

Rich Habits By Thomas C Corley

What is a winning strategy? Why do some people, families, and organizations take a dive, some merely survive, while others thrive? What leads up to a disaster or collapse? Why do some squander success, while others continue to elevate? How do we build a solid foundation that assures solid, authentic growth? Me We Do Be is the result of research that has spanned twenty-five years at the intersection of sociology and economics. Specifically, I have explored what behaviors lead to disaster, recovery, or prosperity. As an economist, I measure the financial effects caused by disasters and other detrimental conditions. In other words, when disaster strikes, I am often called in to compute the business and real estate damages. Appraisers measure value, but I measure the loss of value. Moreover, also being a sociologist, I keep my eye on the people behind the statistics as I develop the strategies to move forward. It is a narrow consulting niche involving research, valuation, negotiation, and strategy, and it has provided unique access to interesting people and places around the globe. The journey began in the 1980s when I was a graduate student at UCLA studying leadership and business models. In the 1990s, I directed a national practice at the world's largest consulting firm. My research expanded as I walked the reactors at Chernobyl and cut through the jungles around the Bikini Atoll radioactive nuclear test sites. I have worked on cases ranging from the O. J. Simpson and JonBenet Ramsey crime scenes to the bizarre Heaven's Gate Cult mass-suicide mansion. In the 2000s, there was more. I was stunned as I stood on a curb in New York and watched smoke billowing from the World Trade Center and picked up debris on a rural field in Pennsylvania where Flight 93 had crashed on 9-11. I walked the beaches stained by the BP Oil Spill and inspected thousands of homes torn apart by Hurricane Katrina. As a socio-economist I have worked on these and hundreds of other cases around the world. More importantly, I have studied their ultimate resolution. While some reporters drop in and rush off to the next story, I have stayed to talk to the people long after the news vans drive away. Furthermore, I have been an adviser in countless boardrooms where we discussed cases involving billions of dollars. A crisis exposes a person's or organization's true character, and this yields some invaluable insights. In all, I had accumulated a mountain of information and I wanted to organize it within a practical framework. My objective was to find a model that children could understand and that a CEO would take seriously. I considered using the ancient Greek paradigm of "ethos, pathos, and logos" and a more modern framework of "mental, social, spiritual, and physical." Of course, there was the standard, "mind, body, and soul," as well as many other models. All of these struck me as good, but none of them struck me as complete. It was as if they were playing some of the keys of the piano, but not the whole keyboard. I simply wanted a clear, complete framework. My quest for the ideal model ultimately came to me on the Marianas Islands as I sat in deep thought for three consecutive days. The answer was simple: Just as all great structures have four cornerstones, there are four cornerstones of all great pursuits. These can be summed up as Me We Do Be. Me refers to habits that build quality thinking and wisdom, We habits build relationships, Do habits build productivity, and Be habits build the future. In the pages that follow, I will use this Me We Do Be framework as we explore some of the most fascinating places on Earth, learn from the experiences of some extraordinary people, and look at classic behavioral research. This is all set out within the four Me We Do Be sections, twenty-one short chapters, and about one hundred individual lessons. The objective of each lesson is to encourage discussion on essential life skills. On top of that, more than five thousand people from all fifty states, Australia, and the United Kingdom participated in our Rich Habits Survey.¹ Here, my research staff and I surveyed professionals, students, stay-at-home moms, retirees, the unemployed, and multi-millionaires. We studied dozens of rituals ranging from writing thank-you notes to eating together as a family. We then statistically correlated various habits with different measures of success such as education, wealth, quality relationships, and an overall sense of happiness. Obviously, some people define success as making money. I joke that money doesn't make anyone happy, but it's a great way to be miserable! However, some might define success as a happy family life, finding true love, or winning a competition. Some see success as contributing to a worthy cause, completing a degree, or mastering a musical instrument. Others view success as healing from an emotional wound, beating cancer, or connecting with the divine. Some see success as being a leader or building a huge name for themselves, while others just want the satisfaction of quietly doing great work. Many define success as a combination of things. I respect the perception that there is no one-size-fits-all for success. Here, we define what success means to us individually, but in so doing, we will look at the foundational elements that apply to us all. The research and science is clear: however you define "success," daily habits, rituals, and routines are the key to either tragedy or triumph. Just as one bad habit ripples out until a life is destroyed, it is also true that one new good habit can ripple out and create something magnificent. Today's habits, rituals, and routines are tomorrow's destiny, and minor adjustments bring major rewards. Indeed, the four cornerstones of Me We Do Be lay the foundation of every great pursuit. They bring results that are positive, profound, and permanent. We have absolutely no control over most things, like the weather or the global economy. The only thing we really control is ourselves and the habits we choose. We dictate when we get up, what we eat, what we say and how we think. Focusing on a proven set of rich habits is simply the most direct way to building a rich life.

