Business schools, both at undergraduate and postgraduate levels, worldwide and in India now ensure that students undertake suitable courses in economics. The purpose of teaching Managerial Economics is to equip business students with the ability to deliberate logically and critically the challenging process of framing business strategies later on in their careers. Managerial Economics caters to these needs in the Indian context in a detailed manner.

This text uses the theory of the firm to integrate and link economic theory (microeconomics and macroeconomics), decision sciences (mathematical economics and econometrics), and the functional areas of business (accounting, finance, marketing, personnel or human resource management, and production) and shows how all of these topics are crucial components of managerial decision making. The text is divided into five parts-Part I examines the nature and scope of managerial economics, Part II analyses demand, Part III presents the theory and measurement. It covers the full range of optimization techniques used in managerial decision making. The book offers extensive end-chapter material in the form of the summary, discussion questions, problems, chapter appendixes along with appendix problems, supplementary readings, and Internet site addresses. This seventh edition includes new sections, new case studies, some of which are India based, and five new longer Indian integrated case studies. In addition, the existing case studies, supplementary readings, and Internet site addresses have been revised.

This book provides a complete and comprehensive coverage of the managerial economics syllabus of Gautam Buddha Technical University.
