisme dan keseimbangan cairan dan elektrolit tubuh yang normal. Oleh karena itu, diperlukan upaya untuk meminimalkan resiko lebih lanjut salah satunya dengan tindakan hemodialisa. Tindakan hemodialisa merupakan salah satu terapi pengganti ginjal buatan yang bertujuan membuang sisa-sisa produk metabolisme tubuh dan koreksi gangguan keseimbangan cairan dan elektrolit. Kemudian, CBT, logotherapy, SEFT serta distraksi merupakan teknik yang terbukti efektif untuk menurunkan kecemasan, namun untuk melakukan hal tersebut diperlukan pelatihan serta fasilitator yang terlatih agar terapi dapat dilakukan secara efektif. Teknik relaksasi bertujuan untuk membuat kondisi tubuh menjadi rileks. Tubuh dalam kondisi rileks dapat mengaktifkan kerja saraf parasimpatis dan menekan kerja saraf simpatis. Salah satu

The Minnesota Multiphasic Personality Inventory Revised (MMPI-2) is the most widely researched and broadly used personality assessment instrument in psychology. This guide was written for the novice test user, nonpsychology professional, and student of clinical and personality assessment, assuming no testing or clinical background. Offering an interpretive strategy that readers can easily follow to integrate hypotheses about clients, Butcher investigates the developmental rationale and the broad personality and symptomatic measures of the instrument. Generously illustrated with case material, the various measures of the MMPI-2 are clearly explained. Also included is a useful strategy for writing MMPI-2 based personality descriptions.

Now in two colours throughout, this new edition of *LectureNotes: Neurology* contains the core neurological information required, whichever branch of clinical medicine you choose. Reflecting current clinical practice, the latest advances in the diagnosis and management of neurological diseases are concisely covered. The book is divided into two parts. The *Neurological Approach* looks at neurological history taking. The *neurological examination* is then discussed in detail – consciousness, cognitive function, vision and other cranial nerves, motor

function, sensation and autonomic function. In part two, Neurological Disorders, the common neurological conditions are described, along with neurological emergencies and neuro-rehabilitation. Featuring a self-assessment section, and with clinical scenario and key points boxes throughout, Lecture Notes: Neurology is ideal for medical students, junior doctors, and specialist nurses who want a concise introduction to clinical neurology that can be used as a core text or as a revision resource.

Principles of Addiction provides a solid understanding of the definitional and diagnostic differences between use, abuse, and disorder. It describes in great detail the characteristics of these syndromes and various etiological models. The book's three main sections examine the nature of addiction, including epidemiology, symptoms, and course; alcohol and drug use among adolescents and college students; and detailed descriptions of a wide variety of addictive behaviors and disorders, encompassing not only drugs and alcohol, but caffeine, food, gambling, exercise, sex, work, social networking, and many other areas. This volume is especially important in providing a basic introduction to the field as well as an in-depth review of our current understanding of the nature and process of addictive behaviors. Principles of Addiction is one of three volumes comprising the 2,500-page series, Comprehensive Addictive Behaviors and Disorders. This

This is the first textbook to focus on Aortopathy, a new clinical concept for a form of vasculopathy. The first section of the book starts from discussing general concept and history of Aortopathy, and then deals with its pathophysiology, manifestation, intrinsic factor, clinical implication, management and prevention. The second part closely looks at various disorders of the Aortopathy such as bicuspid aortic valve and coarctation of aorta. The book editors have published a lot of works on the topic and have been collecting relating data in the field of congenital heart disease for the past 20 years, thus present the book with confidence. The topic - an association of aortic pathophysiological abnormality, aortic dilation and aorto-left ventricular interaction - is getting more and more

Smeltzer & Bare,,s Textbook of Medical-Surgical Nursing is designed to help nurses prepare for their responsibilities in an increasingly complex and technologically challenging healthcare environment. By integrating and balancing the art and science of adult medical-surgical nursing, its strong focus on physiology, pathophysiology and psychosocial and cultural concepts as they relate to nursing care is supported by diverse concepts such as nutrition, pharmacology, and gerontology. The fourth edition covers the core concepts, procedures, and skills of medical-surgical nursing, emphasizing patient-centered care, as it reinforces and consolidates classroom learning. Units 1-3 introduce the theory of medical-surgica nursing, issues and trends in the healthcare system, and the role of the nurse. Organized by body system, Units 4-16 cover adult health issues systematically: the first chapter in each unit discusses the normal anatomy and physiology of the body system; subsequent chapters cover management of specific disorders, their etiology, pathophysiology, clinical manifestations, assessment and findings, and leadership and management. A wide-range of free online resources round out the learning experience. Key

ABSTRACT: Helping patients achieve an optimal quality of life through patient-centered treatment planning should be the ultimate goal of all oral health care providers. However, this issue extends beyond the realm of the individual clinician's office. This text presents quality-of-life research from various fields, including psychology, public health, and general health care; discusses how a patient-centered approach can be applied to basic oral and craniofacial research, clinical dental practice, community dental health issues, and dental education; and addresses how oral health-related quality of life relates to treating and understanding different patient populations, such as children with special needs, medically compromised patients, patients with oral cancer, and patients with chronic facial pain. Also discussed is how factors such as race/ethnicity, gender,

and age can affect oral health-related quality-of-life concerns and treatment strategies. Finally, the book offers an outlook on the role that oral health-related quality of life will play in future research and dental education.

