Most questions end in "what are the appropriate next steps in managing this patient?" Imagine yourself as the clinician taking care of these patients: What test(s), if any, would you order next?"--Provided by publisher.

Kevin Maxwell was a dream candidate for the police force - he had a long-held desire to serve his community, a strong moral compass and a clear aptitude for both the strategic and practical aspects of policing. And, as a gay black man from a working class family, he could easily have been a poster boy for the force's stated commitment to equal opportunities. Joining just after the 9/11 attacks, Kevin entered policing determined to keep communities safe in the face of a changing world. But instead he came up against entrenched prejudice, open racism and homophobia. For more than ten years, Kevin strove against the odds, until he took the force to an employment tribunal - with devastating results. *Forced Out* is a revelatory exposé combining deeply affecting memoir with sharp analysis and a fascinating insider perspective on day-to-day life in the force. It is a touchstone for the silent many who have either tried to ignore abuse for the sake of their career or who have been bullied out of their jobs. It paints a sobering portrait of an institution that has not yet learned the lessons of the past and whose prejudice is informing the cases it chooses to investigate and the way it investigates them. And it
