NATIONAL BESTSELLER • WINNER OF THE PULITZER PRIZE • A searing, post-apocalyptic novel about a father and son's fight to survive, this "tale of survival and the miracle of goodness only adds to McCarthy's stature as a living master. It's gripping, frightening and, ultimately, beautiful" (San Francisco Chronicle). A father and his son walk alone through burned America. Nothing moves in the ravaged landscape save the ash on the wind. It is cold enough to crack stones, and when the snow falls it is gray. The sky is dark. Their destination is the coast, although they don't know what, if anything, awaits them there. They have nothing; just a pistol to defend themselves against the lawless bands that stalk the road, the clothes they are wearing, a cart of scavenged food—and each other. *The Road* is the profoundly moving story of a journey. It boldly imagines a future in which no hope remains, but in which the father and his son, "each the other's world entire," are sustained by love. Awesome in the totality of its vision, it is an unflinching meditation on the worst and the best that we are capable of: ultimate destructiveness, desperate tenacity, and the tenderness that keeps two people alive in the face of total devastation.

7 billion zombies. 1 man. When the zombie apocalypse hits America, not a soul is left alive. Except Amo. He's a comic book artist. He's a video game world builder. Can social theories forge new paths into an uncertain future? The future has become increasingly difficult to imagine. We might be able to predict a few events, but imagining how looming disasters will coincide is simultaneously necessary and impossible. Drawing on speculative fiction and social theory, *Theory for the World to Come* is the beginning of a conversation about theories that move beyond nihilistic conceptions of the capitalism-caused Anthropocene and toward generative bodies of thought that provoke creative ways of thinking about the world ahead. Matthew J. Wolf-Meyer draws on such authors as Kim Stanley Robinson and Octavia Butler, and engages with afrofuturism, indigenous speculative fiction, and films from the 1970s and '80s to help think differently about the future and its possibilities. Forerunners: *Ideas First* Short books of thought-in-process scholarship, where intense analysis, questioning, and speculation take the lead. Can you survive the Zombie Apocalypse? *Dead Reckon* makes sure you will. You see, *Dead Reckon* is part graphic novel, part apocalypse survival guide, all zombie outbreak-awesomeness! In this first issue you will experience the challenges of an impending zombie outbreak. Is it possible to increase your chances of survival by using geography to prepare for the outbreak? You're darn right it is! And *Dead Reckon* will show you how. This issue is the first in a series designed to complement the *Zombie-Based Learning* curriculum, available at [www.ZombieBased.com](http://www.ZombieBased.com).

On the road to their new home, Daniel's mother Anne falls mysteriously ill. Fearing exposure to the deadly virus, the two must quarantine themselves in an empty town. Exploring postapocalypticism in the Black literary and cultural tradition, this book extends the scholarly conversation on Afro-futurist canon formation through an examination of futuristic imaginaries in representative twentieth and twenty-first century works of literature and expressive culture by Black women in an African diasporic setting. The author demonstrates the implications of Afro-futurist literary criticism for Black Atlantic literary and critical theory, investigating

issues of hybridity, transcending boundaries, temporality and historical recuperation. Covering writers including Octavia Butler, Edwidge Danticat, Nalo Hopkinson, Toni Morrison, Jesmyn Ward and Beyoncé, this book examines the ways Black women artists attempt to recover a raced and gendered heritage, and how they explore an evolving social order that is both connected to and distinct from the past.

Reviews- "It's the last push to reach safety for Long Pork and his very extended family. Lots of fighting, swearing, laughs and tears as Jace carries on with his bumbling, brilliant plans, stumped and his "thoughts out loud". This book examines how contemporary women novelists have successfully transformed and rewritten the conventions of post-apocalyptic fiction. Since the dawn of the new millennium, there has been an outpouring of writing that depicts the end of the world as we know it, and women writers are no exception to this trend. However, the book argues that their fiction is distinctive. Contemporary women's work in this genre avoids conservatism, a nostalgic mourning for the past, and the focus on restoring what has been lost, aspects key to much male authored apocalyptic fiction. Instead, contemporary women writers show readers the ways in which patriarchy and neo-colonialism are intrinsically implicated in the disasters they envision, and offer qualified hope for a new beginning for society, culture and literature after an imagined apocalyptic event. Exploring science, nature and matter, the posthuman body, the maternal imaginary, time, narrative and history, literature and the word, and the post-secular, the book covers a wide variety of writers and addresses issues of nationality, race and ethnicity, as well as gender and sexuality.

