The Northern home-front during the Civil War was far from tranquil. Fierce political debates set communities on edge, spurred secret plots against the Union, and triggered widespread violence. At the heart of all this turmoil stood the anti-war Democrats, nicknamed "Copperheads." Now, Jennifer L. Weber offers the first full-length portrait of this powerful faction to appear in almost half a century. Weber reveals how the Copperheads came perilously close to defeating Lincoln and ending the war in the South's favor. Indeed, by the summer of 1864, they had grown so strong that Lincoln himself thought his defeat was "exceedingly likely." Passionate defenders of civil liberties and states' rights--and often virulent racists--the Copperheads deplored Lincoln's suspension of habeas corpus, his liberal interpretation of the Constitution, and, most vehemently, his moves toward emancipation. Weber reveals how the battle over these issues grew so heated that Northerners feared their neighbors would destroy their livestock, burn their homes, even kill them. And she illuminates the role of Union soldiers, who, furious at Copperhead attacks on the war effort, moved firmly behind Lincoln. The soldiers' support for the embattled president kept him alive politically in his darkest times, and their victories on the battlefield secured his re-election. Packed with sharp observation and fresh interpretations, Copperheads is a gripping account of the fierce dissent that Lincoln called "the fire in the rear."

Palliative care is the duty of every neurologist: however, to date, this has not been a standard feature of neurological practice or training. This book helps define a new field, namely palliative care in neurology. It brings together all necessary information for neurologists caring for a patient with advance disease.

Provides transcripts from and assessments of the first season of the Breaking Banks radio show, examining the massive upheaval facing the banking industry today involving consumer shifts, technological changes and increased government scrutiny.

Collective bargaining and workers' voice are often discussed in the past rather than in the future tense, but can they play a role in the context of a rapidly changing world of work? This report provides a comprehensive assessment of the functioning of collective bargaining systems and workers' voice arrangements across OECD countries, and new insights on their effect on labour market performance today.

In the almost 15 years since Our Enduring Values was published, there has been a sea change in the way much of the world thinks about and uses libraries. Young librarians and seasoned LIS professionals alike are experiencing increasing

## Acces PDF Ladozione Una Risorsa Inaspettata Dallesperienza Dei Gruppi Strumenti Per Il Sostegno Delle Famiglie

pressure to adjust to new economic, societal, and technological demands amidst the often-dire rhetoric currently surrounding the future of our institutions. In this stirring manifesto, public intellectual, librarian, and philosopher Gorman addresses head on the “existential panic” among library professionals caused by the radical shift in how libraries are viewed. He reconnects readers with the core values that continue to inspire generations of library professionals and scholars—while making the case that these values are doubly crucial to hold on to in the brave new shifting world of librarianship. Destined to become another classic of library literature, this book explores such contemporary issues as The growing emphasis of the library as a cultural institution, placing libraries within their cultural context as gathering places for learning, access to information, and communityThe impact of technological innovations on core values such as access and stewardshipLibrary places and spaces of the futureHow the mass digitization of books, archives, and other materials affects the purpose and function of librariesIntellectual freedom and privacy in the era of the PATRIOT Act, Wikileaks, and Edward SnowdenThe role of libraries as both champions and facilitators of social justiceInspirational yet clear-sighted, Gorman emphatically reaffirms the importance of libraries and librarians while proposing a path for future survival and growth.

"Boris, a swamp creature who was adopted by human parents, starts to question where he truly belongs"--

The problem of "lost space," or the inadequate use of space, afflicts most urban centers today. The automobile, the effects of the Modern Movement in architectural design, urban-renewal and zoning policies, the dominance of private over public interests, as well as changes in land use in the inner city have resulted in the loss of values and meanings that were traditionally associated with urban open space. This text offers a comprehensive and systematic examination of the crisis of the contemporary city and the means by which this crisis can be addressed. Finding Lost Space traces leading urban spatial design theories that have emerged over the past eighty years: the principles of Sitte and Howard; the impact of and reactions to the Functionalist movement; and designs developed by Team 10, Robert Venturi, the Krier brothers, and Fumihiko Maki, to name a few. In addition to discussions of historic precedents, contemporary approaches to urban spatial design are explored. Detailed case studies of Boston, Massachusetts; Washington, D.C.; Goteborg, Sweden; and the Byker area of Newcastle, England demonstrate the need for an integrated design approach--one that considers figure-ground, linkage, and place theories of urban spatial design. These theories and their individual strengths and weaknesses are defined and applied in the case studies, demonstrating how well they operate in different contexts. This text will prove invaluable for students and professionals in the fields of architecture, landscape architecture, and city planning. Finding Lost Space is going to be a primary text for the urban designers of the next generation. It is the first book in the field to absorb the lessons of the postmodern reaction, including the work of the Krier brothers and many

