In this major synthesis of cross-cultural research, 34 distinguished scientists study 25 common metabolic and degenerative diseases characteristic of all advanced Western nations and then examine their incidence in developing countries, among both hunter-gatherers and peasant agriculturalists. Thus the authors provide a unique opportunity to compare epidemiological data reflecting modern modes of life with data influenced by habits and diets dating back 400 generations to the advent of agriculture, and even 200,000 generations or more to the dawn of man. The results confirm the view that diseases like hypertension, lung cancer, diverticular disease, and appendicitis are maladaptations to environmental factors introduced since the Industrial Revolution. They also demonstrate that such diseases become more prevalent when Western lifestyles are adopted in primitive societies. Certain studies reveal a regression of disease incidence when exercise is increased and a diet high in starch and fiber, low in fat and salt, is resumed--characteristics of a simpler way of life. *Western Diseases* greatly broadens our perspective on some of the most vexing health problems in our society. It will be an essential reference for epidemiologists, nutritionists, and gastroenterologists in particular.

Paleo Approach and The Healing Kitchen comes the most comprehensive resource to date for those seeking a scientifically founded nutritional approach to optimal health. In her signature approachable yet comprehensive style, Sarah Ballantyne, PhD, has laid a complete foundation for understanding the principles of the Paleo template in order to inform and empower people's day-to-day choices.

Combined with an unprecedented collection of practical strategies, tips, and visual guides, plus more than 200 delicious recipes and twenty meal plans for a variety of health goals, this book is a one-stop-shop for nutrition nerds, health nuts, and gourmards alike. The Paleo diet is a nutrient-dense, anti-inflammatory whole-foods diet based on eating a variety of quality vegetables, meats, seafood, fruits, eggs, nuts, seeds, healthy fats, herbs, and spices. It is clinically proven to improve health by providing complete and balanced nutrition while omitting most processed and refined foods and empty calories. Far from being a historical re-enactment, the Paleo framework is derived from thousands of scientific studies that illuminate our understanding of which foods support health and which foods undermine it. Combined with attention to essential lifestyle factors like physical activity, sleep, and stress, the Paleo template is quite simply the most robust approach out there for optimal health, performance, and longevity! With the perfect balance of detailed

explanations, accessible summaries of actionable information, and visual guides, *Paleo Principles* provides everything readers need to achieve their best health. Beyond a set of rules, this book teaches precisely why some foods are better choices than others while providing indispensable resources like food lists, shopping guides, and cooking how-tos. Health comes from more than just the foods on our plates, however, which is why Dr. Ballantyne also incorporates a focus on lifestyle factors known to improve health, including being active, getting enough sleep, managing stress, and connecting with community. People needn't worry that following a Paleo-style diet will leave them feeling hungry or deprived. Healthy re-creations of family-friendly favorites, from pizza to pancakes, prove that you can regain your health and love every bite! *Paleo Principles* contains more than 200 nutritious Paleo recipes that are free of gluten, grain, dairy, legumes, and refined sugar—including kitchen basics, breakfasts, soups and salads, main dishes, side dishes, baked goods, and desserts—all labeled for the top eight allergen ingredients as well as other common food sensitivities, like FODMAPs and nightshades, and the Autoimmune Protocol. Adapt the Paleo template to serve your specific needs and health goals by using *Paleo Principles*' guides on customizing macronutrient ratios, navigating gray-area foods, troubleshooting chronic illnesses and

food sensitivities, transitioning to a Paleo-style diet, understanding your body's individual response to different foods, and balancing Paleo priorities with competing interests for lifelong success. Combine these resources with twenty meal plans reflecting the most common health objectives, and you have the know-how to personalize your plan to fit your life. Join the millions of people taking back their health by following a Paleo lifestyle. Whether your goal is to lose weight, increase performance, reduce cardiovascular disease risk factors, prevent cancer, mitigate autoimmune disease, reverse diabetes, or simply achieve your best health, Paleo Principles gives you answers and a veritable toolkit to make lasting, positive change toward better health. An acclaimed surgeon specializing in weight loss delivers a paradigm-shifting examination of the diet and health industry's focus on protein, explaining why it is detrimental to our health, and can prevent us from losing weight. Whether you are seeing a doctor, nutritionist, or a trainer, all of them advise to eat more protein. Foods, drinks, and supplements are loaded with extra protein. Many people use protein for weight control, to gain or lose pounds, while others believe it gives them more energy and is essential for a longer, healthier life. Now, Dr. Garth Davis, an expert in weight loss asks, "Is all this protein making us healthier?" The answer, he emphatically argues, is NO. Too much protein is