Visions of the American city in post-apocalyptic ruin permeate literary and popular fiction, across print, visual, audio and digital media. American Cities in Post-Apocalyptic Science Fiction explores the prevalence of these representations in American culture, drawing from a wide range of primary and critical works from the early-twentieth century to today. Beginning with science fiction in literary magazines, before taking in radio dramas, film, video games and expansive transmedia franchises, Robert Yeates argues that post-apocalyptic representations of the American city are uniquely suited for explorations of contemporary urban issues. Examining how the post-apocalyptic American city has been repeatedly adapted and repurposed to new and developing media over the last century, this book reveals that the content and form of such texts work together to create vivid and immersive fictional spaces in ways that would otherwise not be possible. Chapters present media-specific analyses of these texts, situating them within their historical contexts and the broader history of representations of urban ruins in American fiction. Original in its scope and cross-media approach, American Cities in Post-Apocalyptic Science Fiction both illuminates little-studied texts and provides provocative new readings of familiar works such as Blade Runner and The Walking Dead, placing them within the larger historical context of imaginings of the American city in ruins.

EXCERPT: FROM KIMBERLY BETHUNE TOMLINSON'S JOURNAL JUNE 19th, 2024 I'm glad you are reading this. It is a record of what we did when all the gods were dead. We live in the aftermath of the HEDV retrovirus outbreak. The effects of the virus were catastrophic. Billions died. Some people had immunity to the virus: the small percentage of the population that carried one abnormal copy of the hemoglobin gene, the gene that causes sickle cell disease. You see where I'm going, don't you? More people of color have survived, immune, than whites. The usual demographics of the US are now inverted. With the correlation of survival with darker skin color, it has become all race. It always was. Most white people were all right with this change. But you can guess who isn't. White supremacists. MAGA hat wearing, confederate flag waving, tiki torch bearing white people. You can guess why: their whole worldview has been flipped. Health, wealth, beauty—all that was attractive and desirable—is now associated with blackness. Poverty, illness, criminality, the breakdown of family and civility—these are white things now. And the supremacists—in full and utter denial that it is their obscure genetic connection to Africans that has granted them immunity—are apoplectic. They've declared war. They're out to exterminate all people of color. And thanks to their persistent lobbying efforts of the NRA to ensure semi-automatic rifles, high-capacity magazines, and bump stocks were never regulated (even while things such as cars, nasal decongestants, milk, and happy meals were), there are more guns left in America than people. Black people, their white allies, we knew it was time or organize, to save ourselves. So now it's wild west, Mad Max, Red Dawn, Hunger Games, Civil War II, whatever you want to call it. The apocalypse has come. God help us.

Could you survive the collapse? Two weeks after the virus outbreak, the trouble is just beginning. Nick, Jessa, and the rest of the group defended their home against a vicious attack. But the worst is yet to come. When Nick is forced to venture into new territory, he discovers just how deadly the world is now. With modern society in ruins, criminal elements are organizing and trying to take control. Could you find the courage you need? Matt Redmond is the only survivor in his town. He needs to get out if he wants to stay alive. A glimmer of hope lies in New Mexico, 800 miles away. It's a dangerous journey that would test anyone's bravery. And Matt just turned thirteen. Law and order are long gone. An alliance brings hope, but not even new friends can help Nick and the others when disaster strikes. With members of the group scattered, can they find their way back to each other? In this dangerous new world, how far will they go for their makeshift family? Fight to Live is Book 2 in a post-apocalyptic thriller series about people pushing past their limits as they try to survive the end of the world.