others, and to integrate these into a coherent theory and set of design guidelines. Without polemics, Roger Trancik addresses the biggest issue in architecture and urbanism today: how can we regain in our shattered cities a public realm that is made of firmly shaped, coherently linked, humanly meaningful urban spaces? Robert Campbell, AIA Architect and architecture critic Boston Globe

Call it “Zen and the Art of Farming” or a “Little Green Book,” Masanobu Fukuoka’s manifesto about farming, eating, and the limits of human knowledge presents a radical challenge to the global systems we rely on for our food. At the same time, it is a spiritual memoir of a man whose innovative system of cultivating the earth reflects a deep faith in the wholeness and balance of the natural world. As Wendell Berry writes in his preface, the book “is valuable to us because it is at once practical and philosophical. It is an inspiring, necessary book about agriculture because it is not just about agriculture.” Trained as a scientist, Fukuoka rejected both modern agribusiness and centuries of agricultural practice, deciding instead that the best forms of cultivation mirror nature’s own laws. Over the next three decades he perfected his so-called “do-nothing” technique: commonsense, sustainable practices that all but eliminate the use of pesticides, fertilizer, tillage, and perhaps most significantly, wasteful effort. Whether you’re a guerrilla gardener or a kitchen gardener, dedicated to slow food or simply looking to live a healthier life, you will find something here—you may even be moved to start a revolution of your own.

"Thought provoking and fresh - this book challenges how we think about economics." Gillian Tett, Financial Times For further information about recent publicity events and media coverage for Rethinking Capitalism please visit <http://marianamazucato.com/rethinking-capitalism/> Western capitalism is in crisis. For decades investment has been falling, living standards have stagnated or declined, and inequality has risen dramatically. Economic policy has neither reformed the financial system nor restored stable growth. Climate change meanwhile poses increasing risks to future prosperity. In this book some of the world’s leading economists propose new ways of thinking about capitalism. In clear and compelling prose, each chapter shows how today’s deep economic problems reflect the inadequacies of orthodox economic theory and the failure of policies informed by it. The chapters examine a range of contemporary economic issues, including fiscal and monetary policy, financial markets and business behaviour, inequality and privatisation, and innovation and environmental change. The authors set out alternative economic approaches which better explain how capitalism works, why it often doesn’t, and how it can be made more innovative, inclusive and sustainable. Outlining a series of far-reaching policy reforms, Rethinking Capitalism offers a powerful challenge to mainstream economic debate, and new ideas to transform it.

First published in 1992. Unavailable for many years this is a reissue of George Kelly's classic work. It is the bible of

personal construct psychology written by its founder. The second volume presents the implications for clinical practice. This is the first volume in a new series on 'Great Minds in Regional Science,' which seeks to present a contemporary view on the scientific relevance of the work done by great thinkers in regional science. It presents, among others, Walter Isard, Martin Beckmann and Gunnar Myrdal. Each contribution combines factual biographical information, a description of their major contributions, and a discussion of the broader context of the work, as well as an assessment of its current relevance, scientific recognition and policy impact. The book attempts to fill a gap in our knowledge, and to respond to the growing interest in the formation and development of the field of regional science and its key influential figures. This book proposes an integrated model of treatment for Personality Disorders (PDs) that goes beyond outdated categorical diagnoses, aiming to treat the general factors underlying the pathology of personality. The authors emphasize the development of metacognitive functions and the integration of procedures and techniques of different psychotherapies. The book addresses the treatment of complex cases that present with multiform psychopathological features, outlining clinical interventions that focus on structures of personal meaning, metacognition and interpersonal processes. In addition, this book: Provides an overview of pre-treatment phase procedures such as assessment interviews Explains the Metacognitive Interpersonal Therapy (MIT) approach and summarizes MIT clinical guidelines Outlines pharmacological treatment for patients with PDs Includes checklists and other useful resources for therapists evaluating their adherence to the treatment method Complex Cases of Personality Disorders: Metacognitive and Interpersonal Therapy is both an insightful reexamining of the theoretical underpinnings of personality disorder treatment and a practical resource for clinicians.

