So, you want to sell online? Great! In my opinion, there has never been a better time to sell online. More and more people are doing more and more of their shopping online, and more buyers mean more opportunity for online sellers! More opportunity also means more competition, but don't let this worry you. If there are more opportunities to make money, then more sellers will enter the market. You should see this as a positive marker that there is definitely money to be made. If there wasn't good money to be made, would sellers, including yourself, be

entering this market? Of course not! More sellers? More competition? This may sound intimidating, and that may be the reason why you bought this book. The information contained in this book will allow you to buy smart, lower your costs, increase your margins, and source products more efficiently than your competition. Your competition will be way more scared of you than you should ever be of them after you read this book. If they are not using the techniques and strategies outlined in this book, then there is little doubt that their margins are lower than yours are, which means that they are working harder than you are (and for less money). If that trend continues, they will eventually put themselves out of business while your business continues to grow and remain highly profitable. Knowledge is power. Never before in human history has that phrase been more accurate. What you will acquire in this book is the knowledge of how to source products online like a professional reseller. So, what does all of this have to do with product sourcing? It's been said that when you are sourcing products to sell, you make your money when you buy. This is because if you are buying smart, you are buying at a cost that is sure to maintain your margins. Do you actually 'make money' when you buy? No, of course not. But if you buy smart, while you may not always make as much money as you originally expected, you significantly reduce your risk of ever losing money on a purchase

for resale. You are using tools, apps, knowledge, strategies, and techniques that allow you to not only find great products to resell, but also to get them at the absolute lowest possible price. This can significantly lower your risk when making buying decisions, almost to the point of zero. You know that you will be able to sell the products for a profit and when you have enough margins built into the products, you will still be profitable even if you have to lower price due to changing market conditions. One problem that new (and existing) sellers run into is what to sell. Even if they know what to sell, they then need to know where to get it. And even if they know where to get it, they need to know the best way to make their purchases in order to source their products at the absolute lowest possible price. This book will explain how to quickly identify products with great resale potential to buy when shopping online using tools, programs, and apps. We'll discuss many different ways to lower your final purchase price through discounts, coupons, rebates, and more. There are really no limits as to what types of products you can source and from where you can source them. With the tools and apps available to today's online sellers, many have figured out that they do not want to discriminate in what they sell. They will sell anything that is profitable! They just need to be able to quickly identify the salability and margin of an item and then they can decide if the item fits into their individual business

Just getting started with product research and sourcing? Stuck trying to find ideas or find that "perfect" winning product? Want to find good selling products that others are ignoring? Interested in wholesale or private label products? If you answered yes, then this book is for you. If you are an experienced seller or are looking to do arbitrage this book will have less value as I don't discuss sourcing by arbitrage. I don't do arbitrage, so I don't teach it. This book is written for the new or struggling seller wanting to source wholesale or private label products. What you will learn: Basic steps for finding top selling products How to generate product ideas and look for trends How to validate demand Tips for finding suppliers Analyzing data to help you pick a product It took me 5 months of research before I pulled the trigger on my first products to sell on Amazon. Five months and countless hours. I have pages of notes with product ideas in many different categories. Some were wholesale products, others were ideas for my own products. I had some money set aside to buy inventory. But I couldn't commit. I was looking for...not necessarily the perfect product, but, well yeah, the perfect product. Fear of choosing "wrong" was holding me back. I knew that product selection was key to success so I needed to choose right. Another part of the problem was I had bigger ideas-I wanted to create a brand and I had some ideas as to what sorts of products I would carry. But those ideas required more capital than I was willing to invest for my

first product. As a result, I put so much pressure on myself to dream big and think towards the future that I did...nothing! Another hold up was I was a little skittish to follow the advice to source from Chinese suppliers. It seemed so complicated for a beginner. Could I not take a little less profit and source domestically? Were there not manufacturers that could produce my ideas in North America? Yes, and yes. Ultimately the delays helped me because I learned a lot by joining Facebook groups and listening to and learning from the experiences of others. I devoured the advice in forums as well as blogs, books, webinars, and courses. I learned of the pitfalls of private label that the gurus selling you the dream never talk about. And finally, I did pull the trigger. I put together this guide to help any of you who are feeling a little gun-shy too. I put this book together for all of you who have the brains to say "Hey, if everyone buys top 100 selling products wont that saturate the market?" I put this book together to help you find great products from many different approaches. After reading this, you should feel confident enough to find a product and get started with your e-commerce business.

So, you want to sell online? Great! In my opinion, there has never been a better time to sell online. More and more people are doing more and more of their shopping online, and more buyers mean more opportunity for online sellers! More opportunity also means more competition, but don't let this worry you. If there are more opportunities to

make money, then more sellers will enter the market. You should see this as a positive marker that there is definitely money to be made. If there wasn't good money to be made, would sellers, including yourself, be entering this market? Of course not! More sellers? More competition? This may sound intimidating, and that may be the reason why you bought this book. The information contained in this book will allow you to buy smart, lower your costs, increase your margins, and source products more efficiently than your competition. Your competition will be way more scared of you than you should ever be of them after you read this book. If they are not using the techniques and strategies outlined in this book, then there is little doubt that their margins are lower than yours are, which means that they are working harder than you are (and for less money). If that trend continues, they will eventually put themselves out of business while your business continues to grow and remain highly profitable. Knowledge is power. Never before in human history has that phrase been more accurate. What you will acquire in this book is the knowledge of how to source products online like a professional reseller. So, what does all of this have to do with product sourcing? It's been said that when you are sourcing products to sell, you make your money when you buy. This is because if you are buying smart, you are buying at a cost that is sure to maintain your margins. Do you actually 'make money' when you buy? No, of course not. But if you buy smart, while you may not always make as much money as you originally expected, you significantly reduce your risk of ever losing money on a purchase for

resale. You are using tools, apps, knowledge, strategies, and techniques that allow you to not only find great products to resell, but also to get them at the absolute lowest possible price. This can significantly lower your risk when making buying decisions, almost to the point of zero. You know that you will be able to sell the products for a profit and when you have enough margins built into the products, you will still be profitable even if you have to lower price to due to changing market conditions. One problem that new (and existing) sellers run into is what to sell. Even if they know what to sell, they then need to know where to get it. And even if they know where to get it, they need to know the best way to make their purchases in order to source their products at the absolute lowest possible price. This book will explain how to quickly identify products with great resale potential to buy when shopping online using tools, programs, and apps. We'll discuss many different ways to lower your final purchase price through discounts, coupons, rebates, and more. There are really no limits as to what types of products you can source and from where you can source them. With the tools and apps available to today's online sellers, many have figured out that they do not want to discriminate in what they sell. They will sell anything that is profitable! They just need to be able to quickly identify the salability and margin of an item and then they can decide if the item fits into their individual business model.

Such models offer an effective way of incorporating reliable data in a concise form, provide an approach complementary to the techniques of molecular biology, and help to inform and direct future research.
