Strategic alliances – partnerships between separate organizations to share resources collaboratively toward mutually beneficial goals – are an important management instrument, but one that is difficult for firms to manage.

Among many desirable outcomes, alliances can reduce costs, provide access to new technology, and improve research and development endeavours, though collaborative arrangements come with risks, peril, and adversities. This renewed and re-worked text connects theory to practice to help understand this important business practice. Strategic Alliance

Management presents an academically grounded alliance development framework, detailing eight stages of alliance development with consideration for specific management challenges. For each stage, readers are presented with state-of-the-art theoretical insights, evidence-based managerial guidelines and a business case illustration. Additional chapters detail on contemporary alliance management challenges, including co-opetition and business eco-systems. Other chapters highlight the role of alliance professionals, alliance capabilities and paradoxical challenges in alliance relationships. This second edition retains a blend of academic knowledge and practical examples, while updating case examples and adding five new chapters on emerging alliance topics. This book remains vital reading for business students and professionals interested in strategic management.

## The Automotive Industry and European Integration The Divergent Paths of Belgium and Spain Springer

People have never been more broadly aware of design as a concept, or as something that fits into their everyday lives. Even the simplest of consumer products compete to offer something that will better catch the public's eye and reflect the taste and perceived lifestyle of each individual. Like all design, car design is complex subject. It's one in which many people have an interest--and not just gearheads. Every part of a car represents myriad decisions by

the design team ruled by engineering, aesthetics, human interface, and emotion. *Speed Read: Car Design* helps the reader to understand the hows and whys of that design process, offering an engaging review of history, theory, key concepts, and key designers. It's a book for car enthusiasts, design fans, and anyone with a desire to better understand why our wheeled world looks the way it does.

The Millennium Dome, Braveheart and Rolls Royce cars. How do cultural icons reproduce and transform a sense of national identity? How does national identity vary across time and space, how is it contested, and what has been the impact of globalization upon national identity and culture? This book examines how national identity is represented, performed, spatialized and materialized through popular culture and in everyday life. National identity is revealed to be inherent in the things we often take for granted - from landscapes and eating habits, to tourism, cinema and music. Our specific experience of car ownership and motoring can enhance a sense of belonging, whilst Hollywood blockbusters and national exhibitions provide contexts for the ongoing, and often contested, process of national identity formation. These and a wealth of other cultural forms and practices are explored, with examples drawn from Scotland, the UK as a whole, India and Mauritius. This book addresses the considerable neglect of popular cultures in recent studies of

studies, design management, marketing, new product development and communications theory, The Design Experience explores the contexts, practices and roles of designers in today's world, providing an accessible introduction to the key issues reshaping design. The book begins by analysing how consumers acquire meaning and identity from product and other experiences made possible by design. It then explores issues of competitiveness, innovation and management in the context of industry and commerce. If designers are creators of human experiences, what does this mean for their future role in culture and commerce? Subsequent chapters look at new ways in which designers conduct user research and how designers should communicate about design and decision-making with key stakeholders. The authors conclude with a discussion of the design 'profession': will that label be a help or hindrance for tomorrow's designer? Written for students of design, design management, cultural and business studies, The Design Experience is also of interest to practitioners of design, marketing and management. Illustrated case study material is integrated into the text, and the book also includes a glossary, and extensive references.

Analysing developments in digital technologies and institutional changes, this book provides an overview

of the current frenetic state of transformation within the global automobile industry. An ongoing transition brought about by the relocation of marketing, design and production centres to emerging economies, and experimentation with new mobility systems such as electrical, autonomous vehicles, this process poses the question as to how original equipment manufacturers (OEMs) and newcomers can remain competitive and ensure sustainability. With contributions from specialists in the automobile sector, this collection examines the shifts in power and geographical location occurring in the industry, and outlines the key role that public policy has in generating innovation in entrepreneurial states. Offering useful insights into the challenges facing emerging economies in their attempts to grow within the automobile industry, this book will provide valuable reading for those researching internationalization and emerging markets, business strategy and more specifically, the automotive industry.

the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.