An Indian woman recounts her 1960s adoption by a Catalan family and her 2003 visit to her home country to uncover her native roots, a personal journey during which she discovered her rural home town and a sister she never knew. 30,000 first printing.

In this new collection of essays, Andrew Feenberg argues that conflicts over the design and organization of the technical systems that structure our society shape deep choices for the future. A pioneer in the philosophy of technology, Feenberg demonstrates the continuing vitality of the critical theory of the Frankfurt School. He calls into question the anti-technological stance commonly associated with its theoretical legacy and argues that technology contains potentialities that could be developed as the basis for an alternative form of modern society. Feenberg's critical reflections on the ideas of Jürgen Habermas, Herbert Marcuse, Jean-François Lyotard, and Kitaro Nishida shed new light on the philosophical study of technology and modernity. He contests the prevalent conception of technology as an unstoppable force responsive only to its own internal dynamic and politicizes the discussion of its social and cultural construction. This

argument is substantiated in a series of compelling and well-grounded case studies. Through his exploration of science fiction and film, AIDS research, the French experience with the "information superhighway," and the Japanese reception of Western values, he demonstrates how technology, when subjected to public pressure and debate, can incorporate ethical and aesthetic values.

This revised edition of *Bookmarks* reflects the end of the coordination of the youth campaign by the Council Europe. The campaign may be officially over, but the education and awareness-raising to counter hate speech and promote human rights values remain an urgent task for young people of all ages. The work of the Council of Europe for democracy is strongly based on education: education in schools, and education as a lifelong learning process of practising democracy, such as in non-formal learning activities. Human rights education and education for democratic citizenship form an integral part of what we have to secure to make democracy sustainable. Hate speech is one of the most worrying forms of racism and discrimination prevailing across Europe and amplified by the Internet and social media. Hate speech online is the visible tip of the iceberg of intolerance and ethnocentrism. Young people are directly concerned as agents and victims of online abuse of human rights; Europe needs young people to care and look after human rights, the life insurance for democracy. *Bookmarks* was originally published to support the No Hate Speech Movement youth campaign of the Council of Europe for human rights online. *Bookmarks* is useful for educators wanting to address hate speech online from a human rights perspective, both inside and outside the formal education system. The manual is designed for working with learners aged 13 to 18 but the activities can be adapted to other age ranges.

In this innovative book Fabio Folgheraiter presents a systematic introduction to networking and reflexive practice in social work. The text explores how the interested parties in social care can acquire a shared power in care planning and decision making and that when this networking occurs, the efficacy of caring initiatives increases.

Patient engagement should be envisaged as a key priority today to innovate healthcare services delivery and to make it more effective and sustainable. The experience of engagement is a key qualifier of the exchange between the demand (i.e. citizens/patients) and the supply process of healthcare services. To understand and detect the strategic levers that sustain a good quality of patients' engagement may thus allow not only to improve clinical outcomes, but also to increase patients' satisfaction and to reduce the organizational costs of the delivery of services. By assuming a relational marketing perspective, the book offers practical insights about the developmental process of patients' engagement, by suggesting concrete tools for assessing the levels of patients' engagement and strategies to sustain it. Crucial resources to implement these strategies are also the new technologies that should be (1) implemented according to precise guidelines and (2) designed according to a user-centered design process. Furthermore, the book describes possible

fields of patients' engagement application by describing the best practices and experiences matured in different fields 'I WANT TO INSPIRE PEOPLE. I WANT SOMEONE TO LOOK AT ME AND SAY: "BECAUSE OF YOU I DIDN'T GIVE UP".' Goals is a very personal and deeply-moving collection of life-affirming and inspirational real-life stories from which Chelsea and Italy football legend Gianluca Vialli has drawn great strength and resolve during his battle with pancreatic cancer. The stories and the individuals involved have been selected by Vialli because they have offered him comfort and inspiration at the time of his greatest challenge, and he feels that they can do the same for many of us, whatever it might be that we are facing. The result is a beautifully-written and touching narrative which is by turns vital and poignant, spine-tingling and heart-rending. The very last story in Goals is Vialli's own, bravely and movingly chronicling his battle with this cruel illness.

