The globetrotting naturalists of the eighteenth century were the geeks of their day: innovators and explorers who lived at the intersection of science and commerce. Foremost among them was Carl Linnaeus, a radical thinker who revolutionized biology. In *What Linnaeus Saw*, Karen Magnuson Beil chronicles Linnaeus's life and career in readable, relatable prose. As a boy, Linnaeus hated school and had little interest in taking up the religious profession his family had chosen. Though he struggled through Latin and theology classes, Linnaeus was an avid student of the natural world and explored the school's gardens and woods, transfixed by the properties of different plants. At twenty-five, on a solo expedition to the Scandinavian Mountains, Linnaeus documented and described dozens of new species. As a medical student in Holland, he

moved among leading scientific thinkers and had access to the best collections of plants and animals in Europe. What Linnaeus found was a world with no consistent system for describing and naming living things—a situation he methodically set about changing. The Linnaean system for classifying plants and animals, developed and refined over the course of his life, is the foundation of modern scientific taxonomy, and inspired and guided generations of scientists. What Linnaeus Saw is rich with biographical anecdotes—from his attempt to identify a mysterious animal given him by the king to successfully growing a rare and exotic banana plant in Amsterdam to debunking stories of dragons and phoenixes. Thoroughly researched and generously illustrated, it offers a vivid and insightful glimpse into the life of one of modern science's founding thinkers.

Ivy Pocket is a twelve-year-old maid of no importance, with a very lofty opinion of herself. Dumped in Paris by the Countess Carbunkle, who would rather run away to South America than continue in Ivy's companionship, our young heroine (of sorts) finds herself with no money and no home to go to ... until she is summoned to the bedside of the dying Duchess of Trinity. For the princely sum of £500 (enough to buy a carriage, and possibly a monkey), Ivy agrees to courier the Duchess's most precious possession – the Clock Diamond – to England, and to put it around the neck of the revolting Matilda Butterfield on her twelfth birthday. It's not long before Ivy finds herself at the heart of a conspiracy involving mischief, mayhem and murder.

Illustrated in humorous gothic detail by John Kelly, *Anyone But Ivy Pocket* is just the beginning of one girl's deadly comic journey to discover who she really is ...

Shortly after William Henry Fox Talbot announced his invention of photography in 1839, the dedicated amateur botanist Anna Atkins, daughter of a prominent British scientist, began to experiment with the new medium. In 1843 she turned to her friend Sir John Herschel's recently discovered cyanotype process to publish her growing collection of native seaweeds--a daring way to introduce photography into book illustration. At regular intervals over the next decade, Atkins printed and issued these bracingly modern, deeply-hued photograms to her "botanical friends" in the form of hand-stitched fascicles of a book she entitled *Photographs of British Algæ: Cyanotype Impressions*. The first book to be illustrated by photography and the earliest sustained application of photography to science, *British Algæ* is a landmark in the histories of publishing and photography. Of the nearly two dozen substantially complete or partial copies known to exist, each is distinct in its appearance and often in its number and arrangement of plates. The set of 13 parts she gave to Sir John Herschel--now in the Spencer Collection of

This sumptuous facsimile edition reproduces the recto and verso of each plate, presenting the work as its creator intended: as bound volumes to lingered over, studied and admired, page by extraordinary page.

The definitive and revealing biography of the author of *The Secret Garden*. Frances Hodgson Burnett's favourite theme in her fiction was the reversal of fortune, and she herself knew extremes of poverty and wealth. Born in Manchester in 1849, she emigrated with her family to Tennessee because of the financial problems caused by the cotton famine. From a young age she published her stories to help the family make ends meet. Only after she married did she publish *Little Lord Fauntleroy* that shot her into literary stardom. On the surface, Frances' life was extremely successful: hosting regular literary salons in her home and travelling frequently between properties in the UK and America. But behind the colourful personal and social life, she was a complex

Acces PDF Secret Garden 12 Notecards

and contradictory character. She lost both parents by her twenty-first birthday, Henry James called her "the most heavenly of women" although avoided her; prominent people admired her and there were many friendships as well as an ill-advised marriage to a much younger man that ended in heartache. Her success was punctuated by periods of depression, in one instance brought on by the tragic loss of her eldest son to consumption. Ann Thwaite creates a sympathetic but balanced and eye-opening biography of the woman who has enchanted numerous generations of children.
