Damien Broderick has been a leading Australian SF writer since the '70s. His novel *The Dreaming Dragons* was listed in SF: the 100 best novels. His recent nonfiction book, *The Spike*, is a mind-stretching look at the wonders of the high-tech future. Now in *Transcension* he brings to life one of the futures he imagined in *The Spike*, a world pervaded by nanotechnology and governed by artificial intelligence. *Transcension* may be Broderick's best book yet. Amanda is a brilliant violinist, a mathematical genius, and a rebel. Impatient for the adult status her society only grants at age thirty, but determined to have a real adventure first, she has repeatedly gotten into trouble and found herself in the courtroom of Magistrate Mohammed Abdel-Malik, the sole resurrectee from among those who were frozen in the early twenty-first century, the man whose mind was the seed for Aleph, the AI that rules this utopia. Mathewmark is a real adolescent, living in the last place where they still exist, the reservation known as the Valley of the God of One's Choice, where those who have chosen faith over technology are allowed to live out their simpler lives. When Amanda determines that access to the valley is the key to the daring stunt she plans, it is Mathewmark she will have to lead into temptation. But just as Amanda, Mathewmark, and Abdel-Malik are struggling to find themselves and achieve their potentials, so is Aleph, and the AI's success will be a challenge to them and all of humanity. Early works of Karen Kellock on releasing obstruction and breakthrough. The world holds genius down, but in overcoming he becomes renowned. The first half of the book is on "sick systems and sin cycles" with chapters like "genius is held down", "genius must get up", "bad faith or fullness", "solitude", "fallen hero syndrome", "anorexic systems", "psych of sensuality". These treatises have shocked as loners, misfits, anas and geniuses are seen in a whole new light. The second half is on the KK diet theory which includes "reversal dieting" and "fauna-fastarianism". This is a complete theoretical matrix of The Debris Theory of Disease supported by NIMH and NIAAA federal grants

A new edition of an occult classic, which includes a new introduction by Mary K. Greer, author of *Women of the Golden Dawn*, and a new afterword with excerpts from rarely seen documents by Fortune herself describing how the book came about. After finding herself the subject of a powerful psychic attack in the 1930s, famed British occultist Dion Fortune wrote this detailed instruction manual on protecting oneself from paranormal attack. This classic psychic self-defense guide explains how to understand the signs of a psychic attack, vampirism, hauntings, and methods of defense. Everything you need to know about the methods, motives, and physical aspects of a psychic attack and how to overcome it is here, along with a look at the role psychic elements play in mental illness and how to recognize them. This is one of the best guides to detection and defense against psychic attack from one of the leading occult writers of the twentieth century.

"Japan's pop culture, once believed unexportable, is now hitting the shores of other nations like a tsunami. In North America, young fans consume vast amounts of manga and anime, while academics increasingly study the entire J-pop phenomenon to understand it. One community has passion while the other has discipline, and what has been lacking is a bridge between the two. Mechademia is the bridge, and with a name like that, how can one go wrong? So why wait? Hop in your giant mobile suit and stomp down to the local real or virtual bookstore to purchase a copy right now!" —Frederik L. Schodt, author of *Manga! Manga! The World of Japanese Comics Networks of Desire*—the second volume in the Mechademia series, an annual forum devoted to critical and creative work on Japanese anime, manga, and the fan cultures that have coalesced around them—explores the varieties of desire that structure and influence much of contemporary anime and manga in manifestations that range from the explicitly sexual to more sublimated text and imagery. Collecting original essays by scholars, artists, and fans, *Networks of Desire* considers key issues at play in a Japanese society increasingly uncertain of its place in a globalized world: from idealized representations of same-sex desire in such shjo manga (girls's comics) as *The Rose of Versailles*, to fan fiction inspired by the gender-switching manga *Ranma ½*, to desire in otaku communities. Deftly weaving together desire and discourse, *Mechademia 2* illuminates the techno-carnal fantasies, animalistic consumption, political nostalgia, and existential hunger underlying the most popular and influential expressions of Japanese popular culture today.

