La figura di Antonio Minturno oggi, grazie anche al consolidamento di alcune certezze in fatto di lingua e poetica, si è delineata ormai come centrale nel panorama del petrarchismo di medio e fine Cinquecento italiano e spagnolo; l'indubbia influenza esercitata su Torquato Tasso prima e Marino dopo (per tacere della sua presenza teorica in ambito musicale per tutto il Barocco), ci permette oggi di spostarlo tra quei "Maggiori" della letteratura italiana che hanno influenzato con la propria opera non solo la poesia, ma anche la generale formazione estetica degli autori nelle diverse discipline, dalla poesia alla musica.

This volume offers a wide-ranging overview of the 16th-18th century disputation culture in various European regions. Its focus is on printed disputations as a polyvalent media form which brings together many of the elements that contributed to the cultural and scientific changes during the early modern period.

In his utopian novel *Hiera Anagraphe* (Sacred History) Euhemerus of Messene (ca. 300 B.C.) describes his travel to the island Panchaia in the Indian Ocean where he discovered an inscribed stele in the temple of Zeus Triphylus. It turned out that the Olympian gods (Uranos, Kronos, Zeus) were deified kings. The travels of Zeus allowed to describe peoples and places all over the world. Winiarczyk investigates the sources of the theological views of Euhemerus. He proves that Euhemerus' religious views were rooted in old Greek tradition (the worship of heroes, gods as founders of their own cult, tombs of gods, euergetism, rationalistic interpretation of myths, the explanations of the origin of religion by the sophists, the ruler cult). The description of the Panchaian society is intended to suggest an archaic and closed culture, in which the stele recording *res gestae* of the deified kings might have been preserved. The translation of Ennius' *Euhemerus sive Sacra historia* (ca. 200 - ca. 194) is a free prose rendering, which Lactantius knew only indirectly. The book is concluded by a short history of Euhemerism in the pagan, Christian and Jewish literature.

Alisa van de Haar sheds new light on the debates regarding the form and status of the vernacular in the early modern Low Countries, where both French and Dutch were spoken as local tongues.

RE-RELEASE: 2ND EDITION The Religio Romana Handbook: A Guide for the Modern Practitioner, 2nd Edition, is the first volume in the series, "The Modern Roman Living Series," by Lucius Vitellius Triarius. It is a guide for the practitioner of the cultus deorum Romanum, the ancient Roman religious system as practiced in the modern time. Not a congregational religion, the cultus deorum Romanum is a religious system based on individual practices, household and ancestor worship, and religion of the state. This work is a compilation of writings, articles, opinions and beliefs from many practitioners of the Religio Romana in Nova Roma, the global Roman Reconstruction effort in our modern age. It has been compiled to assist those interested in learning more about the cultus deorum Romanum and related Roman culture, both ancient and modern, and has been designed to be of practical use by the religio practitioner and reference guide for the non-practitioner. Unlike the ancient Greek belief system, the ancient Romans believed that achieving peace and harmony in society required maintaining a positive relationship with the gods and goddesses by all to achieve that equilibrium, as the gods and goddesses walked among us daily. Each person was responsible for doing their part, whatever that part was. If you are new to the religion or a seasoned practitioner, this handbook provides you with detailed information on most aspects of the religio on how you can begin participating the global movement to bring much needed sense and balance to our modern world. The book is comprised of updates of the original 1st Edition sections, plus NEW chapters, which include: Introduction to Roman Religion - NEW! Monotheism vs. Polytheism - NEW! Declaration of Roman Religion On Roman Reconstruction - UPDATED! Religion of the Home - UPDATED! Worshipping the Gods at Home - UPDATED! Your First Prayer to the Gods - UPDATED! Ancestral and Household Worship - UPDATED! Daily Rituals - UPDATED! Kalends Ritual - UPDATED! Nones Ritual - UPDATED! Ides Ritual - UPDATED! Other Rituals - NEW! On Domestic Roman Sacrifice - UPDATED! Posture and Gesture in Roman Prayer - UPDATED! Foreign Cults in Ancient Rome - UPDATED! Gods and Goddesses of Rome - UPDATED! Roman Festivals and Ludi (Games) - UPDATED! Roman Beliefs about the Afterlife - UPDATED! The Roman Virtues - NEW! Glossary of Roman Religious Terms - UPDATED! This work gives you insight on "repairing" your household and family, which are the foundation stones of all society. It brings new insights from old perspectives, which actually worked for centuries, to the modern view of "family" and its relationship to the hearth. The hearth is the heart of the family life. To keep the fire alive on the hearth is the bounden duty of the family gods. We of the modern world have lost altogether those conception that made "hearth" and "altar" sacred words. Domestic religion sanctified domestic life. In these days of matches and electricity the smoldering brand of the hearth and their gods has lost its usefulness and, therefore, its sacredness....Our modern improvements have improved these lovely gods out of existence. The men and women of that world would laugh our gods to scorn and think of them with pity, — gods shut up in churches, having nothing to do but to

listen to the droning of prayers and the confessions of sins; gods who pass their dreary existence away from the warmth of the hearth, the smell of the cooking, the chatter of the maids and the stir of the family life!