actually making us sick, fat, and tired, according to Dr. Davis. If you are getting adequate calories in your diet, there is no such thing as protein deficiency. The healthiest countries in the world eat far less protein than we do and yet we have an entire nation on a protein binge getting sicker by the day. As a surgeon treating obese patients, Dr. Davis was frustrated by the ever-increasing number of sick and overweight patients, but it wasn't until his own health scare that he realized he could do something about it. Combining cutting-edge research, with his hands-on patient experience and his years dedicated to analyzing studies of the world's longest-lived populations, this explosive, groundbreaking book reveals the truth about the dangers of protein and shares a proven approach to weight loss, health, and longevity.

Includes recipes from Chef Del Sroufe, author of the bestselling *Forks Over Knives—The Cookbook and Better Than Vegan* Nearly half of Americans take at least one prescription medicine, with almost a quarter taking three or more, as diseases such as diabetes, obesity, and dementia grow more prevalent than ever. The problem with medicating common ailments, such as high blood pressure or elevated cholesterol, is that drugs treat symptoms—and may even improve test results—without addressing the cause: diet. Overmedicated, overfed, and malnourished, most

Americans fail to realize the answer to lower disease rates doesn't lie in more pills but in the foods we eat. With so much misleading nutritional information regarded as common knowledge, from "everything in moderation" to "avoid carbs," the average American is ill-equipped to recognize the deadly force of abundant, cheap, unhealthy food options that not only offer no nutritional benefits but actually bring on disease. In *Food Over Medicine*, Pamela A. Popper, PhD, ND, and Glen Merzer invite the reader into a conversation about the dire state of American health—the result of poor nutrition choices stemming from food politics and medical misinformation. But, more important, they share the key to getting and staying healthy for life. Backed by numerous scientific studies, *Food Over Medicine* details how dietary choices either build health or destroy it. *Food Over Medicine* reveals the power and practice of optimal nutrition in an accessible way.

The authors offer unique insights into the factors that make us susceptible to dietary and lifestyle excesses, and present ways to restore the biological processes designed by nature to keep us running at maximum efficiency and vitality. A wake-up call to even the most health conscious people, *The Pleasure Trap* boldly challenges conventional wisdom about sickness and unhappiness in today's contemporary culture, and offers groundbreaking solutions for achieving change. Authors Douglas

Lisel, Ph.D., and Alan Goldhamer, D.C., provide a fascinating new perspective on how modern life can turn so many smart, savvy people into the unwitting saboteurs of their own well-being. Inspired by stunning original research, comprehensive clinical studies, and their successes with thousands of patients, the authors construct a new paradigm for the psychology of health, offering fresh hope for anyone stuck in a self-destructive rut. Integrating principals of evolutionary biology with trailblazing, proactive strategies for well

Stop Being Manipulated by the Animal Foods

Industry Stop the meat industry from eating into your wallet. Few Americans are aware of the realities of the economic system that supports our country's supply of animal foods. Yet these forces affect us in ways we can hardly imagine. Though we only fork over a few dollars per pound of meat products at the grocery store, we end up paying much more than that in tax dollar-fueled government subsidies—\$38 billion more, to be exact. And that's just one layer of hidden costs. But with the help of sustainability advocate and author David Robinson Simon's *Meatonomics*, we can come up with informed, lasting solutions. Improve your health, your life—and the world. Animal food producers influence our buying choices with artificially low prices, misleading messages, and heavy legislation and regulation control. But learning how these forces work can help

you improve both your personal life and the world in so many important ways. Life-changing foods like those in a plant-based diet will do more than just improve your waistline. The information in Meatonomics can help you save money, lose weight, live longer, boost your health, protect animals and the planet from abuse, and preserve rural communities worldwide. Learn to make better, more informed decisions on what to buy and how to eat. In Meatonomics, Dr. David Robinson Simon uses his excellent truth-finding skills, garnered from his expertise as a lawyer, to show you:

- How government marketing is influencing what we think of as healthy eating
- Just how much of our money is being burnt through by the meat production industry
- What we can do to change ourselves and our country for the better