While no one looks forward to what comes after Doomsday, author K. Scott Bradbury prompts readers to consider what will happen and how to mentally and physically prepare. In his debut work of nonfiction, *The Post-Apocalyptic Primer*, he examines what life might look like after the end of the world and it's not as abysmal as some might fear. In ten chapters including: *Assessing Your Existing Survival Skills*, *Civilization After the Fall of Civilization*, and *Eat, Drink, and Be Wary*, Bradbury offers commonsense strategies that exponentially boost one's chances of a bright future. Among other Apocalyptic scenarios, he describes what one might expect after a seismic catastrophe, an ice age event, nuclear war, and alien invasion as well as the stages of disorder, which he breaks down into Instant, Coming Soon, and Slow-Burn events. Where someone lives makes a big difference, but besides new threats, there are also new careers, new hobbies, and a whole new adventure, the only trick is to be ready for it.

*Children of Men* meets *The Handmaid's Tale* in this "smartly written" and "splendid" thriller about how far a mother will go to protect her son from a hostile world transformed by the absence of men (Stephen King). Most of the men are dead. Three years after the pandemic known as *The Manfall*, governments still hold and life continues—but a world run by women isn't always a better place. Twelve-year-old Miles is one of the last boys alive, and his mother, Cole, will protect him at all costs. On the run after a horrific act of violence—and pursued by Cole's own ruthless sister, Billie—all Cole wants is to raise her kid somewhere he won't be preyed on as a reproductive resource or a sex object or a stand-in son. Someplace like home. To get there, Cole and Miles must journey across a changed America in disguise as mother and daughter. From a military base in Seattle to a luxury bunker, from an anarchist commune in Salt Lake City to a roaming cult that's all too ready to see Miles as the answer to their prayers, the two race to stay ahead at every step . . . even as Billie and her sinister crew draw closer. A sharply feminist, high-stakes thriller from award-winning author Lauren Beukes, *Afterland* brilliantly blends psychological suspense, American noir, and science fiction into an adventure all its own—and perfect for our times.

Few periods in history are so fundamentally contradictory as the Baroque, the culture flourishing from the mid-sixteenth to the mid-eighteenth centuries in Europe. When we hear the term *Baroque*, the first images that come to mind are symmetrically designed gardens in French chateaux, scenic fountains in Italian squares, and the vibrant rhythms of a harpsichord. Behind this commitment to rule, harmony, and rigid structure, however, the Baroque also embodies a deep fascination with wonder, excess, irrationality, and rebellion against order. The *Oxford Handbook of the Baroque* delves into this contradiction to provide a sweeping survey of the Baroque not only as a style but also as a historical, cultural, and intellectual concept. With its thirty-eight chapters edited by leading expert John D. Lyons, the Handbook explores different manifestations of Baroque culture, from theatricality in architecture and urbanism to opera and dance, from the role of water to innovations in fashion, from mechanistic philosophy and literature to the tension between religion and science. These discussions present the Baroque as a broad cultural phenomenon that arose in response to the enormous changes emerging from the sixteenth century: the division between Catholics and Protestants, the formation of nation-states and the growth of absolutist monarchies, the colonization of lands outside Europe and the mutual impact of European and non-European cultures. Technological developments such as the telescope and the microscope and even greater access to high-quality mirrors altered mankind's view of the universe and of human identity itself. By exploring the Baroque in relation to these larger social upheavals, this Handbook reveals a fresh and surprisingly modern image of the Baroque as a powerful response to an epoch of crisis.