Sometimes there's more to family than meets the eye.... Animals of all kinds take center stage in this unique exploration of a very unusual family. An older brother is strong and respected, just like an elephant. A mother is stately and beautiful, but she prefers not to stand out—a tall feat for a giraffe! How are animals like humans, and humans like animals? Readers of all ages will delight in Laurent Moreau's richly rendered, thought-provoking illustrations, and then they will entertain perhaps the most wildly illuminating question of all: What makes you special? Plus, this is the fixed format version, which will look almost identical to the print version. Additionally for devices that support audio, this ebook includes a read-along setting.

Dr. Burke exposes the obstacles in the way of post-abortion healing, reviews the full range and depth of post-abortion adjustment problems and how to resolve them.

The need for heirs in any traditional society is a compelling one. In traditional China, where inheritance and notions of filiality depended on the production of progeny, the need was nearly absolute. As Ann Waltner makes clear in this broadly researched study of adoption in the late Ming and early Ch'ing periods, the getting of an heir was a complex, even paradoxical undertaking. Although adoption involving persons of the same surname was the only arrangement ritually and legally sanctioned in Chinese society, adoption of persons of a different surname was a relatively common practice. Using medical and ritual texts, legal codes, local gazetteers, biography, and fiction, Waltner examines the multiple dimensions of the practice of adoption and identifies not only the dominant ideology prohibiting adoption across surname lines, but also a parallel discourse justifying the practice.

Work is constantly reshaped by technological progress. New ways of production are adopted, markets expand, and societies evolve. But some changes provoke more attention than others, in part due to the vast uncertainty involved in making predictions about the future. The 2019 World Development Report will study how the nature of work is changing as a result of advances in technology today. Technological

## Acces PDF Ladozione Una Risorsa Inaspettata Dallesperienza Dei Gruppi Strumenti Per Il Sostegno Delle Famiglie

progress disrupts existing systems. A new social contract is needed to smooth the transition and guard against rising inequality. Significant investments in human capital throughout a person's lifecycle are vital to this effort. If workers are to stay competitive against machines they need to train or retool existing skills. A social protection system that includes a minimum basic level of protection for workers and citizens can complement new forms of employment. Improved private sector policies to encourage startup activity and competition can help countries compete in the digital age. Governments also need to ensure that firms pay their fair share of taxes, in part to fund this new social contract. The 2019 World Development Report presents an analysis of these issues based upon the available evidence.

Thinking About Children collects thirty-one papers, of which twenty-eight have never previously been published. As might be expected, they range widely in tone and content from concise clinical observations to more general meditations including the landmark paper "Towards an objective study of human nature". Of particular interest are sections on autism and psychosomatics, where the author's thinking can be seen to foreshadow more recent developments, such as Frances Tustin's work on autism. Together with a substantial introduction by the editors, this book indispensable for those acquainted with the author's work, and an ideal introduction for those who have not yet encountered the extraordinary clarity and depth of his thought.

"A book from the Program on Nonviolent Sanctions in Conflict and Defense, Center for International Affairs, Harvard University and the Albert Einstein Institution for Nonviolent Alternatives in Conflict and Defense"--Page facing title page Includes index. Bibliography: p. [215]-226. Revered for pioneering the law and literature movement, The Legal Imagination celebrates its 45th year of inspiring students and readers around the world. In this special Anniversary Edition, introduced with a new Foreword by author James Boyd White, the original, unabridged text has been carefully reproduced to challenge a new generation of readers to understand the language of the law through the prism of literature. The topics covered in The Legal Imagination are as eclectic as its readership, juxtaposing examples of legal writing alongside poetry, philosophy, and literary criticism. White frames thought-provoking discussions on topics that intersect both legal and non-legal discourse, like reading Edmund Burke's rhetoric alongside the homicidal persuasion of Lady Macbeth, or comparing elegiac poetry with the terminology of a final will and testament. White asks his readers not only to analyze legal and non-legal literature, but to consider the power of language, and how it can be reimagined. Excerpted authors include Fyodor Dostoevsky, Benjamin Cardozo, Albert Camus, Claude Lvi-Strauss, and Emily Dickinson. First published in 1973, The Legal Imagination broke convention and urged students to understand the law beyond memorization, encouraging readers "to trust and follow their own curiosity" and to come to terms with the nature and potential limits of legal language. It should be read not only by people of the law, but by anyone with an interest in language and power, and in writing as a way of thinking and creating. The book has a timeless quality. James Boyd White writes in the Foreword, "I think in fact that it may be of wider relevance now than when it was first published, for its central concern is with integrity--integrity of the law, of language, of the individual person--at a time when integrity itself sometimes seems to be threatened as a value."