If you were fascinated by sustainable food and healthy eating books like Proteinaholic, Eating Animals, or How Not to Die, you'll be empowered to overcome the meat industry's manipulation with Meatonomics. New York Times best-selling author offers a one-of-a-kind program to help readers finally become happy, thin, and free! Sustainable weight loss expert Susan Peirce Thompson builds on the success of her Bright Line Eating Boot Camps and best-selling book with: The Official Bright Line Eating Cookbook! The Official Bright Line Eating Cookbook is designed to help readers transition to this transformative way of

life as smoothly and solidly as possible. The first book gave explicit instructions as to what the guidelines for each meal are, but no specific suggestions as to what to actually cook. This book provides recipes, as well as tons of tips, tricks, and tools culled directly from the Bright Line Eating community, the "Bright Lifers" themselves! Because Bright Line Eating is unlike any food program out there, this cookbook will be unlike any seen before. It's broken down by warm bowls, cold bowls, and plates. There will be a large section on salad dressings--because Bright Lifers live and die by their dressing! Note: there will not be any "cheat" foods, because those foods keep addiction alive in the brain, slow weight loss, and leave you vulnerable to old habits. Special features:

- 75+ delicious recipes
- Guidance for getting started and staying the course
- Tips and tricks for getting the most from the plan
- Jaw-dropping before-and-after stories and photos from successful Bright Lifers
- and more!

This will be an invaluable companion to the first book, and, for some, an entry into Bright Line Eating and an entirely new way of eating.

New York Times Bestseller What happens when you eat an apple? The answer is vastly more complex than you imagine. Every apple contains thousands of antioxidants whose names, beyond a few like vitamin C, are unfamiliar to us, and each of these powerful chemicals has the potential to play an important role in supporting our health. They impact thousands upon thousands of metabolic reactions inside the human body. But calculating the specific influence of each of these chemicals isn't nearly sufficient to explain the effect of the apple as a whole. Because almost every chemical can

affect every other chemical, there is an almost infinite number of possible biological consequences. And that's just from an apple. Nutritional science, long stuck in a reductionist mindset, is at the cusp of a revolution. The traditional "gold standard" of nutrition research has been to study one chemical at a time in an attempt to determine its particular impact on the human body. These sorts of studies are helpful to food companies trying to prove there is a chemical in milk or pre-packaged dinners that is "good" for us, but they provide little insight into the complexity of what actually happens in our bodies or how those chemicals contribute to our health. In *The China Study*, T. Colin Campbell (alongside his son, Thomas M. Campbell) revolutionized the way we think about our food with the evidence that a whole food, plant-based diet is the healthiest way to eat. Now, in *Whole*, he explains the science behind that evidence, the ways our current scientific paradigm ignores the fascinating complexity of the human body, and why, if we have such overwhelming evidence that everything we think we know about nutrition is wrong, our eating habits haven't changed. *Whole* is an eye-opening, paradigm-changing journey through cutting-edge thinking on nutrition, a scientific tour de force with powerful implications for our health and for our world.

patients--is that gut health is the key to boosting our metabolism, balancing our hormones, and taming the inflammation that causes a host of diseases. And the scientifically proven way to fuel our guts is with dietary fiber from an abundant variety of colorful plants. Forget about the fiber your grandmother used to take--the cutting-edge science on fiber is incredibly exciting. As Dr. B explains, fiber energizes our gut microbes to create powerhouse postbiotics called short-chain fatty acids (SCFAs) that are essential to our health. SCFAs are scientifically proven to promote weight loss, repair leaky gut, strengthen the microbiome, optimize the immune system, reduce food sensitivities, lower cholesterol, reverse type 2 diabetes, improve brain function, and even prevent cancer. Restrictive fad diets starve the gut of the critical fiber we need, weaken the microbes, and make our system vulnerable. As a former junk-food junkie, Dr. B knows firsthand the power of fiber to dramatically transform our health. The good news is that our guts can be trained. Fiber-rich, real foods--with fruits, vegetables, whole grains, seeds, nuts, and legumes--start working quickly and maintain your long-term health, promote weight loss, and allow you to thrive and feel great from the inside out. With a 28-day jumpstart program with menus and more than 65 recipes, along with essential advice on food sensitivities, *Fiber Fueled* offers the blueprint to start turbocharging your gut for lifelong health today.

