

## Maternal And Child Nursing Care 3rd Edition Pearson

Maternal Newborn Nursing Care Plans, Third Edition teaches students and practicing nurses how to assess, plan, provide, and evaluate care for pregnancy, delivery, recovery, abnormal conditions, and newborn care. Featuring more than 65 of the most common and high-risk care plans for nursing care using the nursing process approach, it includes NIC interventions, discussions on collaborative problems, key nursing activities, signs and symptoms, and diagnostic studies. Using a progressive approach, the text begins with generic care plans that address all patient situations regardless of the patient diagnosis or condition before moving on to more complicated and specific care plans.

AJN Book-of-the-Year Award-Winner! A comprehensive women's health reference guide, this "pocket brain" delivers all the practical, evidence-based clinical information you need to care for normal and high-risk pregnant mothers, newborns, and their families in diverse hospital and community settings. This book delves into other women's health issues that may impact the care of the mother-baby dyad, such as culture, substance abuse, family planning, violence against women and sexually transmitted infections. Perfect for students, new-to-practice, or expert practitioners, this guide provides concise, comprehensive assessments, easy-to-understand tables of lab work-ups and values, common treatment guidelines and the steps to implement and evaluate nursing care. As a special feature to assist with learning how to check a cervix, you can practice using the dilation milestone cut outs inside the book!

Maternal and Child Nursing Care Prentice Hall

"The 4th edition of Maternal and Child Health will continue to offer a comprehensive, trusted introduction to the field of Maternal and Child Health, however this new edition, with a new author team and new MCH expert contributors, will present the traditional MCH topics in a modern context that addresses race/ethnicity, an expanded family focus (including fathers), and a broadened approach that will appeal not only to public health professionals, but also to health professionals outside public health practice"--

For courses in Pediatric Nursing. A comprehensive survey of family-centered pediatric nursing care Child Health Nursing: Partnering with Children & Families promotes excellence in nursing care for infants, children, and adolescents--in hospitals and in the community. It focuses on the importance of partnering with families to adapt care plans for children based on their age, health status, and social and cultural influences. The text considers the impact of contemporary care environments on nursing practice, both in health promotion and in the care of children with acute or chronic health conditions. By offering industry best practices and practical applications, the book encourages students to apply evidence-based findings and clinical reasoning to planning superior care. The updated 3rd edition explains how modern nursing practice is affected by reforms to healthcare and its delivery--such as electronic health records, new approaches to chronic and acute condition management, and a focus on prevention. To support safe, effective, and innovative care, this edition draws on the latest recommendations of NANDA International diagnoses, Nursing Intervention Classifications (NIC), Nursing Outcomes Classifications (NOC), and Healthy People 2020. This highly respected book helps students develop the technical skills and broad understanding vital for effective practice while ensuring they never lose sight of the importance of compassion in their role as nurses. Presenting maternal-newborn and child health care not as two separate disciplines but as a continuum of knowledge, Maternal and Child Health Nursing, Seventh Edition views the experience of wellness and illness as family-centered events and pregnancy and childbirth as periods of wellness in a woman's life. Consistently linking theory with application to bring clinical concepts to life and using a nursing process framework to help students prepare for effective practice, this Seventh Edition adds new chapter-ending case studies, an expanded focus on culture and families, the latest QSEN content, and more. In addition, this edition is supported by PrepU's adaptive quizzing, DocuCare's educational electronic health record software, and a fully updated Study Guide.

his brand new book gives your students a holistic approach to pediatric care that views wellness and illness as family-centered events. Accessible and reader friendly, the book underscores the importance of child development in the planning of nursing care; encourages child health promotion as a foundation for healthy adult living; and examines both the physical and emotional effects of illness on children. The book's emphasis on nursing communication, family education, and culturally sensitive care combines with nursing process overviews, an outcomes orientated approach, critical thinking exercises, and step by step coverage of therapeutic procedures to produce the most effective and practical resource in the field

The evaluation of reproductive, maternal, newborn, and child health (RMNCH) by the Disease Control Priorities, Third Edition (DCP3) focuses on maternal conditions, childhood illness, and malnutrition. Specifically, the chapters address acute illness and undernutrition in children, principally under age 5. It also covers maternal mortality, morbidity, stillbirth, and influences to pregnancy and pre-pregnancy. Volume 3 focuses on developments since the publication of DCP2 and will also include the transition to older childhood, in particular, the overlap and commonality with the child development volume. The DCP3 evaluation of these conditions produced three key findings: 1. There is significant difficulty in measuring the burden of key conditions such as unintended pregnancy, unsafe abortion, nonsexually transmitted infections, infertility, and violence against women. 2. Investments in the continuum of care can have significant returns for improved and equitable access, health, poverty, and health systems. 3. There is a large difference in how RMNCH conditions affect different income groups; investments in RMNCH can lessen the disparity in terms of both health and financial risk.

