This book provides a broad overview of current work on South African languages, language resources and language technologies. While it provides a fairly comprehensive overview, it also ties together the most recent knowledge state here, and is therefore truly innovative ? The book is therefore informed by current international trends in the respective fields of science, and feeds back into them ? There is absolutely no doubt that the book has an academic peer audience and is directed at specialists in the field. - Prof. Axel Fleisch, University of Helsinki, Finland

Issues for Nov. 1957- include section: Accessions. Aanwinste, Sept. 1957- (also published separately)

This reference presents tables of information on some 18,000 nonferrous alloys. For this edition, material is expanded to include more mechanical properties, text, and specification issue dates for each alloy. Alloys are grouped on the basis of chemical composition to provide a starting point for in

This publication provides the first comprehensive assessment of the relationship between trade standards and development priorities in Africa, with case studies of the use of international standards and capacity for compliance in five countries: Kenya, Mozambique, Nigeria, South Africa and Uganda. It describes the economic context of trade standards in these countries, and examines the mechanisms by which standards and regulations are established and revised at local and international levels. It also considers the probable impact of new standards, regulations and related production/marketing practices in key industries.

Analysis of Cosmetic Products advises the reader from an analytical chemistry perspective on the choice of suitable analytical methods for production monitoring and quality control of cosmetic products. In the format of an easy-to-understand compendium of published literature on the subject, this book will enable people working in the cosmetic industry or in research laboratories to: \* become familiar with the main legislative and analytical literature on this subject and \* learn about and choose suitable analytical procedures for production monitoring and control of cosmetic products, according to their composition. The first section of Analysis of Cosmetic Products covers various definitions and concepts relating to cosmetic products, current legislation in different countries and specific legislation on ingredients. The central body of the book addresses analytical methods for monitoring and quality control of cosmetic products with the fundamental objective being to enable reader's access to scientific reviews carried out by experts in analytical chemistry. The final section contains a small review of the alternative methods to using animals for cosmetic product evaluation. \* An essential resource for those in the cosmetic industry and research laboratories, allowing you to become familiar with the main analytical literature \* Up-to-date and exhaustive overviews of current knowledge dealing with cosmetic analysis, general concepts and legislation \* Including tables and figures, designed to graphically communicate important information in an easy-to-understand format

(FAQ). 40 years after the release of the iconic Sgt. Pepper's Lonely Hearts Club Band , the Beatles continue to captivate music fans of all ages. There's something always more to discuss about the Fab Four. What were their greatest live performances? Their worst moments? Stories still unknown by most music fans, trends still unseen, history still uninterpreted are all revealed in Fab Four FAQ . Pop culture authors Stuart Shea and Rob Rodriguez provide must-know fan trivia and offer obscure Beatles facts and stories in an easy-to-read, provocative format that will start as many arguments as will end them. With more than sixty chapters of stories, history, observation, and opinion, Fab Four FAQ lays bare the whys and wherefores that made the Beatles so great, giving credit where credit is due and maybe bursting some bubbles along the way.

Sorghum and Millets: Chemistry, Technology and Nutritional Attributes, Second Edition, is a new, fully revised edition of this widely read book published by AACC International. With an internationally recognized editorial team, this new edition covers, in detail, the history, breeding, production, grain chemistry, nutritional quality and handling of sorghum and millets. Chapters focus on biotechnology, grain structure and chemistry, nutritional properties, traditional and modern usage in foods and beverages, and industrial and non-food applications. The book will be of interest to academics researching all aspects of sorghum and millets, from breeding to usage. In addition, it is essential reading for those in the food industry who are tasked with the development of new products using the grains. Updated version of the go-to title in sorghum and millets with coverage of developments from the last two decades of research Brings together leading experts from across the field via a world leading editorial team Published in partnership with the AACCI - advancing the science and technology of cereals and grains This book provides the reader with an understanding of the hazards involved in using electrical equipment in Potentially Explosive Atmospheres. It is based on the newly adopted international IEC79 Series of Standards that are now harmonizing and replacing older national Standards. Explosion-proof installations can be expensive to design, install and operate. The strategies and techniques described in this book can significantly reduce costs whilst maintaining plant safety. The book explains the associated terminology and its correct use - from Area Classification through to the selection of explosion-protected electrical apparatus, describing how protection is achieved and maintained in line with these international requirements. The IEC standards require that engineering staff and their management are trained effectively and safely in Hazardous Areas, and this book is designed to help fulfill that need. A basic understanding of instrumentation and electrical theory would be of benefit to the reader, but no previous knowledge of hazardous area installation is required. \* An engineer's guide to the hazards and best practice for using electrical equipment in Potentially Explosive Atmospheres. \* Fully in line with the newly adopted international standards, the IEC79 series. \* Clear explanations of terminology and background information make this the most accessible book on this subject.

In a modern world with rapidly growing international trade, countries compete less based on the availability of natural resources, geographical advantages, and lower labor costs and more on factors related to firms' ability to enter and compete in new markets. One such factor is the ability to demonstrate the quality and safety of goods and services expected by consumers and confirm compliance with international standards. To assure such compliance, a sound quality infrastructure (QI) ecosystem is essential. Jointly developed by the World Bank Group and the National Metrology Institute of Germany, this guide is designed to help development partners and governments analyze a country's quality infrastructure ecosystems and provide recommendations to design and implement reforms and enhance the capacity of their QI institutions.

Offers more than 360,000 words and 550,000 translations and explores idiomatic variations in meaning.

Why and under which conditions do companies voluntarily adopt high social and environmental standards? Christian Thauer looks inside the firm to illustrate the internal drivers of the social conduct of business. He argues that corporate social responsibility (CSR) assists decision-makers to resolve managerial dilemmas. Drawing on transaction cost economics, he asks why and which dilemmas bring CSR to the fore. In this context he describes a managerial dilemma as a situation where the execution of management's decisions transforms the mode of cooperation within the organization from a hierarchy to one in which managers become dependent on, and vulnerable to, the behavior of subordinates. Thauer provides empirical illustration of his theory by examining automotive and textile factories in South Africa and China. Thauer demonstrates that CSR is often driven by internal management problems rather than by the external pressures that corporations confront.

This book provides practising SA structural design engineers with the background to and justification for the changes proposed in the new SANS 10160 standard.