In this paperback edition is a foreword by activist and

author John Robbins and a reader's group study guide. This ground-breaking work, voted one of the top ten books of 2010 by VegNews Magazine, offers an absorbing look at why and how humans can so wholeheartedly devote ourselves to certain animals and then allow others to suffer needlessly, especially those slaughtered for our consumption. Social psychologist Melanie Joy explores the many ways we numb ourselves and disconnect from our natural empathy for farmed animals. She coins the term "carnism" to describe the belief system that has conditioned us to eat certain animals and not others. In *Why We Love Dogs, Eat Pigs, and Wear Cows* Joy investigates factory farming, exposing how cruelly the animals are treated, the hazards that meatpacking workers face, and the environmental impact of raising 10 billion animals for food each year. Controversial and challenging, this book will change the way you think about food forever. While pharmaceutical companies rake in billions, the health of a nation continues to decline rapidly, leaving patients and physicians searching for answers in all the wrong places. *The Empty Medicine Cabinet: The Pharmacist's Guide to the Hidden Danger of Drugs and the Healing Powers of Food* wastes no time in explaining why this is so, offering solutions that target the cause of disease rather than the symptoms of poor health. Like most healthcare professionals, Dustin Rudolph, PharmD, entered the field of medicine with one goal in mind—to help his patients get healthy. As a pharmacist, Rudolph believed the best way to accomplish this was through pills, procedures, and surgeries. Boy, was he wrong! His

story, life experiences, and professional expertise serve as the foundation for this book. The business model of a profit-based healthcare system is exposed, resulting in a steady stream of chronically sick, lifelong customers. Rudolph offers a cost-free, side-effect-free solution rooted in the discipline of lifestyle medicine and plant-based nutrition. Backed by an array of scientific studies, readers hear the truth in *The Empty Medicine Cabinet*. Heart disease, type 2 diabetes, cancer, obesity, autoimmune diseases, and much more are discussed at length in part one. Part two presents the facts on using food as medicine. Many long-held beliefs in nutrition and health are called into question, answered emphatically and factually in simple, easy-to-understand layman's terms of the complex science behind it all. A surprising, yet accurate, review of the scientific literature is also undertaken on many popular, over-the-counter supplements taken by many in today's society. With a total of 50 mouthwatering, flavor-filled recipes included, *The Empty Medicine Cabinet* is one prescription you don't want to miss out on! With more and more physicians promoting grass-fed beef, free-range eggs, and organic butter as miracle foods, have we forgotten about the scientifically proven power of a vegan diet? Leading cardiologist Dr. Joel Kahn wants to set the record straight—eating plants can save your life and the planet too. With *The Plant-Based Solution*, Dr. Kahn provides a comprehensive guide for moving toward a plant-based diet, supported by decades of scientific studies on our health and our environment. A vegan of over 30 years, Dr. Kahn includes a 21-day plan for implementing changes in your own life, complete with easy and delicious recipes from his popular vegan restaurant, the Greenspace Café in Ferndale, Michigan. Join Dr. Kahn to explore: Expanding compassion through vegan living; how plant-based eating impacts global warming; plants and your gut health; major religions and veganism; the surprising link between vegan diets and sex drive; reversing cancer and autoimmune disease; why plants might hold the key to better aging; and more! By now, the low-carb diet's refrain is a familiar one: Bread is bad for you. Fat doesn't matter. Carbs are the real reason you can't lose weight. The low-carb universe Dr. Atkins brought into being continues to expand. Low-carb diets, from South Beach to the Zone and beyond, are still the go-to method for weight-loss for millions. These diets' marketing may differ, but they all share two crucial components: the condemnation of "carbs" and an emphasis on meat and fat for calories. Even the latest

diet trend, the Paleo diet, is—despite its increased focus on (some) whole foods—just another variation on the same carbohydrate fears. In *The Low-Carb Fraud*, longtime leader in the nutritional science field T. Colin Campbell (author of *The China Study* and *Whole*) outlines where (and how) the low-carb proponents get it wrong: where the belief that carbohydrates are bad came from, and why it persists despite all the evidence to the contrary. The foods we misleadingly refer to as “carbs” aren't all created equal—and treating them that way has major consequences for our nutritional well-being. If you're considering a low-carb diet, read this e-book first. It will change the way you think about what you eat—and how you should be eating, to lose weight and optimize your health, now and for the long term.