"Combines the spare poetry of *The Road* with the dizzying pace of *28 Days Later*." —Jennie Melamed, author *Gather the Daughters* "A riveting novel." —Eowyn Ivey, bestselling author of *The Snow Child* Remember your just-in-cases. More and more she feels the call of the mainland, and the prospect of finding other survivors. But that is where danger lies, too, in the form of the flesh-eating menace known as the skrake. Then disaster strikes. Alone, pushing an unconscious Maeve in a wheelbarrow, Orpen decides her last hope is abandoning the safety of the island and journeying across the country to reach the legendary banshees, the rumored all-female fighting force that battles the skrake. But the skrake are not the only threat... Sarah Davis-Goff's *Last Ones Left Alive* is a brilliantly original imagining of a young woman's journey to discover her true identity. This collection explores and interrogates the complex role of the child character in the dystopian landscape of post-apocalyptic cinema, including classic, recent, and international films, approached from a variety of theoretical, methodological, and cultural perspectives. This book investigates how contemporary post-apocalyptic novels place maternal characters at the forefront of rebuilding and reconceiving a devastated world. By overturning patriarchal assumptions about the post-catastrophe world and women's place in it, the writers of the maternal post-apocalypse offer a (re)vision of speculative literature.

Four thousand feet underground, Level 7 has been built to withstand the most devastating attack and to be self-sufficient for five hundred years. Selected according to a psychological profile that assures their willingness to destroy all life on Earth, those who are sent down may never return. Originally published in 1959, and with over 400,000 copies sold, this powerful dystopian novel remains a horrific vision of where the nuclear arms race may lead, and is an affirmation of human life and love. *Level 7* merits comparison to Huxley's *A Brave New World* and Orwell's *1984* and should be considered a must-read by all science fiction fans.

This book confronts the question of why our culture is so fascinated by the apocalypse. It ultimately argues that while many see the post-apocalyptic genre as reflective of contemporary fears, it has actually co-evolved with the transformations in our mediascape to become a perfect vehicle for transmedia storytelling. The post-apocalyptic offers audiences a portal to a fantasy world that is at once strange and familiar, offers a high degree of internal consistency and completeness, and allows for a diversity of stories by different creative teams in the same story world. With case studies of franchises such as *The Walking Dead* and *The Terminator*, *Transmedia Storytelling and the Apocalypse* offers analyses of how shifts in media industries and reception cultures have promoted a new kind of open, world-building narrative across film, television, video games, and print. For transmedia scholars and fans of the genre, this book shows how the end of the world is really just the beginning...

Fictional accounts of the end of the world rarely explore the end of humanity; instead they present the end of what we now know and the opportunity to start over. *Postapocalyptic Fiction and the Social Contract: 'We'll Not Go Home Again'* contends that postapocalyptic fiction reflects one of our most basic political motivations and uses these fictional accounts to explore the move from the state of nature to civil society through a Hobbesian, a Lockean, and a Rousseauian lens.

Through journal entries, sixteen-year-old Miranda describes her family's struggle to survive after a meteor hits the moon, causing worldwide tsunamis, earthquakes, and volcanic eruptions.

Earth reels in the aftermath of a savage solar storm, a global disaster of unprecedented proportion which leaves most of the world without electrical power or the means to restore it. Across the world, the responses of unprepared national governments' are too little, too late. In the U.S., order collapses and opportunistic forces rise to fill the power vacuum, as what remains of a self-serving federal bureaucracy prioritizes the survival of politicians and bureaucrats over that of the general population. As chaos and starvation spread, isolated pockets of survivors unite to survive. In Texas, Captain Jordan Hughes and a ragtag group of seamen and ex-Coastguardsmen gather their families close and resist the depredations of a hoard of escaped convicts. Meanwhile, in North Carolina, a similarly determined group of survivors attempts to use salvaged resources, not only to save themselves, but also to feed the hungry. But not everyone is happy about the efforts of the valiant and resourceful few. Secure in his Camp David compound, a corrupt president consolidates power and builds a mercenary force to deal with any possible challenges to his absolute authority and to seize all dwindling resources for 'government use and fair distribution.' Survivors of the natural disaster are thus dealt another blow as they're betrayed by the very government established to protect them. Do they knuckle under to a dictator, or do they PUSH BACK?