In Episodes, Ian Maclean investigates the ways in which the book trade operated through book fairs, and interacted with academic institutions, journals and intellectual life in various European settings (Germany, Italy, the Netherlands and England) in the long seventeenth century.

The original idea for a conference on the "shapes of knowledge" dates back over ten years to conversations with the late Charles Schmitt of the Warburg Institute. What happened to the classifications of the sciences between the time of the medieval Studium and that of the French Encyclopedie is a complex and highly abstract question; but posing it is an effective way of mapping and evaluating long term intellectual changes, especially those arising from the impact of humanist scholarship, the new science of the seventeenth century, and attempts to evaluate, to apply, to reconcile, and to institutionalize these rival and interacting traditions. Yet such patterns and transformations cannot be well understood from the heights of the general history of ideas. Within the general framework of the organization of knowledge the map must be filled in by particular explorations and soundings, and our project called for a conference that would combine some encyclopedic (as well as interdisciplinary and international) breadth with scholarly and technical depth.

The chapters in this volume share an aim to historicize the role of the translator as a cultural and political agent in the early modern West.

'Rewriting' is one of the most crucial but at the same time one of the most elusive concepts of literary scholarship. In order to contribute to a further reassessment of such a notion, this volume investigates a wide range of medieval and early modern literary transformations, especially focusing on texts (and contexts) of Italian and French Renaissance literature. The first section of the book, "Rewriting", gathers essays which examine medieval and early modern rewritings while also pointing out the theoretical implications raised by such texts. The second part, "Rewritings in Early Modern Literature", collects contributions which account for different practices of rewriting in the Italian and French Renaissance, for instance by analysing dynamics of repetition and duplication,

verbatim reproduction and free reworking, textual production and authorial self-fashioning, alterity and identity, replication and multiplication. The volume strives at shedding light on the complexity of the relationship between early modern and ancient literature, perfectly summed up in the motto written by Pietro Aretino in a letter to his friend the painter Giulio Romano in 1542: "Essere modernamente antichi e anticamente moderni".

Devotion to religion was the distinguishing characteristic of the Etruscan people, the most powerful civilization of Italy in the Archaic period. From a very early date, Etruscan religion spread its influence into Roman society, especially with the practice of divination. The Etruscan priest Spurinna, to give a well-known example, warned Caesar to beware the Ides of March. Yet despite the importance of religion in Etruscan life, there are relatively few modern comprehensive studies of Etruscan religion, and none in English. This volume seeks to fill that deficiency by bringing together essays by leading scholars that collectively provide a state-of-the-art overview of religion in ancient Etruria. The eight essays in this book cover all of the most important topics in Etruscan religion, including the Etruscan pantheon and the roles of the gods, the roles of priests and divinatory practices, votive rituals, liturgical literature, sacred spaces and temples, and burial and the afterlife. In addition to the essays, the book contains valuable supporting materials, including the first English translation of an Etruscan Brontoscopic Calendar (which guided priests in making divinations), Greek and Latin sources about Etruscan religion (in the original language and English translation), and a glossary. Nearly 150 black and white photographs and drawings illustrate surviving Etruscan artifacts and inscriptions, as well as temple floor plans and reconstructions.

This volume on Greek synchronic etymology offers a set of papers evidencing the cultural significance of etymological commitment in ancient and medieval literature. The four sections illustrate the variety of approaches of the same object, which for Greek writers was much more than a technical way of studying language. Contributions focus on the functions of etymology as they were intended by the authors according to their own aims. (1) "Philosophical issues" addresses the theory of etymology and its explanatory power, especially in Plato and in Neoplatonism. (2) "Linguistic issues" discusses various etymologizing techniques and the status of etymology, which was criticized and openly rejected by some authors. (3) "Poetical practices of etymology" investigates the ubiquitous presence of etymological reflections in learned poetry, whatever the genre, didactic, aetiological or epic. (4) "Etymology and word-plays" addresses the vexed question of the limit between a mere pun and a real etymological explanation, which is more than once difficult to establish. The wide range of genres and authors and the interplay between theoretical reflection and applied practice shows clearly the importance of etymology in Greek thought.

Roman plays have been well studied individually (even including fragmentary or spurious ones more recently). However, they have not always been placed into

their 'context', though plays (just like items in other literary genres) benefit from being seen in context. This edited collection aims to address this issue: it includes 33 contributions by an international team of scholars, discussing single plays or Roman dramatic genres (including comedy, tragedy and praetexta, from both the Republican and imperial periods) in contexts such as the literary tradition, the relationship to works in other literary genres, the historical and social situation, the intellectual background or the later reception. Overall, they offer a rich panorama of the role of Roman drama or individual plays in Roman society and literary history. The insights gained thereby will be of relevance to everyone interested in Roman drama or literature more generally, comparative literature or drama and theatre studies. This contextual approach has the potential of changing the way in which Roman drama is viewed.