Banking on Milk takes the reader on a journey through the everyday life of donor human milk banking across the United Kingdom (UK) and beyond, asking questions such as the following: Why do people decide to donate? How do parents of recipients hear about human milk? How does milk donation impact on lifestyle choices? Chapters record the practical everyday reality of work in a milk bank by drawing on extensive ethnographic observations and sensitive interview data from donors, mothers of recipients and the staff of four different milk banks from across the UK, and visits to milk banks across Europe and North America. It discusses the ongoing pressures to do with supply, demand and distribution. An empirically informed "ethnography of the contemporary", where both biosociality and biopower abound, this book includes an exploration of how milk banks evolved from registering wet nurses with hospitals, showing how a regulatory culture of medical authority began to quantify and organize human milk as a commodity. This book is a valuable read for all those with an interest in breastfeeding or organ and tissue donation from a range of fields, including midwifery, sociology, anthropology, geography, cultural studies and public health.

Clinical ethicists encounter the most emotionally eviscerating medical cases possible. They struggle to facilitate resolutions founded on good reasoning embedded in compassionate care. This book fills the considerable gap between current texts and the continuing educational needs of those actually facing complex ethics consultations in hospital settings. 28 richly detailed cases explore the ethical reasoning, professional issues, and the emotional aspects of these impossibly difficult consultations. The cases are grouped together by theme to aid teaching, discussion and professional growth. The cases inform any reader who has a keen interest in the choices made in real-life medical dilemmas as well as the emotional cost to those who work to improve the situations. On a more advanced level, this book should be read by ethics committee members who participate in ethics consultations, individual ethics consultants, clinicians who seek education about complex clinical ethics cases, and bioethics students.

This money saving package includes the McKinney: Maternal-Child Nursing, 3rd edition textbook, and the Simulation Learning System (SLS) User Guide & Access Code for McKinney's Maternal-Child Nursing, 3rd edition. STUDENT ACCESS ONLY - INSTITUTIONAL LICENSE REQUIRED. The Simulation Learning System (SLS) integrates simulation technology into your combined maternity and pediatric nursing course by providing realistic scenarios and supportive learning resources that correspond to McKinney: Maternal-Child Nursing, 3rd edition. The SLS offers targeted reading assignments and critical thinking exercises to prepare you for the simulation experience; access to patient data with a shift report and fully-functional electronic medical record (EMR); post-simulation exercises including charting and documentation activities in the EMR, reflective journaling, and concept mapping; and review resources including animations, videos, and textbook references. Simulation with the SLS is a complete learning experience that bridges the gap between lecture and clinicals to prepare you for the real world of nursing. AJN Book of the Year 2009 The ENHANCED, REVISED, REPRINT of Maternal-Child Care Nursing is the same great book that won an AJN Book-of-the-Year Award... made even better with the feedback we received from instructors across the country and Canada. BONUS! The Women's Health Companion, packaged with every copy of the book, is a \$29.00 value that's absolutely FREE when you purchase the ENHANCED, REVISED, REPRINT. It's a complete guide to the role of the nurse in promoting women's health. From class to clinical through NCLEX to practice, it presents all of the information nursing students need to know and shows them how to apply it in both traditional and community settings. There are even teaching and learning resources for this content online at DavisPlus. The perfect balance of maternal and child nursing care in a new textbook conceived and written to be a combination textbook! An extensive review by nursing educators ensures that it offers just the right depth and breadth of coverage for students in today's maternity/pediatric courses. Its unique emphasis on optimizing outcomes, evidence-based practice, and research supports the goal of caring for women, families and children not only in traditional hospital settings, but also wherever they live, work, study, or play. Clear, concise, and easy to follow, the content is organized around four major themes, holistic care, critical thinking, validating practice, and tools for care that help students to learn and apply the material.