What if there were a way to cut through all the financial mumbo-jumbo? Wouldn't it be great if someone could really explain to us-in plain and simple English-the basics we must know about investing in order to insure our financial freedom? At last, here's good news. Jargon-free and written for all investors-experienced, beginner, and everyone in between-The Investment Answer distills the process into just five decisions-five straightforward choices that can lead to safe and sound ways to manage your money. When Wall Street veteran Gordon Murray told his good friend and financial advisor, Dan Goldie, that he had only six months to live, Dan responded, "Do you want to write that book you've always wanted to do?" The result is this eminently valuable primer which can be read and understood in one sitting, and has advice that benefits you, not Wall Street and the rest of the traditional financial services industry. The Investment Answer asks readers to make five basic but key decisions to stack the investment odds in their favor. The advice is simple, easy-to-follow, and effective, and can lead to a more profitable portfolio for every investor. Specifically: Should I invest on my own or seek help from an investment professional? How should I allocate my investments among stocks, bonds, and cash? Which specific asset classes within these broad categories should I include in my portfolio? Should I take an actively managed approach to investing, or follow a passive alternative? When should I sell assets and when should I buy more? In a world of fast-talking traders who believe that they can game the system and a

market characterized by instability, this extraordinary and timely book offers guidance every investor should have.

Offers a step-by-step financial success program that is concise, easy to understand and apply.

Nightline anchor Dan Harris embarks on an unexpected, hilarious, and deeply skeptical odyssey through the strange worlds of spirituality and self-help, and discovers a way to get happier that is truly achievable. After having a nationally televised panic attack, Dan Harris knew he had to make some changes. A lifelong nonbeliever, he found himself on a bizarre adventure involving a disgraced pastor, a mysterious self-help guru, and a gaggle of brain scientists. Eventually, Harris realized that the source of his problems was the very thing he always thought was his greatest asset: the incessant, insatiable voice in his head, which had propelled him through the ranks of a hypercompetitive business, but had also led him to make the profoundly stupid decisions that provoked his on-air freak-out. Finally, Harris stumbled upon an effective way to rein in that voice, something he always assumed to be either

impossible or useless: meditation, a tool that research suggests can do everything from lower your blood pressure to essentially rewire your brain. 10% Happier takes readers on a ride from the outer reaches of neuroscience to the inner sanctum of network news to the bizarre fringes of America's spiritual scene, and leaves them with a takeaway that could actually change their lives.

A teenager recovering from a schizophrenic breakdown is driven to the point of obsession to find his missing younger brother and becomes wrapped up in a romance that may not be the real thing.

