Based on a true story: What if you could go back in time to record every relationship you ever had, would it inspire you? Make you cringe? Or would you read it with an open mind to see where things went wrong and use it to learn lessons that you can take to your next relationship? Eleanor did exactly this, she recorded every relationship she had on her quest to find love. Will she learn from her mistakes? How many frogs will she have to kiss along the way? And will she ever find what she is looking for? Only time will tell...

In 1984 Peugeot launched the 205 1.6 GTi, which not only changed Peugeot's image forever, but also set a new benchmark for 'hot hatches' eight years after the legendary Golf GTI had raised the bar. Weak points, rust traps, and potential mechanical defects are all laid bare by an expert for the would be buyer. Clear 205-specific photos illustrate problem areas and good points too, as well as model variations. The author also embraces customized and mechanically modified cars. A unique points scoring system lets you evaluate your potential purchase like an expert and also to determine which price category it should fall into. With both mileage and particularly condition having a marked affect on potential prices, the author gives sound advice on what is worth restoring and what, however tempting, is likely to cost a new owner an unrecoverable fortune. Weak points, rust traps, and potential mechanical defects are laid out for the reader, with clear 205-specific guidelines offered on the practicalities of rectifying such problems.
