For the last 6000 years turmeric has been used in Ayurvedic medicine to alleviate pain, balance digestion, purify body and mind, clear skin diseases, expel phlegm, and invigorate the blood. Nowadays, this plant has acquired great importance with its anti-aging, anti-cancer, anti-Alzheimer, antioxidant, and a variety of other medicinal properties. The need of the hour is to verify and validate the traditional uses by subjecting them to proper experimental studies. To do this effectively there needs to be a single comprehensive source of the knowledge to date. *Turmeric: the genus Curcuma* is the first comprehensive monographic treatment on turmeric. It covers all aspects of turmeric including botany, genetic resources, crop improvement, processing, biotechnology, pharmacology, medicinal and traditional uses, and its use as a spice and flavoring. Bringing together the premier experts in the field from India, Japan, UK, and USA, this book offers the most thorough examination of the cultivation, market trends, processing, and products as well as pharmacokinetic and medicinal properties of this highly regarded spice. While Ayurveda has known for millennia that turmeric cleanses the body, modern science has now discovered that it produces glutathione-S-transferase that detoxifies the body and therefore strengthens the liver, heart, and immune system. By comparing traditional uses with modern scientific discoveries, the text provides a complete view of the medicinal value and health benefits of turmeric. Heavily referenced with an exhaustive bibliography at the end of each chapter, the book collects and collates the currently available data on turmeric. Covering everything from cultivation to medicine, *Turmeric: the Genus Curcuma* serves as an invaluable reference for those involved with agriculture, marketing, processing or product development, and may function as a catalyst for future research into the health benefits and applications of turmeric.

11 September 1683, Rome. The citizens of the city wait anxiously for the outcome of the battle for Vienna as Ottoman forces lay siege to the defenders of Catholic Europe. Meanwhile, a suspected outbreak of plague causes a famous Roman tavern to be placed under quarantine. One of its detainees, the mysterious Atto Melani, a spy in the service of France, discovers a secret passage leading deep into the Roman underworld. A plot to assassinate the pope and plans to use the plague as a weapon of

mass destruction in the battle between Islam and the West are discovered. Meticulously researched and brilliantly conceived, *Imprimatur* contains startling revelations that have been concealed for centuries, drawing on original papers discovered in the Vatican archives. A thriller in the vein of Umberto Eco's *The Name of the Rose*, this novel sheds new light on the power struggles of 17th-century Europe, the repercussions of which are still felt today. First published to great controversy in Italy in 2002, *Imprimatur* was boycotted by the Italian press and publishing world. Despite this, the novel has gained European bestseller status; it has been translated into 20 languages with editions published in 45 countries. Over 1 million copies have been sold to date.

Archestratos of Gela was the author of a mock-epic poem, most likely entitled the *Hedupatheia* or *Life of Luxury*, that presented itself as a gastronomic tour of the Mediterranean world. Written sometime in the first two-thirds of the fourth century BCE, the *Hedupatheia* was widely read in the late classical and early Hellenistic periods and was translated into Latin by Ennius, through whom it influenced the work of later Roman poets including Horace. It survives today in fragments totalling about 330 lines. The *Hedupatheia* is a fundamental source for our understanding not only of fourth-century literature but also of the significance of food and dining and the reception of epic poetry in late classical society. This edition is based on a fresh examination of the manuscripts and is the first to combine an authoritative critical text of the fragments with a translation, a detailed philological and historical commentary, and an extensive introduction situating the poem in its literary, social, and cultural context.

In a series of pioneering studies, this book examines the creation—and the conflict behind the creation—of sacred space in America. The essays in this volume visit places in America where economic, political, and social forces clash over the sacred and the profane, from wilderness areas in the American West to the Mall in Washington, D.C., and they investigate visions of America as sacred space at home and abroad. Here are the beginnings of a new American religious history—told as the story of the contested

spaces it has inhabited. The contributors are David Chidester, Matthew Glass, Edward T. Linenthal, Colleen McDannell, Robert S. Michaelsen, Rowland A. Sherrill, and Bron Taylor.

What do Eastern Europe's booming sex trade, America's subprime mortgage lending scandal, China's fake goods industry, and celebrity philanthropy in Africa have in common? With biopirates trolling the blood industry, fish-farming bandits ravaging the high seas, pornography developing virtually in Second Life, and games like World of Warcraft spawning online sweatshops, how are rogue industries transmuting into global empires? And will the entire system be transformed by the advent of sharia economics? With the precision of an economist and the narrative deftness of a storyteller, syndicated journalist Loretta Napoleoni examines how the world is being reshaped by dark economic forces, creating victims out of millions of ordinary people whose lives have become trapped inside a fantasy world of consumerism. Napoleoni reveals the architecture of our world, and in doing so provides fresh insight into many of the most insoluble problems of our era.

The author of *Book of Shadows* digs deep into the practices and principles of Witchcraft to provide a comprehensive guidebook that anyone—novices and seasoned practitioners alike—can use to incorporate the beauty and power of Wicca into their own daily lives. Phyllis Currott's first book, *Book of Shadows*, was an inspirational, spiritual memoir that chronicled her journey from Ivy League-educated, New York City attorney to Wiccan High Priestess. By inviting readers of all faiths to share in her own personal transformation, Phyllis debunked many of the myths surrounding Wicca and revealed it for what it really is: a spiritual movement whose tenets of Goddess worship and reverence for Nature were a great deal more accessible and familiar than she'd ever expected. Far from being just another mechanical spell book, *Witch Crafting* is the first book to offer readers not only the how-to of Witchcraft, but also the why-to, explaining the profound spiritual tenets behind Wiccan techniques. Filled with both traditional and innovative shamanic practices, Phyllis also provides an empowering new definition of magic and reexamines the ethics under which Witchcraft is practiced, offering a groundbreaking alternative to the Threefold Law. With enchanting stories from Currott's own experiences, *Witch Crafting* will also teach you how to:

- Master the secret arts of effective spellcasting
- Create sacred space and personal rituals
- Perform divinations for spiritual insight and earthly success
- Tap into the power of altered states, such as dreaming, meditation, prayer, and trance
- Keep a magical journal and create your own *Book of Shadows*

The circular economy is a policy approach and business strategy that aims to improve resource productivity, promote sustainable consumption and production and reduce environmental impacts. This book examines the relevance of the circular economy in the context of developing countries, something which to date is little understood. This volume highlights examples of circular economy practices in developing country contexts in relation to small and medium enterprises (SMEs), informal sector recycling and national policy approaches. It examines a broad range of case studies, including Argentina, Brazil, China, Colombia, India, Indonesia, Kenya, South Africa, and Thailand, and illustrates how the circular economy can be used as a new lens and possible solution to cross-cutting development issues of pollution and waste, employment, health, urbanisation and green industrialisation. In addition to more technical and policy oriented contributions, the book also critically discusses existing narratives and pathways of the circular economy in the global North and South, and how these differ or possibly even conflict with each other. Finally, the book critically

examines under what conditions the circular economy will be able to reduce global inequalities and promote human development in the context of the Sustainable Development Goals. Presenting a unique social sciences perspective on the circular economy discourse, this book is relevant to students and scholars studying sustainability in economics, business studies, environmental politics and development studies.