The acclaimed food critic's two-thousand-year history of going out to eat, from the ancient Romans in Pompeii to the luxurious Michelin-starred restaurants of today. Starting with the surprisingly sophisticated dining scene in the city of Pompeii, William Sitwell embarks on a romp through culinary history, meeting the characters and discovering the events that shape the way we eat today. The Daily Telegraph restaurant critic and famously acerbic MasterChef commentator, Sitwell discusses everything from the far-reaching influences of the Muslim world to the unintended consequences of the French Revolution. He reveals the full hideous glory of Britain's post-WWII dining scene and fathoms the birth of sensitive gastronomy in the counterculture of 1960's America. This is a story of human ingenuity as individuals endeavor to do that most fundamental of things: to feed people. It is a story of art, politics, revolution, desperate need, and decadent pleasure. The Restaurant is jam-packed with extraordinary facts and

Voici un nouveau livre sur l'innovation, fondé sur l'histoire du projet Kwid de Renault, nouvelle voiture globale, low cost, pour les marchés émergents, une cible au potentiel immense. Après le succès de l'épopée Logan, Renault affirme sa stratégie de conquête « par le bas » des marchés émergents en commençant par l'Inde. Ce projet est né en développant une stratégie d'innovation « low end » qui introduit des compromis originaux entre valeur d'usage et coût des produits, ouvrant les marchés à des clients nouveaux, jusqu'ici délaissés par les innovations trop coûteuses et complexes. Le livre est organisé en 2 parties. La première raconte l'histoire du projet qui a conduit à la Kwid, depuis sa genèse stratégique jusqu'au déploiement commercial actuel sur le marché indien. La seconde partie met en perspective

cette success story avec les théories sur l'innovation dans l'entreprise selon trois axes : La caractérisation des processus d'innovation capables de développer de telles innovations de rupture ; l'analyse des stratégies low cost dans les grands groupes et la mise en oeuvre de stratégies d'innovation globalisées en « innovation inversée ». Le livre est enrichi d'interviews des acteurs clés tant de l'équipe projet que d'autres extérieurs à l'équipe projet.

This book explains, compares and assesses the legal implications of Dieselgate within a range of selected jurisdictions and at the EU, international and comparative law level. The book analyses the US EPA-VW \$14.7 billion dollar settlement of 2016, one of the largest civil settlements in the history of environmental law. As it shows, the Dieselgate affair has raised a host of issues concerning corporate and social responsibility, tort liability, environmental liability, contractual defective products, warranty, and false environmental claims in a range of jurisdictions. Issues like repurchasing or retrofitting cars from consumers and making direct payments to consumers through car buy-backs and compensation are analysed. Further, the book relates how Dieselgate has also contributed to the discussion about the introduction of more effective collective measures of redress for consumers, such as class actions, in Germany, France, Italy and the UK. The book subsequently reviews the criminal offences Volkswagen is currently confronted with in Germany, France and Italy, i.e. fraud and manipulation of capital markets (by belatedly providing shareholders with essential information relevant for the share value), and, potentially, environmental crimes. It demonstrates how Dieselgate has sparked new debates in Germany, Italy, France and the UK about the need to introduce enterprise liability for organised crimes, lack of compliance and control structures, and intentional violations of the law. Lastly, the book discusses

how EU law has sought to respond to Dieselgate and thus investigates the controversial EU Regulation No. 2016/646 introducing a "temporary conformity factor" of 2.1 (equivalent to a 110% increase on the current limit) to be applied for NOx in the new RDE testing cycle, and the works of the EU committee of inquiry into Emissions Measurements in the Automotive Sector (EMIS).

Models covered: Nissan Micra Hatchback, including automatic transmission (N-CVT) models and special/limited editions 1.0 litre (998cc) and 1.3 litre (1275 cc) petrol engines.

A vital guide to the frontlines of our fight against climate change and the scientific and technological innovations that will revolutionize the world. The United States' accelerated plans to combat the existential threat of climate change finally give reason to hope. In *Our Livable World*, research specialist and author Marc Schaus explores the incredible new green innovations in science and engineering that can allow us to avoid the worst repercussions of global warming as we work to usher in a sustainable, livable world. To beat a challenge the size of climate change, our solutions will have to be ambitious: solar thermal cells capable of storing energy long after the sun goes down, "smart highways" designed to charge your vehicle as you drive, indoor vertical farms automated to maximize crop growth with no pesticides, bioluminescent vines ready to one day replace our streetlights, jet fuel created from landfill trash—and next-generation carbon capture techniques to remove the emissions we have already released over the past several decades. Far from the geoengineering schemes of cli-fi action thrillers, real solutions are being developed, right this moment. *Our Livable World* features interviews with the innovators, real talk on the revolutionary technology, and a clear picture of a cleaner planet in the future. "An important book that shows the dawn of a new kind of environmental
