Rhetoric about media technology tends to fall into two extreme categories: unequivocal celebration or blanket condemnation. This is particularly true in debate over the clash of values when first world media infiltrate third world audiences. Bringing together the best new work on contemporary media practices, technologies, and policies, the essayists in *Global Currents* argue that neither of these extreme views accurately represents the role of media technology today. New ways of thinking about film, television, music, and the internet demonstrate that it is not only media technologies that affect the cultures into which they are introduced—it is just as likely that the receiving culture will change the media. Topics covered in the volume include copyright law and surveillance technology, cyber activism in the African Diaspora, transnational monopolies and local television industries, the marketing and consumption of “global music,” “click politics” and the war on Afghanistan, the techno-politics of distance education, artificial intelligence and global legal institutions, and traveling and “squatting” in digital space. Balanced between major theoretical positions and original field research, the selections address the political and cultural meanings that surround and configure new technologies.

The field of public opinion is one of the most diverse in political science. Over the last 60 years, scholars have drawn upon the disciplines of psychology, economics, sociology,

and even biology to learn how ordinary people come to understand the complicated business of politics. But much of the path-breaking research in the field of public opinion is published in journals, taking up fairly narrow questions one at a time and often requiring advanced statistical knowledge to understand these findings. As a result, the study of public opinion can seem confusing and incoherent to undergraduates. To engage undergraduate students in this area, a new type of textbook is required. The second edition of *New Directions in Public Opinion* brings together leading scholars to provide an accessible and coherent overview of the current state of the field of public opinion. Each chapter provides a general overview of topics that are at the cutting edge of study as well as well-established cornerstones of the field. Each contributor has made substantive revisions to their chapters, and three chapters have been added on genetics and biology, immigration, and political extremism and the Tea Party. Suitable for use as a main textbook or in tandem with a lengthier survey, this book comprehensively covers the topics of public opinion research and pushes students further to explore critical topics in contemporary politics.

This is a timely work which explores the validity of rational and subjective approaches to conflict resolution, considers the value of international law and organizations for addressing complex social phenomena, and outlines a structural approach to international conflicts. In addition it extends the analysis of conflict transformation to new issues on the international agenda, such as antagonism between urban and rural areas and threat to the environment.

This book introduces Uneven and Combined Development as an approach in international studies and showcases some of the latest and most innovative research in this field. The theory of Uneven and Combined Development originated in the writings of Leon Trotsky. However, in recent years it has

become the subject of flourishing literature in the discipline of International Relations, due to its unique ability to reintegrate social and international theory. The first and second generations of this literature were focused upon retrieving the idea, expanding it into a social theory of ‘the international’, and applying it to numerous empirical cases – such as the rise of political Islam, the causes of the First World War and the Bolshevik Revolution, and even the origins of capitalism as a world system. In the present volume, a third generation has arrived which further extends the reach of UCD, connecting it in new and exciting ways to such subjects as ecology, macro-economic policy, culture, Science and Technology Studies, Comparative Literature and even science-fiction. The chapters in this book were originally published in the journal, the Cambridge Review of International Affairs.

Why does the academic study of international relations have limited impact on the policy community? In *New Directions for International Relations*, Mintz and Russett identify differences in methods of analysis as one cause of problematic, unreliable results. They discuss the problem and set the stage for nine chapters by diverse scholars to demonstrate innovative new developments in IR theory and creative new methods that can lay the basis for greater consensus.

also bringing together key disciplinary debates and treatment of important current real-world developments. Each chapter is written with students in mind so that it remains accessible, interesting, and engaging and does not inundate readers with pedantic or jargonistic terms. New Directions in American Politics introduces students not just to how the American political system works but also to how political science works. La Raja brings together top scholars to write original essays across the standard curriculum of American government and politics, capturing emerging research in the discipline in a way that is accessible for undergraduates. Each chapter combines substantive knowledge with the kind of skill-building and analytical inquiry that is being touted in higher education everywhere. Contributors to New Directions highlight why the questions they seek to answer are critical for understanding American politics, and situate them in the broader context of controversies in research. The teaching of American politics follows a well-worn path. Textbooks for introductory courses hew to a traditional set of chapters that describe the Founding, American institutions, the ways citizens participate in politics, and sometimes public policy.

The material rarely engages students in the kind of questions that animate scholarship on politics. One hurdle for instructors is finding material that reflects quality scholarship—and thus teaches students about why, not just what—and yet is accessible for undergraduates. Articles in scholarly journals are typically unsuited for undergraduate courses, particularly introductory courses. What is needed is a book that conveys exciting trends in scholarship across vital topics in American politics and illustrates analytical thinking. *New Directions in American Politics* is that book and will be an ideal companion to standard textbooks that focus mostly on nuts and bolts of politics. The book features: Contributions from a top-notch cast of active scholars and a highly regarded editor A focus on analytical thinking that addresses questions of causality Full coverage of the American politics curriculum Short interviews with each contributor on a companion website to help the research come alive and prompt critical thinking questions for students Work that draws on the highest quality research in political science but is written specifically for first year undergraduate students. There is simply no book like this available to the growing number of faculty who want their introductory American politics course to be a reflection of the political science discipline and not just the nuts and bolt facts of the American political system.