This text fills a void in advanced practice nursing literature by providing a foundation for integrating psychopharmacology, psychotherapy and Complementary and Alternative Medicine (CAM) into advanced practice nursing. The text includes coverage of neurobiology, theory and research evidence related to psychopharmacology, psychotherapy and complementary and alternative medicine interventions. This text addresses the issue of defining and integrating relationship-based approaches with psychopharmacological and CAM approaches by providing beautifully-designed and easy-to-follow decision trees for initiating specific treatment and discussion of specific continuing care issues. This text has a lifespan focus and includes pediatric pointers and aging alerts.

Throughout the postwar history of Indonesia, the military have played a key role in the politics of the country and in imposing unity on a fragmentary state. The collapse of the authoritarian New Order government of President Suharto weakened the state and the armed forces briefly lost their grip on control of the archipelago. However, under President Megawati, the military has again begun to assert itself, and re-impose its heavy hand on control of the state, most notably in the fracturing outer provinces. Based on extensive original research, this book examines the role of the military in Indonesian politics. It looks at the role of the military historically, examines the different ways it is involved in politics, and considers how the role of the military might develop in what is still an uncertain future.

Namun demikian, terkadang orang tua tak menyadari apakah karakteristik psikologis anaknya sesuai dengan gaya pengasuhan yang mereka terapkan. Ketidaktahuan ini pada gilirannya berakibat pada kelalaian pengasuhan (salah asuh) dan berbagai penyimpangan (behavioral and psychological deviations). mem-bully teman sekolahnya, bahkan ada juga anak polisi yang justru terlibat tawuran pelajar. Menurut banyak psikolog, orang tua luput/keliru dalam memahami situasi psikologis anak dan menyelenggarakan pendidikan keluarga yang sesuai. Sebab, masing-masing anak ialah individu yang unik. Mereka tak bisa saling disamakan karena perkembangannya dipengaruhi nature (sifat alamiah; genetik) dan nurture (sifat yang terbentuk dari interaksi sosial). Persoalan itu semakin rumit lebih-lebih karena orang tua tak menemukan cara mengidentifikasi karakter anak, prosedur mengukur kesehatan mental anak, bagaimana mengatasi depresi pada anak, dan bagaimana strategi mendidik anak agar psikisnya sehat. Buku ini berusaha menyajikan solusi atas problematika tersebut secara akademis; merujuk teori-teori psikologi, hasil penelitian, dan pengalaman empiris dari berbagai riset psikologis di Indonesia. Sebagai bahan kajian yang riil, buku ini juga mengangkat contoh-contoh kasus pola pengasuhan pada keluarga utuh, single parent, dan broken home.

Four years have passed since the last edition (3rd) of this book was published. In the intervening years, several reviews of this book have provided highly encouraging remarks about the value of this book in transmitting information on classification and treatment of psychiatric disorders to the audience. We are proposing to revise all chapters with an eye on accuracy and ease of use, and this is an especially timely endeavor with the upcoming publication of the Diagnostic and Statistical Manual V. All the appropriate new information on biology, etiology, diagnosis and treatment of psychiatric disorders will be added to the current proposed edition. It is our goal to recruit the same authors (if possible) who contributed to the previous edition. While all chapters will be updated (see TOC), those marked by asterisks will be the most likely to undergo more revision. Psychiatry has emerged as a burgeoning scientific field with major advances in etiology and treatment of several disorders. Just as there was excitement in the anatomic advances that took place a hundred years ago when Emil Kraepelin and his collaborators took on the enormous task of classification of psychiatric disorders based on rational scientific thinking, new advances in

genetics, biochemistry, neuroanatomy and pharmacotherapy of mental disorders have brought us even closer to a better understanding of complex disorders like schizophrenia, bipolar disorder, depression and even autism. The major goal of the previous edition of this classic book was to update the busy clinician, psychiatric resident and medical student with the most up-to-date information on etiology, diagnosis and treatment of psychiatric disorders. This goal remains the focus of the fourth edition of this book. In this updated and expanded edition, the reader will be provided with the most contemporary information and literature supported by a close survey of the field. This new edition of this classic title, with its focus on biologic and medical aspects of psychiatry, will continue to be of significant help to all interested in the scientific practice of psychiatry.
