

## The Down To Earth Guide Global Warming

We are a supernatural people. Made in the image of God and called to follow a risen Lord through the world God made—we're anything but normal. Given all that, it should not be surprising to us when miraculous things happen in our midst. Still, many of us are intimidated at the thought of it, and we stop short of trying so we won't disappoint God with our lack of faith, or—if we're being honest—so we won't be disappointed when God fails to deliver. In *Miracle Work*, Jordan Seng tells remarkable stories of physical healings and prophetic messages. He reflects on the possibility and limitations of a contemporary ministry that believes in the power of God, and helps us train and prepare ourselves for when God works through us in the lives of others. Read *Miracle Work* for a better understanding of what it means to be agents of grace, healing and even miracles in a world that desperately needs the good news of God's loving, healing touch.

Practical tips include unsubscribing from all the tempting emails that drop into your inbox with details of the newest clothing range or the latest sale, and keeping a mug next to your kettle to work out how much water you actually need to boil each time, as over filling kettles costs British households £68 million on energy bills each year. An elevated yet accessible follow-up to Lauren Liess's *Habitat*, showcasing her signature easy-living lifestyle *Down to Earth* picks up right where Lauren Liess's critically acclaimed *Habitat* left off. While *Habitat* walked readers through the decorating process step-by-step, Liess's latest title takes a step beyond the basics and invites readers to incorporate the main components of her familiar design aesthetic: nature, easy living, and approachability. With evocative photos and substantive design advice, *Down to Earth* focuses on creating a lifestyle that inspires creativity and functionality.

Throughout the book, Liess shows readers how to incorporate six guiding principles in six unique homes: a new farmhouse, a classic American historical home, a lakeside contemporary house, a modern villa, a turn-of-the-century American Foursquare, and a cedar and glass house on a bluff. While each home has a different architectural style, fingerprints of Liess's down-to-earth style are evident throughout.

The present ecological mutation has organized the whole political landscape for the last thirty years. This could explain the deadly cocktail of exploding inequalities, massive deregulation, and conversion of the dream of globalization into a nightmare for most people. What holds these three phenomena together is the conviction, shared by some powerful people, that the ecological threat is real and that the only way for them to survive is to abandon any pretense at sharing a common future with the rest of the world. Hence their flight offshore and their massive investment in climate change denial. The Left has been slow to turn its attention to this new situation. It is still organized along an axis that goes from investment in local values to the hope of globalization and just at the time when, everywhere, people dissatisfied with the ideal of modernity are turning back to the protection of national or even ethnic borders. This is why it is urgent to shift sideways and to define politics as what leads toward the Earth and not toward the

global or the national. Belonging to a territory is the phenomenon most in need of rethinking and careful redescription; learning new ways to inhabit the Earth is our biggest challenge. Bringing us down to earth is the task of politics today.

Rhonda Hetzel feels passionately that living simply leads to a richer, more fulfilling existence. Having made the decision to live frugally, embrace sustainability and opt out of the capitalist consumerist mindset, she set about working out how to achieve her goal, learning traditional skills, reducing her spending and environmental impact and focusing on the simple things that make life worth living: family, friends, and a home-cooked meal. This is the story of her journey and the lessons she has learned along the way. Rhonda relates why she wanted to change her lifestyle, what simple living means to her, and offers guidance to those thinking about taking the same path.