The popular first edition was one of the first books available on development and implementation of open source software using CVS. The second edition explains how CVS affects the architecture and design of applications, and has been enhanced with more value-added material covering strategies, third-party tools, scalability, client access limits, and overall server administration for CVS.

Written for Higher Education teaching and learning professionals, Learning with Digital Games provides an accessible, straightforward introduction to the field of computer game-based learning. Up to date with current trends and the changing learning needs of today's students, this text offers friendly guidance, and is unique in its focus on post-school education and its pragmatic view of the use of computer

## Acces PDF Ladozione Una Risorsa Inaspettata Dallesperienza Dei Gruppi Strumenti Per Il Sostegno Delle Famiglie

games with adults. Learning with Digital Games enables readers to quickly grasp practical and technological concepts, using examples that can easily be applied to their own teaching. The book assumes no prior technical knowledge but guides the reader step-by-step through the theoretical, practical and technical considerations of using digital games for learning. Activities throughout guide the reader through the process of designing a game for their own practice, and the book also offers: A toolkit of guidelines, templates and checklists. Concrete examples of different types of game-based learning using six case studies. Examples of games that show active and experiential learning Practical examples of educational game design and development. This professional guide upholds the sound reputation of the Open and Flexible Learning series, is grounded in theory and closely links examples from practice. Higher Education academics, e-learning practitioners, developers and training professionals at all technical skill levels and experience will find this text is the perfect resource for explaining "how to" integrate computer games into their teaching practice. A companion website is available and provides up-to-date technological information, additional resources and further examples.

The animals of the forest have assembled to discuss what is the most important thing: to have a trunk like an elephant, quills like a porcupine, or a long neck like a giraffe? Naturally, every animal is convinced that its particular trait is the most important one and that everyone should have it. But when the double pages open to show all the animals with the quills of a porcupine, the long neck of a giraffe, or the trunk or the elephant, everyone must agree that the true importance lies precisely in their collective 'diversity'. It is that which makes them all unique and essential to life of the forest. The Most Important Thing received a UNESCO honorable mention for peace and collaboration. An important message of diversity and inclusion delivered in the form of a charming modern fable.

This book helps teachers get to grips with using software and offers advice on the different classroom management, differentiation and learning styles issues involved in using a whiteboard in a classroom context by:

- \* Covering issues specific to Primary school teachers integrating whiteboard teaching into their classrooms
- \* Providing cross-curricular strategies that help teachers incorporate the board in a range of subjects
- \* Including screenshots and photos that show what can be created and how to do it
- \* Offering innovative ways of presenting curriculum topics
- \* Including a CD packed full of resources that teachers can develop for their own use.

A brave 'crocoduck' saves his family from becoming duck dinner. Raised from an egg by Mother Duck, Guji Guji is quite content with his life as a duckling, despite the fact that he doesn't look anything like his brothers. Then he meets three nasty creatures who not only convince him that he is, like them, a crocodile, but also try to persuade him to deliver his duck relatives for their dinner. "Chen's vivid characters - the exuberantly befuddled 'crocoduck' and his adopted family, the riotously creepy crocodiles that loom like shadows - are rendered with wit and warmth ... Love overcomes all differences here, and Guji Guji's antics are laugh-out-loud adorable." The New York Times Book Review "Chen's story of love, acceptance and self-discovery gives every sign of becoming a well-worn favourite." Publishers Weekly "This story is a winner! When, after a brief silence once the story is read, comes 'Can we read it again, please?' you know it will be a favourite - and it is." Daily Chronicle

Mr and Mrs Wolf have adopted a poor orphan w olf, Philip, who they found in the woods. But Philip doesn't behave the way a growing wolf should, so they send him to W olf Academy. Allen is also the author of 6 books in the Wiza rd Grimweed series. '