"The poems in Carnal Fragrance are straightforward dispatches from the land of grief and mourning. Observant, controlled, and rich with feelings, these poems take note of the surprising moments, small ironies, odd sensations and quotidian realities of survivorhood. They examine what happens when a loved one dies and you must live on without them, aching to find ways to continue in their absence, surrounded by their lingering presence and yet utterly bereft. Ovid said, Songs have immunity from death. Poems like these, which deal with loss in such a clear eyes way remind us that Ovid was right." description by Amy Gerstler

There is an appetite for God. And it can be awakened. I invite you to turn from the dulling effects of food and the dangers of idolatry, and to say with some simple fast: "This much, O God, I want you." Our appetites dictate the direction of our lives - whether it be the cravings of our stomachs, the passionate desire for possessions or power, or the longings of our spirits for God. But for the Christian, the hunger for anything besides God can be an arch-enemy. While our hunger for God - and Him alone - is the only thing that will bring victory. Do you have that hunger for Him? As John Piper puts it: "If we don't feel strong desires for the manifestation of the glory of God, it is not because you have drunk deeply and are satisfied. It is because we have nibbled so long at the table of the world. Our soul is stuffed with small things, and there is no room for the great." If we are full of what the world offers, then perhaps a fast might express, or even increase, our soul's appetite for God. Between the dangers of self-denial and self-indulgence is this path of pleasant pain called fasting. It is the path John Piper invites you to travel in this book. For when God is the supreme hunger of your heart, He will be supreme in everything. And when you are most satisfied in Him, He will be most glorified in you.

This book is about the ancient Reptile/Serpent Brain in humans and its transformation. The Serpent Brain (R-complex) is the oldest part of our brain where all of our primal instincts, carnality and fears originate. We seek to show how mostly all that we perceive as evil or negative stems from ancient programming in the reptile brain based in fear. However, through deprogramming and reprogramming the Serpent Brain we can live in what we consider the supernatural or Spirit at all time. Now to explain this: Every part of our body is a replica or physical manifestation of something that exists in the celestial realm. The good news of the Creator's purpose and plan is recorded throughout the human anatomy and DNA. We are awesomely and wonderfully created in the image and likeness of the Creator; although we don't yet fully express that reality. Nevertheless, we do have a hope and promise that we will be completely restored to Edenic Consciousness to totally operate out of the Mind of Christ at all times. At which point even the members of our being that are considered most low and primal will express the full glory of our God. In this book we challenge you to look at issues, perceptions, lifestyles, behaviors, religious ideas, political propaganda and hidden fears. We will not only look at them but possibly change some and come to realize the power of love that dissolves all fears. Lastly, we will show you the hidden metaphors in Scripture that hinted at the transformation of the Serpent Brain/Carnal Mind, the Pineal & Pituitary Glands. We also set this forth in mystical poetry throughout the book. "Bless the LORD O' my soul and all that is within me bless His holy name." Psalms 103:1 KJV The physical and material world only reflects that of the invisible or spiritual realm. In the spirit realm the Seraph is the spiritual counterpart of our physical Serpent (reptile) Brain and brain stem. The metaphysical primal Serpent Brain will be transformed to be like unto the Seraph within mankind. The Seraphim are the mysterious highest celestial Angelic Order of Fiery Flying Serpentine creatures closest to the throne of God. According to Scripture, they cry; holy, holy, holy is the LORD of hosts; the whole earth is filled with His glory. Isaiah 6:1-3 All of creation earnestly waits and groans with expectation for humans to once again fully operate out of whole brain synchronicity as in Eden. At which point we will manifest as sons and daughters of Elohim and the whole earth of our being will express his glory. This book, and all that seek the Light are dedicated to the complete transformation of the human mind and choosing to live in Love.

What you believe about God actually changes your brain. Psychiatrist Tim Jennings unveils how our brains and bodies thrive when we have a healthy understanding of who God is. This expanded edition now includes a study guide to help you discover how neuroscience and Scripture come together to bring healing and transformation to our lives.

This is the first complete monograph devoted to the works and theories of Orlan, without a doubt today's most challenging and thought-provoking performance artist. She began her highly unconventional career at the age of 17 with a series of works using photographs of her own body, which has become her art "medium," her primary creative voice. Working beyond the limits of body art, in her manifesto on "Carnal Art", Orlan wrote that her performances are "a selfportrait in the classical sense, yet realized through the technology of its time. Lying between disfiguration and figuration, it is an inscription in flesh." In 1999, using the operating room as a studio, she underwent a series of filmed plastic surgery operations to modify her own body-her canvas-including the placing of cheekbone implants under the skin of her forehead. Here is a detailed, analytical text including a biography, a chronology of her exhibitions, and critical studies of the significance of her Carnal Art performances-a must-read for anyone interested in currents in contemporary art. The Articles of Configuration: What happened before Genesis began? The scriptures amazingly describe the material building blocks of the earth before our earthly sphere was formed. But, even more amazing, is that the invisible blueprints describing the formation of the universe and its lifeforms are hidden in plain sight in the scriptures-in the form of flashback descriptions of what happened before Genesis 1:1. The problem of mankind understanding these blueprints has been that advancements in science were necessary to understand what has been written from antiquity. Science and theology has been locked together in a mighty struggle of ideas. The process, at times, has been ugly as a caterpillar chomping on leaves, regurgitating and trying to build a cocoon of how the universe is really constituted. But this cocoon, like the human brain, has an inside tension between left brained logic and right brained dreaming. A mighty struggle ensues and at last a butterfly emerges from the cocoon and its glistening wings dry in the sun. As the butterfly discovers its destiny and ascends in flight into the brilliant blue sky filled with fluffy white clouds, a serene revelation of peace envelops the butterfly. It realizes that its one wing of science and its other wing of theology are working in harmony under a Master control. Thrilled and awed, the butterfly uses both wings to ascend far above worldly ideas into realms that it once only dreamed of.

