The research area of music information retrieval has gradually evolved to address the challenges of effectively accessing and

interacting large collections of music and associated data, such as styles, artists, lyrics, and reviews. Bringing together an interdisciplinary array of top researchers, Music Data Mining presents a variety of approaches to successfully employ data mining techniques for the purpose of music processing. The book first covers music data mining tasks and algorithms and audio feature extraction, providing a framework for subsequent chapters. With a focus on data classification, it then describes a computational approach inspired by human auditory perception and examines instrument recognition, the effects of music on moods and emotions, and the connections between power laws and music aesthetics. Given the importance of social aspects in understanding music, the text addresses the use of the Web and peer-to-peer networks for both music data mining and evaluating music mining tasks and algorithms. It also discusses indexing with tags and explains how data can be collected using online human computation games. The final chapters offer a balanced exploration of hit song science as well as a look at symbolic musicology and data mining. The multifaceted nature of music information often requires algorithms and systems using sophisticated signal processing and machine learning techniques to better extract useful information. An excellent introduction to the field, this volume presents state-of-the-art techniques in music data mining and information retrieval to create novel ways of interacting with large music collections.

This book examines early and silent cinema and its contexts in Ireland, 1895-1921. It explores the extent to which cinema fostered a new way of looking in and at Ireland and the extent to which the new technology inherited forms of looking from the image-producing cultural practices of the theatre, tourism, and such public events as state occasions, political protests, and sports meetings. It argues that before cinema emerged as an independent institution in the late 1910s, it was comprehensively intermedial, not only adapting to the presentational strategies of such forms as the fairground attraction, the melodrama, and the magic lantern lecture, but actually constituting these forms and altering them in the process. In locating cinema in relation to popular and elite culture during a key period of Irish history, it draws in particular on surviving films and photographs; articles and illustrations in newspapers, magazines, and trade journals; contemporary accounts; and official documents. Working against approaches that see early cinema as a precursor to the so-called 'classical' cinema of the 1920s onwards, it provide its readers with a wealth of contemporary material that allows them to see early cinema in its own terms as an evolving (audio-) visual form.

Silver details the economic forces that persuaded him to put Silveto to rest and to return to the studios of such major jazz recording labels as Columbia, Impulse, and Verve, where he continued expanding his catalogue of new compositions and making recordings that are at least as impressive as his earlier work. Brad Stone enjoyed unprecedented access to current and former Amazon employees and Bezos family members, giving readers the first in-depth, fly-on-the-wall account of life at Amazon. Divided World Divided Class charts the history of the 'labour aristocracy' in the capitalist world system, from its roots in colonialism to its birth and eventual maturation into a full-fledged middle class in the age of imperialism. It argues that pervasive national, racial and cultural chauvinism in the core capitalist countries is not primarily attributable to 'false class consciousness', ideological indoctrination or ignorance as much left and liberal thinking assumes. Rather, these and related forms of bigotry are concentrated expressions of the major social strata of the core capitalist nations' shared economic interest in the exploitation and repression of dependent nations. The book demonstrates not only how redistribution of income derived from super-exploitation has allowed for the amelioration of class conflict in the wealthy capitalist countries, it also shows that the exorbitant 'super-wage' paid to workers there has meant the disappearance of a domestic vehicle for socialism, an exploited working class. Rather, in its place is a deeply conservative metropolitan workforce committed to maintaining, and even extending, its privileged position through imperialism. This second edition includes new material such as data on growing inequality between the richest and poorest countries; data illustrating rising real wages in Imperial Britain; explication of the concepts of value, monopoly capital and unequal exchange and their ramifications for the global class structure; discussion of social imperialism on the left; responses to critiques surrounding the thesis of mass embourgeoisement through imperialism; as well as further information on a range of subjects.