The best financial planner Michelle Singletary ever knew was Big Mama, her grandmother. Big Mama raised Michelle and her four brothers and sisters on a salary that never reached more than \$13,000 a year. Yet at her death, Big Mama owned her own home, had paid off a car loan, and had a beautiful collection of Sunday-go-to-meeting church hats and a savings account that supplemented her Social Security check and small pension. Most important, she had taught Michelle "7 Money Mantras for a Richer Life." Those mantras serve as the inspiration for this straight-talking book of practical personal financial advice that really works. The 7 Money Mantras are: 1. If it's on your ass, it's not an asset! 2. Is this a need or is it a want? 3. Sweat the small stuff. 4. Cash is better than credit. 5. Keep it simple. 6. Priorities lead to prosperity. 7. Enough is enough. Michelle Singletary is a syndicated columnist for The Washington Post whose popular personal finance column appears in more than 120 newspapers. She's also a mother of three children who understands what it's like to live on a budget. In a plainspoken, sassy, no-nonsense voice, Michelle provides answers to the financial issues that confront almost every household: how to teach children the value of money; how to address money issues in a relationship or marriage; household saving tips; getting the best loans; and much more. "This book is about saving enough money to have choices," she writes. "It's about feeling free to be cheap if you can't afford to buy a ton of gifts at Christmas. It's about eliminating wasteful spending so you can begin to save and invest. It's full of uncommon commonsense lessons and guidance on the way people should use their money." With humor and down-home financial wisdom, Michelle Singletary offers practical and realistic advice that will help you live well with the money you have. Michelle Singletary on . . . Romance and Money "It's okay to say: 'Honey, I love you and everything, but if you need money, ask your mama.'" Credit Cards "We are minimizing our financial potential by making minimum credit-card payments." Car Buying "If you want to save money, keep your car until you're on a first-name basis with the local tow-truck drivers." Leasing a Car "You, too, can drive a car you can't afford and then have to give it back. It's crazy." Gift Giving "Generosity isn't about how much you spend. It's about how much thought you put into the gift." Penny Pinching "I once bought a stick-shift car because it was \$1,000 cheaper than the automatic in the same model. There was just one little problem. I couldn't drive a stick-shift. But at least I saved \$1,000!"

Balkan Legacies is a study of the aftermath of war and state socialism in the contemporary Balkans. The authors look at the inescapable inheritances of the recent past and those that the present has to deal with. The book's key theme is the interaction, often subliminal, of the experiences of war and socialism in contemporary society in the region. Fifteen contributors approach this topic from a range of disciplinary backgrounds and through a variety of interpretive lenses, collectively drawing a composite picture of the most enduring legacies of conflict and ideological transition in the region, without neglecting national and local peculiarities. The guiding questions addressed are: what is the relationship between memories of war, dictatorship (communist or fascist), and present-day identity—especially from the perspective of peripheral and minority groups and individuals? How did these components interact with each other to produce the political and social culture of the Balkan Peninsula today? The answers show the ways in which the experiences of the latter part of the twentieth century have defined and shaped the region in the twenty-first century.

"The newbie investor will not find a better guide to personal finance." —Burton Malkiel, author of *A RANDOM WALK DOWN WALL STREET* TV analysts and money managers would have you believe your finances are enormously complicated, and if you don't follow their guidance, you'll end up in the poorhouse. To prove his point, he grabbed a 4" x 6" card, scribbled down a list of rules, and posted a picture of the card online. The post went viral. Now, Pollack teams up with Olen to explain why the ten simple rules of the index card outperform more complicated financial strategies. Inside is an easy-to-follow action plan that works in good times and bad, giving you the tools, knowledge, and confidence to seize control of your financial life.

How does money figure into a happy life? In The Geometry of Wealth, behavioral finance expert Brian Portnoy delivers an inspired answer, building on the critical distinction between being rich and being wealthy. While one is an unsatisfying treadmill, the other is the ability to underwrite a meaningful life, however one chooses to define that. Truly viewed, wealth is funded contentment. At the heart of this groundbreaking perspective, Portnoy takes readers on a journey toward wealth, informed by disciplines ranging from ancient history to modern neuroscience. He contends that tackling the big questions about a joyful life and tending to financial decisions are complementary, not separate, tasks. These big questions include: • How is the human brain wired for two distinct experiences of happiness? And why can money "buy" one but not the other? • What are the touchstones of a meaningful life, and are they affordable? • Why is market savvy among the least important sources of wealth but self-awareness is among the most? • How does one strike a balance between striving for more while being content with enough? This journey memorably contours along three basic shapes: A circle, triangle and square help us to visualize how we adapt to evolving circumstances, set clear priorities, and find empowerment in simplicity. In this accessible and entertaining book, Portnoy reveals that true wealth is achievable for many - including those who despair it is out of reach - but only in the context of a life in which purpose and practice are thoughtfully calibrated.