Since the financial crisis, the issue of the 'one percent' has become the centre of intense public debate, unavoidable even for members of the elite themselves. Moreover, inquiring into elites has taken centre-stage once again in both journalistic investigations and academic research. *New Directions in Elite Studies* attempts to move the social scientific study of elites beyond economic analysis, which has greatly improved our knowledge of inequality, but is restricted to income and wealth. In contrast, this book mobilizes a broad scope of research methods to uncover the social composition of the power elite – the 'field of power'. It reconstructs processes through which people gain access to positions in this particular social space, examines the various forms of capital they mobilize in the process – economic, but also cultural and social capital – and probes changes over time and variations across national contexts. Bringing together the most advanced research into elites by a European and multidisciplinary group of scholars, this book presents an agenda for the future study of elites. It will appeal to all those interested in the study of elites, inequality, class, power, and gender inequality.

*Down to Earth* presents the first comprehensive overview of the geopolitical maneuvers, financial investments, technological innovations, and ideological struggles that take place behind the

scenes of the satellite industry. Satellite projects that have not received extensive coverage—microsatellites in China, WorldSpace in South Africa, SiriusXM, the failures of USA 193 and Cosmos 954, and Iridium—are explored. This collection takes readers on a voyage through a truly global industry, from the sites where satellites are launched to the corporate clean rooms where they are designed, and along the orbits and paths that satellites traverse. Combining a practical introduction to the mechanics of the satellite industry, a history of how its practices and technologies have evolved, and a sophisticated theoretical analysis of satellite cultures, *Down to Earth* opens up a new space for global media studies.

In this landmark collection, the voices of pathmakers and innovators in peacebuilding evaluation are assembled to provide new direction for the field. Stock is taken of the development and challenges of engaging in the real-time learning that evaluation requires. Best practices for overcoming challenges are discussed and critiqued, as well as some of the basic assumptions guiding the field. New means of gathering information and understanding conflict processes are offered and examined. To continue to evolve and strengthen peacebuilding practices and professionalism, multiple calls are issued for collaborative learning and a field-wide effort at community inquiry.

This book, first published in 1981, examines the broader aspects of international strategic relations, and analyses Cold War developments within particular nations, fields of warfare and areas of political-military interaction. The role of force in international society changed as the nuclear deadlock between the superpowers continued, with military forces being deployed for political purposes in situations only just short of war. The balance between NATO and Warsaw Pact forces also changed as American technology increased and short-range nuclear missiles were deployed in Europe. This book also examines the development of strategic thinking in China, Japan and India, as well as insurgency in the Third World, so often the site for proxy superpower conflict.

Recent events have demonstrated that one of the most important fields of study in this century is world order. The contribution of this book to this field is that it attempts to lay the intellectual foundations for a reconsideration of what constitutes a truly Islamic world order. Perhaps the words of the late Professor Ismail al-Faruqi, in his scholarly introduction to this work, best describes the landmarks of such an order; "The world order of Islam would confer upon every person by virtue of birth and humanity, the ultimate right and honor, namely, the capacity to think and make up one's mind as to which millah one wishes to

belong and hence, by which law one desires to order one's life and that of one's dependents."In dealing with his subject, the author has had to return to the sources of Islam, the Qur'an and the Sunnah, and develop a methodology for dealing with them in a creative and practicable manner. In doing so, he examines the methodology developed by the early generations of Muslim scholars and finds it limited by its legalistic approach. Thus, much of the value of his work lies in its discussion of methodology and in the social sciences in general, by means of methodology developed from a purely Islamic perspective.Originally submitted as a doctoral dissertation, and then revised for its publication in 1987 as "The Islamic Theory of International Relations", this edition, retitled "Towards an Islamic Theory of International Relations", has undergone serious editorial revision, and may now be seen to convey the author's pioneering ideas in a way that befits their importance.

Genocide studies is a relatively new field of comparative inquiry, but recent years have seen an increasing range of themes and subject-matter being addressed that reflect a variety of features of the field and transformations within it. This edited book brings together established scholars with rising stars and seeks to capture the range of new approaches, theories, and case studies in the field. The book is

divided into three broad sections: Section I focuses on broad theories of comparative genocide, covering a number of different perspectives. Section II critically reconsiders core themes of genocide studies and unfolds a range of challenging new directions, including cultural genocide, gender and genocide (as it pertains to both women and men), structural violence, and the novel application of remote-sensing technologies to the detection and study of genocide. Section III is case-study focused, seeking to place both canonical and little-known cases of genocide in broader comparative perspective. Cases analyzed include genocide in North America, the Nazi Holocaust, the Armenian genocide, and the Sri Lankan genocide. The combination of cutting-edge scholarship and innovative approaches to familiar subjects makes this essential reading for all students and scholars in the field of genocide studies.