traditional, often drastic medical approach and The McDougall Program's nutritionally based alternative. As featured in the book and movie Forks and Knives, John A McDougall delivers a powerful and effective food regiment. We're fatter, sicker and hungrier than ever, and the diet industry – with its trendy weight-loss protocols and eat-this-not that ratios of fat, carbs and protein – offers only temporary short-term solutions at the expense of our permanent long-term health. As a result, we're trapped in a cycle of food addiction, toxic hunger and overeating. In *The End of Dieting*, Dr Joel Fuhrman, a doctor and the New York Times bestselling author of *Eat to Live* and *The End of Diabetes*, shows us how to break free from this vicious cycle once and for all. Dr Fuhrman lays out in full all the dietary and nutritional advice necessary to eat our way to a healthier and happier life. At the centre of his revolutionary plan is his trademark health formula:  $\text{Health} = \text{Nutrients}/\text{Calories}$ . Foods high in nutrient density, according to Dr Fuhrman, are more satisfying than foods high in calories. They eliminate our cravings for fat, sweets and carbs. The more nutrient-dense food we consume, the more our bodies can function as the self-healing machines they're designed to be. Weight will drop, diseases can reverse course and disappear and overall our lives can be longer and healthier. The core of *The End of Dieting* is an easy to follow programme that kickstarts your new life outside of the diet mill:

- Simple meals for 10 days, to retrain your taste buds and detox
- Gourmet flavourful recipes

(originally published as *My Beef with Meat*), Rip Esselstyn arms readers with the 36 most powerful facts that prove, once and for all, that a plant-based diet can save your life. Do you want to: Prevent cancer, heart attacks, stroke, and Type 2 Diabetes? Eat plants! Have stronger bones than milk could ever give you? Eat plants! Avoid dangerous carcinogens and contaminants? Eat plants! Lose weight and look great? Eat plants! On top of these arguments are 150 other reasons why plants rule--as in 150 delicious, mouth-watering Engine 2 recipes, including 10 that are exclusive to this new edition. Prepare to eat well, be healthy, and live plant-strong!

Told by the man who kicked off the infamous lawsuit between Oprah and the cattlemen, *Mad Cowboy* is an impassioned account of the highly dangerous practices of the cattle and dairy industries. Howard Lyman's testimony on *The Oprah Winfrey Show* revealed the deadly impact of the livestock industry on our well-being. It not only led to Oprah's declaration that she'd never eat a burger again, it sent shock waves through a concerned and vulnerable public. A fourth-generation Montana rancher, Lyman investigated the use of chemicals in agriculture after developing a spinal tumor that nearly paralyzed him. Now a vegetarian, he blasts through the propaganda of beef and dairy interests—and the government agencies that protect them—to expose an animal-based diet as the primary cause of cancer, heart disease, and obesity in this country. He warns that the livestock industry is repeating the mistakes that led to Mad Cow disease in England while simultaneously causing serious damage to the environment. Persuasive, straightforward, and full of the down-home good humor and optimism of a son of the soil, *Mad Cowboy* is both an inspirational story of personal transformation and a convincing call to action for a plant-based diet—for the good of the planet and the health of us all. In this comprehensive cookbook, Laura Theodore, the award-

From the physician behind the wildly popular NutritionFacts website, How Not to Die reveals the groundbreaking scientific evidence behind the only diet that can prevent and reverse many of the causes of disease-related death. The vast majority of premature deaths can be prevented through simple changes in diet and lifestyle. In How Not to Die, Dr. Michael Greger, the internationally-renowned nutrition expert, physician, and founder of NutritionFacts.org, examines the fifteen top causes of premature death in America—heart disease, various cancers, diabetes, Parkinson's, high blood pressure, and more—and explains how nutritional and lifestyle interventions can sometimes trump prescription pills and other pharmaceutical and surgical approaches, freeing us to live healthier lives. The simple truth is that most doctors are good at treating acute illnesses but bad at preventing chronic disease. The fifteen leading causes of death claim the lives of 1.6 million Americans annually. This doesn't have to be the case. By following Dr. Greger's advice, all of it backed up by strong scientific evidence, you will learn which foods to eat and which lifestyle changes to make to live longer. History of prostate cancer in your family? Put down that glass of milk and add flaxseed to your diet whenever you can. Have high blood pressure? Hibiscus tea can work better than a leading hypertensive drug—and without the side effects. Fighting off liver disease? Drinking coffee can reduce liver inflammation.