Explores Jung's psychological concepts regarding the nature, function and importance of man's symbols as they appear on both the conscious and subconscious level

Nearing death, Old Testament patriarch Jacob extracts a promise from Naska, a Midianite trader from Damascus, to create a written record of his life among the Hebrews and of his friendship with Jacob's son, Joseph. Naska complies, dictating this prebiblical text to three Sumerian scribes. What unfolds is an extraordinarily revealing novel of life in biblical times, written more than a thousand years before the Bible was put to parchment. Sojourn in Egypt begins five years after Naska and Joseph first meet, an inauspicious meeting by any standard: Naska purchased the boy when his brothers sold him into slavery, banishing from them Jacob's favorite son. Despite the inequality of their stations, the two men develop a mutual respect and become fast friends. In Luxor, where Naska is building a massive farm on Temple lands, he and Joseph face a series of challenges and temptations that will test their faith and their friendship. Naska, lonely over his estrangement from his family, relies on his relationships with Joseph, Rufi, and with Marn, his estranged former lover, to sustain him. Joseph, the slave, concedes his life to God, trusting that he has been sent on a special mission. The Scroll was unearthed in Iraq (ancient Sumer) during Operation Desert Storm. Sent to Oxford University in England for translation, it became an instant sensation when published, but created a firestorm of controversy as new information arose from unlikely places. Narrated by Naska, Sojourn in Egypt breathes new life into a well-worn tale, revealing Joseph as an intriguing and dynamic character. Novelist Martin Shapiro has woven a captivating story of romance, love, jealousy, greed, anger, revenge, and murder. Readers will be drawn deep into the lives of Shapiro's characters, first in Sojourn in Egypt, later in sequels Caravan to Luxor and Joseph Reigns. Naska's tale is a true epic, an ancient story in which contemporary readers will face the timeless truth of the human heart and experience.

John Piper pleads with fellow pastors to abandon the professionalization of the pastorate and pursue the prophetic call of the Bible for radical ministry.

The search for artificial means of enhancing sexual experience is timeless and can even be found in the opening passages of Genesis (3:7) where Adam and Eve discovered sex as they took a bite of the forbidden fruit: "And the eyes of them both were opened, and they knew that they were naked." While others may interpret the "opening of their eyes" as simply an awareness of male and femaleness, John Milton and others regarded the forbidden fruit as an aphrodisiac and in Paradise Lost, described in greater detail what happened: "But the false fruit For other operation first displayed Carnal desire in fiaring. He on Eve Began to cast lascivious eyes; she him As wantonly repaid; in lust they burn." Not only did Milton regard the "forbidden fruit" as an aphrodisiac, he also identified it as an apple, and an apple it has remained until this day. Sexual behavior has always been one of the most fascinating and attention-arresting activities in human history and there has been no decrease in the fascination and curiosity it still arouses in the human psyche. 1 2 Introduction As timeless as the topic of sexual behavior is that of aphrodisiacs. For example, after the "forbidden fruit," the Bible specifically identified mandrake as an aphrodisiac (Genesis 30:14-17): "And Reuben went, in the days of wheat harvest, and found mandrakes in the field, and brought them to his mother, Leah.

A lyrical debut novel from a musician and artist renowned for her sharp sexual and political imagery Jo is in a strange new country for university and having a more peculiar time than most. In a house with no walls, shared with a woman who has no boundaries, she finds her strange home coming to life in unimaginable ways. Jo's sensitivity and all her senses become increasingly heightened and fraught, as the lines between bodies and plants, dreaming and wakefulness, blur and mesh. This debut novel from critically acclaimed artist and musician Jenny Hval presents a heady and hyper-sensual portrayal of sexual awakening and queer desire.

Investigating the current explosion of interest in food and eating, Elspeth Probyn's book uncovers some of the deep and dark themes underlying our craving for the culinary.

