A few of us are troubled enough that we choose to walk the remainder of this road called "life," searching for answers and achieving some significance and bliss. An adolescent found the courage in his frailty to renounce everything and escape into the refuge of the wilderness of Northern India. Due to a vivid nightmare, he faltered at the last moment and stayed put within the confines of his tormented urban existence. A year passed and his compulsive impulse for that escape was suppressed. Rebuilding a new way to live, he channeled and fed those impulses by trekking into the mountains of Maharashtra, trailing through the forests of Bhandavgarh and Tadoba Andhari, whilst getting too close to tigers and crocodiles. In doing so, he transformed himself into a true backpacker. But something was still amiss. Love. It took just one woman to undo all the good. The adolescent turned man found himself weaker than ever before and drenched in despair. He was back where he started, fighting the same impulse to escape into the Northern Mountains. Will the road cease for him or will he find a silver lining ahead? See where his path leads him in *A Bittersweet Nostalgia*.

COOP 2012 is the tenth COOP conference, marking twenty years from the first conference in 1992. In this special anniversary edition we asked researchers and practitioners to reflect on what have been the successes and the failures in designing cooperative systems, and what challenges still need to be addressed. We have come a long way in understanding the intricacies of cooperation and in designing systems that support work practices and collective activities. These advances would not have been possible without the concerted effort of contributions from a plethora of domains including CSCW, HCI, Information Systems, Knowledge Engineering, Multi-agent systems, organizational and management sciences, sociology, psychology, anthropology, ergonomics, linguistics, etc. The COOP community is going from strength to strength in developing new technologies, advancing and proposing new methodological approaches, and forging theories.

The current Symbian Press list focuses very much on the small scale features of Symbian OS in a programming context. The Architecture Sourcebook is different. It's not a how-to book, it's a 'what and why' book. And because it names names as it unwinds the design decisions which have shaped the OS, it is also a 'who' book. It will show where the OS came from, how it has evolved to be what it is, and provide a simple model for understanding what it is, how it is put together, and how to interface to it and work with it. It will also show why design decision were made, and will bring those decisions to life in the words of Symbian's key

architects and developers, giving an insider feel to the book as it weaves the "inside story" around the architectural presentation. The book will describe the OS architecture in terms of the Symbian system model. It will show how the model breaks down the system into parts, what role the parts play in the system, how the parts are architected, what motivates their design, and how the design has evolved through the different releases of the system. Key system concepts will be described; design patterns will be explored and related to those from other operating systems. The unique features of Symbian OS will be highlighted and their motivation and evolution traced and described. The book will include a substantial reference section itemising the OS and its toolkit at component level and providing a reference entry for each component.

Kingdom of Nokia tells a fascinating story of corporatism in Finland. How did the mobile phone giant Nokia make the Finnish elite willing to serve the interests of the company? Nokia became a global player in mobile communications in the 1990s, and helped establish Anglo-Saxon capitalism in Finland. Through its success and strong lobbying, the company managed to capture the attention of Finnish politicians, civil servants, and journalists nationwide. With concrete detailed examples, Kingdom of Nokia illustrates how Nokia organised lavishing trips to journalists and paid direct campaign funding to politicians to establish its role at the core of Finnish decision-making. As a result, the company influenced important political decisions such as joining the European Union and adopting the euro, and further, Nokia even drafted its own law to serve its special interests. All this in a country considered one of the least corrupt in the world.

You Are Here: Art After the Internet is the first major publication to critically explore both the effects and affects that the internet has had on contemporary artistic practices.

Responding to an era that has increasingly chosen to dub itself as "post-internet," this collective text explores the relationship of the internet to art practices from the early millennium to the present day. The book positions itself as a provocation on the current state of cultural production, relying on first-person accounts from artists, writers and curators as the primary source material. The book raises urgent questions about how we negotiate the formal, aesthetic and conceptual relationship of art and its effects after the ubiquitous rise of the internet. "You Are Here is the best anything I've read in ages ... and I'm jealous I'm not a contributor. I really loved it. It's a joy to see new green shoots of cultural tendencies emerging from barren soil." - Douglas Coupland

Following the success of the First MOBILIGHT 2009 in Athens, Greece, the Second International Conference on Mobile Lightweight Systems (MOBILIGHT) was held in Barcelona, Spain on May 10-12, 2010. It was not an easy decision to carry on organizing a scientific event on wireless communications, where competition is really enormous. This decision was motivated by discussion with many colleagues about the current unprecedented demand for lightweight, wireless communication devices with high usability and performance able to support added-value services in a highly mobile environment. Such devices follow the users everywhere they go (at work, at home, while travelling, in a classroom, etc.) and result in exciting research, development and business opportunities. Such scenarios clearly demand significant upgrades to the existing communication paradigm in terms of infrastructure, devices and services to

support the “anytime, anywhere, any device” philosophy, providing novel and fast-evolving requirements and expectations on - search and development in the field of information and communication technologies. The core issue is to support wireless users' desire for 24/7 network availability and transparent access to "their own" services. In this context, we continue to envision an international forum where practitioners and researchers coming from the many areas involved in lightweight wireless systems' design and deployment would be able to interact and exchange experiences.

A revealing biography of Britain's future king by a New York Times–bestselling author the Wall Street Journal hails “the Godfather of royal reporting.” With exclusive interviews and extensive research, King Charles delivers insight into the life of His Royal Highness, the Prince of Wales, as he nears the throne at a watershed moment in modern history and in the British monarchy. Author Robert Jobson debunks the myths about the man who will be king, going beyond bogus media caricatures of Charles to tell his true story. Jobson—who has spent nearly thirty years chronicling the House of Windsor, and has met Prince Charles on countless occasions—received unprecedented cooperation from Clarence House, the Prince's office, in writing this biography. King Charles divulges the full range of the Prince's political beliefs: the United Kingdom's special relationship to the United States, climate change, Brexit, and immigration—to ultimately portray the kind of monarch Charles III will be. Jobson taps a number of

sources close to the Prince who have never spoken on the record before, plus members of the Royal Household who have served the Prince during his decades of public life. This comprehensive profile also reveals the plans for Charles to serve as Prince Regent once the Queen turns ninety-five; how at her insistence he already reads all government briefings; and why he feels it is his constitutional duty to relay his thoughts to ministers in his controversial “black spider memos.” Moreover, King Charles reveals the truth about the Prince’s relationship with his second wife and chief supporter, Camilla. The result is an intriguing portrait of a man on the cusp of kingship.

Working in cities from Liverpool and Glasgow to Paris and New York, the interventionist artist transforms ordinary urban spaces, disrupting everyday life in ways that reinvent the way we encounter and experience art and compelling people to act and think differently about the world around them. Providing incisive new insights into the work and life of the artist, *Cultural Hijack* examines how these artists use the city as a playground, a stage, or an instrument for unsanctioned artworks, informal creative practices, activist interventions, and political actions. Drawing on a series of essays, personal testimonies, and original interviews from artists such as Tatsuro Bashi, BGL, Gelitin, Michael Rakowitz, and Krzysztof Wodiczko, this illuminating work enlarges our understanding of the creative process and how artists are developing new weapons in the arsenal of critical resistance, both emancipating and expanding the spaces of artistic and cultural production.