Battling breast cancer? Consuming soy is associated with prolonged survival. Worried about heart disease (the number 1 killer in the United States)? Switch to a whole-food, plant-based diet, which has been repeatedly shown not just to prevent the disease but often stop it in its tracks. In addition to showing what to eat to help treat the top fifteen causes of death, *How Not to Die* includes Dr. Greger's Daily Dozen - a checklist of the twelve foods we should consume every day. Full of practical, actionable advice and surprising, cutting edge nutritional science, these doctor's orders are just what we need to live longer, healthier lives.

Did you know that the leading killer in America, cardiovascular disease, is directly linked to meat consumption? Or that you save more water by not eating one pound of beef than you would by not showering for a whole year? *Diet for a New America* simply and eloquently documents these ecological concerns and more, as well as the little-known horrors that animals experience during factory farming. Few of us are aware that the act of eating can be a powerful statement of commitment to our own well-being, and at the same time to the creation of a healthier world. In *Diet for a New America*, you will learn how your food choices can provide ways to enjoy life to the fullest, while making it possible that life, itself, might continue. Heeding this message is without a doubt one of the most practical, economical, and potent things you can do today to heal not only your own life, but also the ecosystem on which all life depends. Reading this book will change your life.

This refreshingly humorous yet effective guide on the oh-so-serious business of parenting reminds us that being a successful parent means first being a successful human. Part philosophy, part implementation, this resource is a must-have for anyone who is or will be a parent.

New York Times bestselling author Dr. Neal Barnard reveals the shocking truth about cheese-the dangerous addiction that is harming your health-and presents a radical program to lose weight and feel great. We've been told that dairy does a body good, but the truth is that cheese can be dangerous. Loaded with calories, fat, and cholesterol, cheese can make you gain weight and leads to a host of health problems like high blood pressure and arthritis. Worse, it contains mild opiates that make it addictive, triggering the same brain receptors as heroin and morphine. In *The Cheese Trap*, Dr. Neal Barnard presents a comprehensive program to help readers break free of their cheese addiction so they can lose weight, boost energy, and improve their overall health. This easy-to-follow diet features a treasury of healthy recipes that will tame even the toughest cravings-from pizza, to lasagna, to ice cream and cheesecake. Gold Winner, 2019 Taste Canada Awards - Health and Special Diets Cookbooks Cheeky registered dietitian, food lover, and YouTube star Abbey Sharp is often described as "Nigella Lawson in a lab coat." In her debut cookbook she shares fun, satisfying, and unbelievably healthy recipes that will ignite your love affair with food. In over 100 recipes, Abbey shows us how she eats: healthy and nourishing meals that are packed with flavour like PB & J Protein Pancakes, Autumn Butternut Squash Mac and Cheese, Stuffed Hawaiian Burgers, Chicken, Sweet Potato and Curry Cauliflower, Chocolate Stout Veggie Chili, Chewy Crackle Almond Apple Cookies, and Ultimate Mini Sticky Toffee Puddings. Many people have asked whether it is possible to combine gaining lean muscle mass with being a vegetarian? More and more people are turning vegetarian either by health choices or by not wanting to aid the cruelty animals suffer worldwide. Either way is a healthy choice for us, the planet and most definitely the animals! Inside this book you'll find 21 recipes which I break down the into: --Breakfast --Lunch --Dinner --Snacks including delicious protein shakes. Each of the 21 recipes includes the all important macro-nutrient information - so that's calories, protein, carbs and fat. At a glance you can see what each meal or shack includes. This allows you to increase those figures by adding your own ingredients. This is so you can quickly go straight to the section you need and start creating mouth-watering meals. A lot of friends keep saying you have to eat red meat and chicken to build muscle. Surely there's not enough quality protein in vegetables? Well I'm here to say it is 100% possible to build high quality rock-hard muscle on a vegetarian diet which doesn't have to include Tofu everyday! Of course your training regime has to be heavy, regular and hard enough to breakdown the muscle fibres. Today we as vegetarians have a huge

array of protein-packed alternatives to meat that are not only jammed with nutrients for building muscle but taste GREAT! Some of these are commonly known, others are not so well known. This led me onto writing this book which essentially covers bodybuilding nutrition - a bodybuilding cookbook - but not complex or overly time-consuming - a bodybuilding cookbook for dummies almost - and I wanted to have as varied and as tasty a meal selection as possible. You can of course swap out ingredients you don't like for other ingredients. You could swap beans for Quorn, or Tofu for Quinoa. You can add extra ingredients to increase your protein intake for a given meal. I also go into the ONE thing you MUST do to make this work and when done correctly can make vegetarianism super easy. Vegetarianism is here, in fact you could say it's the vegetarian times - nutrition for health and healthcare and it's here to stay and only get bigger! So let's get building some serious muscle the healthy way!

