Achieving Excellence in Dealer/Distributor Performance offers in-depth management coaching in each of these areas -- machinery sales, rentals, service, parts and customer training and retention, and is filled with practical programs to strengthen and increase profitability, cash flow and customer retention. Improving an industrial equipment business has four requirements: 1. Measure the dealership against proper benchmark metrics. These 48 Critical Profit Variables are covered in detail in this text. 2. Determine where you stand, find the gaps in your performance, Comprehensive self-assessment tools are provided. 3. Identify "best practices" of high-performance dealers. Recommendations are made for each business area. 4. Energize your company into a continuous improvement program. Numerous team discussion projects are included in the text. McDonald Group Institute for Dealer Development founder and author Walter McDonald has based this text on 40 years' experience in dealer management consulting and over 2,650 dealer management workshops. In many ways, this book is a written reflection of Walt's live dealer management seminars. If you are familiar with his work, you know that he focuses on the real value generating activities of the business. He is in the trenches with the dealer managers and field sales and aftermarket reps who create real value and make it happen every hour of every day in the dealership. McDonald's dealer management guide is an absorbing refresher for informed senior executives and a highly useful handbook for those future dealer leaders and related OEM managers on the way up. This dealer guide actually contains two books, one book with benchmarks and advice on what the numbers mean and the second book on how to improve the numbers. This manuscript could have been subtitled: 'real metrics, real solutions.' The dealer/distributor can analyze its business operations through the performance yardsticks presented in this timely publication. By Nick W. McGaughey, CPA, "This dealer text is very well thought out, well written, easy to read and follow. I believe it will be very beneficial to dealer principals and operating managers. By Dr. Shankar Basu, CEO Toyota-Lift of Los Angeles I particularly like the section 'How This Book Can Help' included early on in the work to help the user focus in on their primary trouble spot. I also appreciate the inclusion of the page on 'Terminology.' I think it does a good job of setting up the frame of reference for the user. By Jim Johnson Former Dealer Development Manager Navistar I think dealer principals, operations and general managers, and sales, parts, service and rentals could all use this book. I can see value in taking this as a group reading project in our dealership and having weekly discussions on certain chapters. By George M. Keen Operations Manager New Virginia Tractor I very much believe this will be a very beneficial tool to any dealership wanting to set achievement points to their success in all areas of operation. By Mike O'Donnell President & CEO Stuart Tank Sales This type of manual for a Dealer Principal is new and I think it is needed. By Bill L. Ryan President Lift One Everything in this book is on target and relevant to running a successful dealership in today's world. By John Shearer General Manager Construction and Forestry 4 Rivers Equipment This book has given me the opportunity to reflect, review and compare our current processes to the industry specific benchmarks that are discussed in the book. This effort has challenged me to go back to the basics of good business and review those (points) with others in our organization. By Stuart Thompson President Garrison Toyota Material Handling This is a new manager training tool. I think new line managers should be reading this book so they understand how a Dealer Principal thinks when he looks at his business metrics and challenges. By Joe Verzino President LifTech

Human Performance and Ergonomics brings together a comprehensive and modern account of how the context of performance is crucial to understanding behavior. Environment provides both constraints and opportunities to individuals, such that external conditions may have reciprocal or interactive effects on behavior. The book begins with an account of research in human factors and engineering, with application of research to real world environments, methodological concerns, and rumination on current and future trends. The book proceeds to how technology has moved from being designed to help human physical survival to helping humans achieve "quality of life" improvements. Real world examples are explored in detail including hearing technology, driving, and aviation. Issues of control, maneuvering, and planning are discussed in conjunction with how intention and expectancy affect behavior. The fit between human and environment is examined as a dynamic interaction, and many chapters address the all important human-machine communication, particularly that between humans and computers. The book closes with a reminder that even our technological environment is filled with other people, with whom we must interact personally or via technology, to achieve our larger goals. Teamwork is thus discussed for its integration of cognitive, behavioral, and affective components toward our achieving desired aims. \* Includes the application of research in human factors in engineering to real world environments \* Discussion of both current and future trends is included \* Real-world examples of how technology is now helping humans to achieve "quality of life" improvements are explored in detail including hearing technology, driving and aviation \* Many chapters examine the all important human/machine communication, particularly human-computer interaction (HCI)