Called to the bedside of someone critically or chronically ill, what should you bring, what can you do, what must you know, what will you say? Likely you've already sat with a grandparent, parent, brother, sister, lover, or friend in a hospital or nursing home and found yourself disturbed by certain medical protocols, mystified by lab reports, frustrated by insurance forms, benumbed by pharmacocracy, thinking taboo thoughts about life or loss, and yourself on the verge of falling sick. LONG DAYS, LAST DAYS is for all of us who sooner or later will be sitting for hours with someone we love, senses heightened in the moment but all the while trying to imagine what lies ahead. Arranged alphabetically, this guide offers astute, practical, single-page entries on 200 topics including Advocacy, Checklists, Directives, Gatekeeping, Hospice, Intensive Care, Laughter, Medicine Cabinets, Mutual Peril, Overnight Bags, Pain relief, Sadness, Sex, Waiting, Wills, Young People, and Zero Visibility. You can learn to distinguish Acuteness from Emergency from Urgency, what to do with Blankets and Pillows, where to seek Help, how to hire caregivers, and what questions to ask Agencies, Nurses, Physicians, Social Workers. You may be curious as to why Keys, Nails, Teeth, and Tubes take on such significance. And you may be anxious to know how best, meanwhile, to attend to your own needs. As a case manager, Hillel Schwartz has worked with clients, families, and friends confronting brain injury, breast cancer, lung cancer, prostate cancer, non-Hodgkin lymphoma, heart disease, kidney failure, paralysis, stroke, and Waldenstrom's macroglobulinemia, as well as with households coping with dialysis, colostomies, paraplegia, memory loss. As an historian of medicine and technology, he can put in social and cultural context the language, traditions, and expectations that are often at odds among patients, nurses, internists, specialists, surgeons, and caregivers. All of this is reflected in the rich text of LONG DAYS, LAST DAYS, which has an extensive index and links to online resources and further reading/viewing. It is also thoroughly internally hyperlinked so that readers may move easily across associated topics, as from Noise to Snoring to Roommates to Respite. Unlike books on death and dying, spiritual communion or grief and bereavement, this guide takes into account the entire environment of the bedside, its shifting calendar and climate, its terrain and geography, its sense of presence and absence, its contests and compromises, its physical and ethical demands, and the relationships forged or strained, assumed or resumed. Long Days may not necessarily move through Last Months to Last Breaths, but for days, weeks, or months the bedside has its own ecology, for which few of us are ever fully prepared. Read in draft versions by dozens of laypeople as well as family physicians and neurologists, hospice nurses and psychologists, psychiatric social workers, sociologists, and social philosophers, LONG DAYS, LAST DAYS has been found to be equally useful for friends, families, and professionals, for those new to the bedside as for those returning yet again. Open it to a topic of immediate concern and follow the links. . . or look for subjects that have puzzled you in the past . . . or read it from start to finish in anticipation of what you may need to know in a not-so-distant future. Some entries are meditative, some sheerly informative; some are forthright, some celebratory; some ask for boldness, some for reflection. All told, they help ground and empower each of us in our times at the bedside, helping those we love, palm resting lightly, warmly, on the Breastbone.

Down-to-Earth Discipling offers both laypeople and ministry leaders simple, practical steps to one-on-one evangelism and discipleship.

Travel to space and back with astronaut Chris Hadfield's "enthraling" bestseller as your eye-opening guide (Slate). Colonel Chris Hadfield has spent decades training as an astronaut and has logged nearly 4000 hours in space. During this time he has broken into a Space Station with a Swiss army knife, disposed of a live snake while piloting a plane, and been temporarily blinded while clinging to the exterior of an orbiting spacecraft. The secret to Col. Hadfield's success-and survival-is an unconventional philosophy he learned at NASA: prepare for the worst- and enjoy every moment of it. In An Astronaut's Guide to Life on Earth, Col. Hadfield takes readers deep into his years of training and space exploration to show how to make the impossible possible. Through eye-opening, entertaining stories filled with the adrenaline of launch, the mesmerizing wonder of spacewalks, and the measured, calm responses mandated by crises, he explains how conventional wisdom can get in the way of achievement — and happiness. His own extraordinary education in space has taught him some counterintuitive lessons: don't visualize success, do care what others think, and always sweat the small stuff. You might never be able to build a robot, pilot a spacecraft, make a music video or perform basic surgery in zero gravity like Col. Hadfield. But his vivid and refreshing insights will teach you how to think like an astronaut, and will change, completely, the way you view life on Earth — especially your own. "Hadfield proves himself to be not only a fierce explorer of the universe, but also a deeply thoughtful explorer of the human condition." —Maria Popova, Brain Pickings To the beginner, the star-filled night sky can seem mysterious and unfathomable. But with this book as a guide the awesome nature of the Cosmos is brought down to Earth. Over the course of twelve chapters Mark Thompson, one of the presenters on BBC One's Stargazing Live and the resident astronomer on ITV's The Alan Titchmarsh Show, will take you on a journey through space, tackling the key concepts of astronomy and unlocking the secrets of the sky. From the origins of our Universe to the ever evolving techniques used to explore deep space, A Down to Earth Guide to the Cosmos traces the journey of galactic discovery that has obsessed mankind for thousands of years. Accompanying the narrative, a series of monthly sky guides focus on the astronomical highlights visible at each given time of year, with handy charts to show you exactly what to look for and how to navigate around the sky at night. As fascinating as it is accessible, A Down to Earth Guide to the Cosmos is a must for anyone who gazes up and wishes they knew more about the final frontier...

Women, in particular, face a constant internal battle between finding their own happiness and ensuring the happiness of others. Debbie Gissoni, aka "The Goddess of Happiness," shows that happiness is a choice that anyone can make, anytime and anywhere. In 44 dynamic entries the author shares her stories, insights, humor, and simple suggestions to bring out the radiant Goddess in every woman. Each entry includes meditations and journaling ideas to help readers transform the pursuit of happiness into a tangible, everyday practice. Gissoni teaches that all women are goddesses — they just need to tap their innate power and reacquaint themselves with their own magic; and that life is meant to be enjoyable — not to be taken so seriously or made too complicated. Each of these chapters ends with five simple ways to have an easier and happier life.
