"If it is beyond your power to control, let it go." "Do not wish that all things will go well with you, but that you will go well with all things." "In this way, you will overcome life's challenges, rather than be overcome by them." Epictetus (c. AD 50-135) was a former Roman slave who became a great teacher, deeply influencing the future emperor Marcus Aurelius among many others. His philosophy, Stoicism, was practical, not theoretical--aimed at relieving human suffering here and now. Epictetus knew suffering--besides being enslaved, he was lame in one leg and walked with a crutch. The Manual is a collection of Epictetus' essential teachings and pithy sayings, compiled by one of his students. It is the most accessible and actionable guide to Stoic philosophy, as relevant today as it was in the Roman Empire. This new edition, published

by Ancient Renewal, is rendered in contemporary English by Sam Torode.

In the early 1950s, the pioneering work of Robert Danis on operative treatment of fractures was in danger of falling into oblivion. Maurice E. Muller, impressed and intrigued by his contacts with Danis, first critically applied internal fixation and immediate mobilization to some 80 patients and found the basic concept confirmed, but in need of further development with regard to technology, clinical application, and scientific analysis. In 1958 he assembled a group of friends, general and orthopedic surgeons, willing to invest time and effort in helping to create

the necessary armamentarium and to form a study group for clinical trials. This group was set up in the same year under the name Arbeitsgemeinschaft für Osteosynthesefragen (AO), later on to be known in English-speaking countries as the Association for the Study of Internal Fixation (ASIF). The first report on operative treatment of fractures by Müller, Allgower, and Willenegger, published in 1963, stressed the advantages of early open reduction and internal fixation. This book, first published in German, amusingly lost an important part when translated into English. At the suggestion of worried American and English participants, a picture series showing the healing pattern of 188 tibial fractures operated on in Chur between December 20, 1961 and April 26, 1962 was left out.