An instant classic when first published in 1991, How to Lie with Maps revealed how the choices mapmakers make—consciously or unconsciously—mean that every map inevitably presents only one of many possible stories about the places it depicts. The principles Mark Monmonier outlined back then remain true today, despite significant technological changes in the making and use of maps. The introduction and spread of digital maps and mapping software, however, have added new wrinkles to the ever-evolving landscape of modern mapmaking. Fully updated for the digital age, this new edition of How to Lie with Maps examines the myriad ways that technology offers new opportunities for cartographic mischief, deception, and propaganda. While retaining the same brevity, range, and humor as its predecessors, this third edition includes significant updates throughout as well as new chapters on image maps, prohibitive cartography, and online maps. It also includes an expanded section of color images and an updated list of

A tractor repair manual written for the experienced mechanic by professionals in an easy-to-use format , including numerous photos, illustrations and exploded views.

For the aficionado of farm equipment, or the scion of an old farming family nostalgic for the old days, or the grown-up boy who still loves a classic piece of old-time machinery, the vintage tractor can be a thrilling find like no other. This book tells dozens of stories of such discoveries, of the treasured old tractor parked in a shed since 1927, of the pristine model unearthed at an estate sale, of the broken-down old beauty stashed in a barn where generations of children have made their secret hideaways. These are the classic tractors that are often as hard to find as a needle in a haystack—but far more fun to discover, as all of these delightful stories make abundantly clear.

This book is written primarily for the family to help solve the meat problem and to augment the food supply. Producing and preserving meats for family meals are sound practices for farm families and some city folks as well—they make possible a wider variety of meats, which can be of the best quality, at less cost. Meat is an essential part of the American diet. It is also an expensive food. With the costs high, many persons cannot afford to buy the better cuts; others are being forced to restrict the meat portion of the diet to a minimum, or to use ineffectual substitutes. Commercially in the United States, meat means the flesh of cattle, hogs, and sheep, except where used with a qualifying word such as reindeer meat, crab meat, whale meat, and so on. Meat in this book is used in a broader sense, although not quite so general as to comprise anything and everything eaten for nourishment either by man or beast. To be sure, it includes the flesh of domestic animals and large and small game animals as well; also poultry, domestic fowl raised for their meat and eggs, and game birds, all wild upland birds, shore birds, and waterfowl; and fish.

As thrilling as any novel, as taut and exciting as any adventure story, Peter Hathaway Capstick's *Death in the Long Grass* takes us deep into the heart of darkness to view Africa through the eyes of one of the most renowned professional hunters. Few men can say they have known Africa as Capstick has known it—leading safaris through lion country; tracking man-eating leopards along tangled jungle paths; running for cover as fear-maddened elephants stampede in all directions. And of the few who have known this dangerous way of life, fewer still can recount their adventures with the flair of this former professional hunter-turned-writer. Based on Capstick's own experiences and the personal accounts of his colleagues, *Death in the Long Grass* portrays the great killers of the African bush—not only the lion, leopard, and elephant, but the primitive rhino and the crocodile waiting for its unsuspecting prey, the titanic hippo and the Cape buffalo charging like an express train out of control. Capstick was a born raconteur whose colorful descriptions and eye for exciting, authentic detail bring us face to face with some of the most ferocious killers in the world—underrated killers like the surprisingly brave and cunning hyena, silent killers such as the lightning-fast black mamba snake, collective killers

like the wild dog. Readers can lean back in a chair, sip a tall, iced drink, and revel in the kinds of hunting stories Hemingway and Ruark used to hear in hotel bars from Nairobi to Johannesburg, as veteran hunters would tell of what they heard beyond the campfire and saw through the sights of an express rifle.