Policy transfer analysis seeks to make sense of the cross-cultural transfer of knowledge about institutions, policies or delivery systems in an era of globalization. The purpose of this volume is to evaluate how useful policy transfer analysis is as a descriptive, explanatory and prescriptive theory of policy change. It provides both a response to its critics and it presents a variety of new directions for studying processes of policy transfer. The chapters proceed from an underlying assumption about the

field of enquiry; that policy transfer analysis alone cannot provide a general explanatory theory of policy change but when combined with other approaches an empirically grounded account of policy change can be developed. Hence each of the chapters adopt a methodological pluralism in which complementary theories of policy development are combined in order to develop a theory of policy change that accounts for the role of particular agents of policy transfer in forging policy change. This is an important contribution to our understanding of the impact of globalization on domestic policy formulation. This book was previously published as a special issue of Policy Studies.

Does living in a globally networked society mean that we are moving toward a single, homogenous world culture? Or, are we headed for clashes between center and periphery, imperial and subaltern, Western and non-Western, First and Third World? The interdisciplinary essays in *Beyond Globalization* present us with another possibility—that new media will lead to new kinds of “worldmaking.” This provocative volume brings together the best new work of scholars within such diverse fields as history, sociology, anthropology, film, media studies, and art. Whether examining the inauguration of a virtual community on the website *Second Life* or investigating the appropriation of biotechnology for transgenic art, this collection highlights how

mediated practices have become integral to global culture; how social practices have emerged out of computer-related industries; how contemporary apocalyptic narratives reflect the anxieties of a U.S. culture facing global challenges; and how design, play, and technology help us understand the histories and ideals behind the digital architectures that mediate our everyday actions.

India's foreign policy has witnessed a dramatic transformation since the end of the Cold War. Though academic study of Indian foreign policy has also shown a degree of maturity, theoretical developments have been underwhelming. Scholars have introduced new concepts and examined Indian foreign policy through new prisms, but a cohesive research agenda has not yet been charted. This volume intends to fill that void. It brings together new cutting-edge research in the field of Indian foreign policy - both at the theoretical and empirical level - so as to shape the discourse on foreign policy of one of the most important players in global politics. This volume explores key concepts like 'constructivism' and 'territoriality' and analyses their contribution to the academic discourse on Indian foreign policy. Issues such as the 'Indo-Pacific' and the 'responsibility to protect' have also been examined to address the expanding horizons of Indian foreign policy.

the ever-growing field of study of literary representations of masculinities, it seems timely to not only review its development and main contributions to the larger field of masculinity studies, but also to look at its latest advances and new directions. These are precisely the two main aims of *Masculinities and Literary Studies*, which seeks to explore the conjunction between these two fields while exploring some of the latest developments and new directions resulting from such intersections. If much of the existing masculinity scholarship has traditionally been grounded in a specific discipline, this volume also seeks to provide an innovative methodological approach to the subject of literary masculinities by proving the applicability of the latest interdisciplinary masculinity scholarship - namely, sociology, social work, psychology, economics, political science, ecology, etc. - to the literary analysis, thus crossing the traditional boundary between the Social Sciences and the Humanities in new and profound ways. Presenting the latest advances in masculinity scholarship, this interdisciplinary book will appeal to gender and masculinity scholars from a wide variety of fields, including sociology and social work, psychology, philosophy, political science, and cultural and literary studies.

It offers a comprehensive, multi-disciplinary and authoritative contribution to Africa–China studies. interest in researching multilingualism and the different facets of teaching and learning foreign languages.

While the US-Japan alliance has strengthened since the end of the Cold War, Japan has, almost unnoticed, been building security ties with other partners, in the process reducing the centrality of the US in Japan's security. This book explains why this is happening. Japan pursued security isolationism during the Cold War, but the US was the exception. Japan hosted US bases and held joint military exercises even while shunning contacts with other militaries. Japan also made an exception to its weapons export ban to allow exports to the US. Yet, since the end of the Cold War, Japan's security has undergone a quiet transformation, moving away from a singular focus on the US as its sole security partner. Tokyo has begun diversifying its security ties. This book traces and explains this diversification. The country has initiated security dialogues with Asian neighbors, assumed a leadership role in promoting regional multilateral security cooperation, and begun building bilateral security ties with a range of partners, from Australia and India to the European Union. Japan has even lifted its ban on weapons exports and co-development with non-US partners. This edited volume explores this trend of decreasing US centrality alongside the continued, and perhaps even growing, security (inter) dependence with the US. *New Directions in Japan's Security* is an essential resource for scholars focused on Japan's national security. It will also interest on a wider basis those wishing to understand why Japan is developing non-American directions in its security strategy.