The Forever Young program is the scientifically based plan that will bring your life back into synch with your genetic identity, restoring your youthful vigor and glow, while at the same time optimizing your health, quality of life, and longevity." --James O'Keefe, MD and Joan O'Keefe, RD In a field plagued by "miracle" diets and sketchy information, The Forever Young Diet and Lifestyle presents a commonsense plan that improves satiety; promotes wholesome, fresh, and easily obtained foods; and reinforces a rational, holistic, mind-body approach to diet and lifestyle. The program is a complete package that can help provide a lifetime of energy and

good health. Most of our health problems today result from a mismatch between the world we are designed for and the very different one in which we live. The modern American leading a sedentary lifestyle of automobiles, couches, televisions, computers, and junk food is like a fish out of water. Our genes have changed minimally over the past few thousand years, yet our diets and lifestyles have become progressively more divergent from those of our ancient ancestors. The Forever Young Diet and Lifestyle outlines the path back to our natural needs and rhythms. Firmly grounded in the medically proven Hunter-Gatherer diet, the plan easily promotes weight loss, vastly improves energy levels, enhances sleep and concentration, and restores the natural youthful glow we should have at any age. Cardiologist James O'Keefe and his wife, Joan, a registered dietitian, provide a down-to-earth, sensible program that's both satisfying and easy to follow.

When Meredith hit the finish line at the Niagara Falls Marathon last year, people in their living rooms all across America choked up. Who could help it? Here was a young woman who, just a few months earlier, had weighed in at 340 pounds on the hit ABC show Extreme Weight Loss. Now for all the world to see—and merely part way into her one-year effort to pare down—she'd (literally) gone further than she'd ever expected. From barely being able to walk up the stairs to running 26.2 miles in practically no time? The body is an amazing thing. And yet ... it's no match for the brain. It wasn't the strength of Meredith's body propelling her across the Niagara Falls finish line—it was the power of her mind. No

one knows that better than JD Roth, who as the number one producer of TV weight loss shows has helped countless overweight people change their bodies—and lives—for the better. Viewers of *Extreme Weight Loss*, *The Biggest Loser*, *The Revolution* and other transformational shows have seen the “technicians”—the trainers, the nutritionists, the doctors, and other health pros who appear on-screen—but they’ve never seen the heart and soul behind these amazing makeovers. That would be JD, whose production company not only created weight loss television, but who has produced more episodes in the genre than all other producers combined. He’s the behind-the-scenes wizard who gets inside the heads of the shows’ participants, encouraging, persuading, prodding, and inspiring them to succeed. Intimately involved in casting the shows’ contestants, then seeing them through the weight loss process, he’s the guy whose picture they tape onto their elliptical trainers and angrily scream at each night—then hug out of gratitude the next morning. He’s the guy who holds them when they cry and the one who tells them they need to get back on the treadmill even though they’re crying. JD is the shows’ tough-love dad—love being the operative word. Because it’s not just TV to JD; he’s on a mission to change people’s lives. Every fat person (yes, “fat person”—there’ll be no sugarcoating here) knows that you need to move more and eat less to shed pounds. Not exactly rocket science. Yet that simple formula doesn’t get to the root of what makes someone top out at 500 pounds, or sometimes just carry an extra fifty. The missing link in transformative weight loss is

mental and emotional fortitude. Mining the same problem-solving and motivational skills JD has used so successfully with reality show contestants, *The Big Fat Truth* gets readers to address the real reasons they're overweight (and nobody gets away with saying it's because they love food). With his combination of enthusiasm, empathy, no-holds-barred style, and master story-telling abilities, JD helps them unearth and tackle the unresolved issues they've buried under the French fries and chocolate chip cookie. Presented in three parts, *The Big Fat Truth* includes short straight-to-the-point chapters that help readers identify their real issues, create their own reality show, and then shake up their lives to do the impossible. Included throughout are inspiring stories, advice, and before-and-after photos from people JD has helped to lose weight (both on camera and off), along with quick tips for how to stay accountable and a 30-day plan for putting this advice into action.