The purpose of this volume is to investigate the crucial role played by the return of knowledge of Greek in the transformation of European culture, both through the translation of texts, and through the direct study of the language. It aims to collect and organize in one database all the digitalised versions of the first editions of Greek grammars, lexica and school texts available in Europe in the 14th and 15th centuries, between two crucial dates: the start of Chrysoloras's teaching in Florence (c. 1397) and the end of the activity of Aldo Manuzio and Andrea Asolano in Venice (c. 1529). This is the first step in a major investigation into the knowledge of Greek and its dissemination in Western Europe: the selection of the texts and the first milestones in teaching methods were put together in that period, through the work of scholars like Chrysoloras, Guarino and many others. A remarkable role was played also by the men involved in the Council of Ferrara (1438-39), where there was a large circulation of Greek books and ideas. About ten years later, Giovanni Tortelli, together with Pope Nicholas V, took the first steps in founding the Vatican Library. Research into the return of the knowledge of Greek to Western Europe has suffered for a long time from the lack of intersection of skills and fields of research: to fully understand this phenomenon, one has to go back a very long way through the tradition of the texts and their reception in contexts as different as the Middle Ages and the beginning of Renaissance humanism. However, over the past thirty years, scholars have demonstrated the crucial role played by the return of knowledge of Greek in the transformation of European culture, both through the translation of texts, and through the direct study of the language. In addition, the actual translations from Greek into Latin remain poorly studied and a clear understanding of the intellectual and cultural contexts that produced them is lacking. In the Middle Ages the knowledge of Greek was limited to isolated areas that had no reciprocal links. As had happened to many Latin authors, all Greek literature was rather neglected, perhaps because a number of philosophical texts had already been available in translation from the seventh century AD, or because of a sense of mistrust, due to their ethnic and religious differences. Between the 12th and 14th century AD, a change is perceptible: the sharp

decrease in Greek texts and knowledge in the South of Italy, once a reference-point for this kind of study, was perhaps an important reason prompting Italian humanists to go and study Greek in Constantinople. Over the past thirty years it has become evident to scholars that humanism, through the re-appreciation of classical antiquity, created a bridge to the modern era, which also includes the Middle Ages. The criticism by the humanists of medieval authors did not prevent them from using a number of tools that the Middle Ages had developed or synthesized: glossaries, epitomes, dictionaries, encyclopaedias, translations, commentaries. At present one thing that is missing, however, is a systematic study of the tools used for the study of Greek between the 15th and 16th century; this is truly important, because, in the following centuries, Greek culture provided the basis of European thought in all the most important fields of knowledge. This volume seeks to supply that gap.

How did Roman family relationships differ from our own? What metaphors did the Romans use to express abstractions such as time? What can we learn from the cultural symbols of their religion and literature? In *Anthropology and Roman Culture*, Maurizio Bettini employs the methods of structural anthropology to examine a series of social, ethical, and religious issues characteristic of Roman culture in the classical period. Bettini begins by examining the system of kinship within the extended Roman family. He shows how the "stern" Roman father and "indulgent" Roman mother had their exact counterparts elsewhere in the family: the harsh "father's brother" (*patruus*) and the tolerant "mother's brother" (*avunculus*). He discusses the complex Roman spatial conception of time (in which the future, for instance, could be said to lie "behind" as well as "ahead" of us), applying his findings in an analysis of Roman literature and culture. And he examines the cultural symbolism of the bee, the butterfly, and the bat, all of which served to represent the survival of the human soul after death. Recent classical scholarship has seen the successful application of an anthropological approach to Greek studies. Maurizio Bettini has shown the ways in which this practice can benefit Roman studies as well. Drawing on a wide range of literary and documentary sources, *Anthropology and Roman Culture* is now available for the first time in English translation.

"The first comprehensive history of courtliness and chivalry in their literary and cultural contexts."--Robert Grudin, University of Oregon "The first comprehensive history of courtliness and chivalry in their literary and cultural contexts."--Robert Grudin, University of Oregon

This history of Latin literature offers a comprehensive survey of the 1000 year period from the origins of Latin as a written language to the early Middle Ages. It offers a wide-ranging panorama of all major Latin authors.

This edited collection offers the latest scholarship on book catalogues in early modern Europe. Contributors discuss the role that these catalogues played in bookselling and book auctions, as well as in guiding the tastes of book collectors. This volume assembles 50 contributions presented at the XVII International Colloquium on Latin Linguistics. They embrace essential topics of Latin linguistics with different theoretical and methodological approaches: phonetics, syntax, etymology and semantics, pragmatics and textual analysis. It is a useful resource for the study of comparative and general linguistics, not only for linguists but also for scholars of classical philology.