Winner of the International Lannan Literary Award for Nonfiction Animal tracks, word magic, the speech of stones, the power of letters, and the taste of the wind all figure prominently in this intellectual tour de force that returns us to our senses and to the sensuous terrain that sustains us. This major work of ecological philosophy startles the senses out of habitual ways of perception. For a thousand generations, human beings viewed themselves as part of the wider community of nature, and they carried on active relationships not only with other people with other animals, plants, and natural objects (including mountains, rivers, winds, and weather patterns) that we have only lately come to think of as "inanimate." How, then, did humans come to sever their ancient reciprocity with the natural world? What will it take for us to recover a sustaining relation with the breathing earth? In The Spell of the Sensuous David Abram draws on sources as diverse as the philosophy of Merleau-Ponty, Balinese shamanism, Apache storytelling, and his own experience as an accomplished sleight-of-hand of magician to reveal the subtle dependence of human cognition on the natural environment. He explores the character of perception and excavates the sensual foundations of language, which--even at its most abstract--echoes the calls and cries of the earth. On every page of this lyrical work, Abram weaves his arguments with a passion, a precision, and an intellectual daring that recall such writers as Loren Eiseley, Annie Dillard, and Barry Lopez.

Many Bible interpreters assume a biblical text has only one right meaning and that it can be found if the reader uses the right methods. Charles Cosgrove, on the other hand, recognizes that language often admits multiple meanings and that scholars must deal with several sensible readings. As an example, Elusive Israel examines the identity of Israel in Romans 11, arguing for three equally plausible interpretations.

A synthesis of intellectual and social history, Walking in the Way of Peace investigates the historical context, meaning, and expression of early Quaker pacifism in England and its colonies. In a nuanced examination of pacifism, Weddle focuses on King Philip's War, which forced New England Quakers, rulers and ruled alike, to define the parameters of their peace testimony. Completed in 1173, The Book of Divine Works (Liber Divinorum Operum) is the culmination of the Visionary's Doctor's theological project, offered here for the first time in a complete and scholarly English translation. The first part explores the intricate physical and spiritual relationships between the cosmos and the human person, with the famous image of the universal Man standing astride the cosmic spheres. The second part examines the rewards for virtue and the punishments for vice, mapped onto a geography of purgatory, hellmouth, and the road to the heavenly city. At the end of each Hildegard writes extensive commentaries on the Prologue to John's Gospel (Part 1) and the first chapter of Genesis (Part 2)—the only premodern woman to have done so. Finally, the third part tells the history of salvation, imagined as the City of God standing next to the mountain of God's foreknowledge, with Divine Love reigning over all.

My search for meaning uncovered a secret brain program in charge of moral development. A roadmap to enlightenment comes through the unique language of symbolism that has long been forsaken. This foreign tongue reveals the nature of divinity and truth of existence. It shows us who we really are, not who we think we are. A metaphoric component silently transforms a base consciousness to all-knowing awareness by converting power to love. Success in transforming an animal species to human status comes by attaching an integrated brain to a compassionate heart. Otherwise, life gets nasty as evidenced in bias, prejudice, bigotry, and profiling. Projections of how we feel about ourselves translate into how we treat others. Awakening to reality, after a long slumber in fantasy, is essential to raise our level of consciousness and our degree of self-awareness. A higher mental state is under construction. It needs our help to end the destruction and suffering our blindness causes. Blindness will be lifted by an involuntary change in vision.

A bestselling dystopian novel that tackles surveillance, privacy and the frightening intrusions of technology in our lives—a “compulsively readable parable for the 21st century” (Vanity Fair). When Mae Holland is hired to work for the Circle, the world's most powerful internet company, she feels she's been given the opportunity of a lifetime. The Circle, run out of a sprawling California campus, links users' personal emails, social media, banking, and purchasing with their universal operating system, resulting in one online identity and a new age of civility and transparency. As Mae tours the open-plan office spaces, the towering glass dining facilities, the cozy dorms for those who spend nights at work, she is thrilled with the company's modernity and activity. There are parties that last through the night, there are famous musicians playing on the lawn, there are athletic activities and clubs and brunches, and even an aquarium of rare fish retrieved from the Marianas Trench by the CEO. Mae can't believe her luck, her great fortune to work for the most influential company in the world—even as life beyond the campus grows distant, even as a strange encounter with a colleague leaves her shaken, even as her role at the Circle becomes increasingly public. What begins as the captivating story of one woman's ambition and idealism soon becomes a heart-racing novel of suspense, raising questions about memory, history, privacy, democracy, and the limits of human knowledge.
