God, everyone likes to feel like they look good. We are vain creatures, and society does a good job of judging everyone based on their outward appearance.

Journalist Walls grew up with parents whose ideals and stubborn nonconformity were their curse and their salvation. Rex and Rose Mary and their four children lived like nomads, moving among Southwest desert towns, camping in the mountains. Rex was a charismatic, brilliant man who, when sober, captured his children's imagination, teaching them how to embrace life fearlessly. Rose Mary painted and wrote and couldn't stand the responsibility of providing for her family. When the money ran out, the Walls retreated to the dismal West Virginia mining town Rex had tried to escape. As the dysfunction escalated, the children had to fend for themselves, supporting one another as they found the resources and will to leave home. Yet Walls describes her parents with deep affection in this tale of unconditional love in a family that, despite its profound flaws, gave her the fiery determination to carve out a successful life. -- From publisher description.

Since the 1960s, the class action lawsuit has been a powerful tool for holding businesses accountable. Yet years of attacks by corporate America and unfavorable rulings by the Supreme Court have left its future uncertain. In this book, Brian T. Fitzpatrick makes the case for the importance of class action litigation from a surprising political perspective: an unabashedly conservative point of view. Conservatives have opposed class actions in recent years, but Fitzpatrick argues that they should see such litigation not as a danger to the economy, but as a form of private enforcement of the law. He starts from the premise that all of us, conservatives and libertarians included, believe that markets need at least some rules to thrive, from laws that enforce contracts to laws that prevent companies from committing fraud. He also reminds us that conservatives consider the private sector to be superior to the government in most areas. And the relatively little-discussed intersection of those two beliefs is where the benefits of class action lawsuits become clear: when corporations commit misdeeds, class action lawsuits enlist the private sector to intervene, resulting in a smaller role for the government, lower taxes, and, ultimately, more effective solutions. Offering a novel argument that will surprise partisans on all sides, *The Conservative Case for Class Actions* is sure to breathe new life into this long-running debate.

This fifth edition of the highly successful *The Value of a Dollar* records the actual prices of thousands of items that consumers purchased from the Civil War to the present, along with facts about investment options and income opportunities.

The Third Edition of ANSI/ACCA Manual D is the Air Conditioning Contractors of America procedure for sizing residential duct systems. This procedure uses Manual J (ANSI/ACCA, Eighth Edition) heating and cooling loads to determine space air delivery requirements. This procedure matches duct system resistance (pressure drop) to blower performance (as defined by manufacturer's blower performance tables). This assures that appropriate airflow is delivered to all rooms and spaces; and that system airflow is compatible with the operating range of primary equipment. The capabilities and sensitivities of this procedure are compatible with single-zone systems, and multi-zone (air zoned) systems. The primary equipment can have a multi-speed blower (PSC motor), or a variable-speed blower (ECM or constant torque motor, or a true variable speed motor). Edition Three, Version 2.50 of Manual D (D3) specifically identifies normative requirements, and specifically identifies related informative material.

Provides solutions to the 'a' exercises, and the odd-numbered discussion questions and problems that feature in the eighth edition of Atkins' *Physical Chemistry*. This manual offers comments and advice to aid understanding. It is intended for students and instructors alike.

One damaging relationship in his life refuses to end when the woman insists it's not over between them for her. Marsha makes Macklin's life hell...until she turns up dead and the evidence points straight at him. As the new detective on the Coronado Police force, Alex is determined to make a good impression on her superiors and colleagues. That goal is thwarted by Macklin, who's the chief suspect in her murder investigation--and someone she longs to know a whole lot better. Whether she wants to or not, she can't let herself foolishly forget that his last girlfriend now occupies an ice-cold bed at the morgue. During his thorough interrogation at the precinct by the sexy-beyond-belief detective, Macklin finds himself furious...and intrigued. Seems, alive or dead, Marsha is determined to make his life miserable. Alex intends to find out the truth, and, as an elite warrior himself, he admires her grit and ethics in pursuit of the answers. Damn that she's the first woman in a long time he'd love to get to know better. With no other option, Macklin has to help the detective solve the mystery--hopefully before Alex has no choice but to charge him with murder.
